AUTHOR INDEX

A

Abelmann, W. H. See ADESANYA, GOLDBERG, PHEAR, THORP, YOUNG, and ABELMANN 569

Accatino, Luigi, and **Francis R. Simon.** Identification and characterization of a bile acid receptor in isolated liver surface membranes 496

Adams, Douglass F. See HOLLENBERG, WILLIAMS, BURGER, ISHIKAWA, and ADAMS 39

Adesanya, C. O., A. H. Goldberg, W. P. C. Phear, K. A. Thorp, N. A. Young, and **W. H. Abelmann.** Heart muscle performance after experimental viral myocarditis 569

Agarwal, R. P., G. W. Crabtree, R. E. Parks, Jr., J. A. Nelson, R. Keightley, R. Parkman, F. S. Rosen, R. C. Stern, and **S. H. Polmar.** Purine nucleoside metabolism in the erythrocytes of patients with adenosine deaminase deficiency and severe combined immunodeficiency 1025

Ahr, David J. See RICKLES, HOYER, RICK, and AHR 1618

Ahuja, S. P. See WOLFE, HAVEL, MARLISS, KANE, SEYMOUR, and AHUJA 329

Albers, John J. See RACHMILEWITZ, ALBERS, and SAUNDERS 530

Alfrey, Allen C., and **Clive C. Solomons.** Bone pyrophosphate in uremia and its association with extraosseous calcification 700

—, **Clive C. Solomons, Jenny Ciricillo,** and **Nancy L. Miller.** Extraosseous calcification. Evidence for abnormal pyrophosphate metabolism in uremia 692

Allen, Donald O. See WILDENTHAL, ALLEN, KARLSSON, WAKELAND, and CLARK 551

Allen, Robert H. See SCHNEIDER, BURGER, MEHLMAN, and ALLEN 27

Alper, Chester A., Harvey R. Colten, John S. S. Gear, Arthur R. Rabson, and **Fred S. Rosen.** Homozygous human C3 deficiency. The role of C3 in antibody production, $C\bar{1}s$-induced vasopermeability, and cobra venom-induced passive hemolysis 222

Amaral, Leonard. See WERTHAMER, GOVINDARAJ, and AMARAL 1000

Amato, Dominick. See FREEDMAN, AMATO, and SAUNDERS 673

Amiel, C., H. Kuntziger, S. Couette, C. Coureau, and **N. Bergounioux.** Evidence for a parathyroid hormone-independent calcium modulation of phosphate transport along the nephron 256

Amrani, David L. See MOSESSON, AMRANI, and MÉNACHÉ 782

Anast, Constantine S. See FORTE, NICKOLS and ANAST 559

Anastasi, John. See STEINER and ANASTASI 732

Anderson, G. H. See JEEJEEBHOY, ANDERSON, NAKHOODA, GREENBERG, SANDERSON, and MARLISS 125

Anderson, W. French. See WINSLOW, SWENBERG, GROSS, CHERVENICK, BUCHMAN, and ANDERSON 772

Andersson, Arne, Håkan Borg, Carl-Gustav Groth, Rolf Gunnarsson, Claes Hellerström, Göran Lundgren, Jan Westman, and **Jan Östman.** Survival of isolated human islets of Langerhans maintained in tissue culture 1295

Ansfield, James. See WALSH, ISENBERG, ANSFIELD, and MAXWELL 1125

Aoki, Thomas T. See GANDA, AOKI, SOELDNER, MORRISON, and CAHILL 1403

Armstrong, Joseph P. See BOLDT and ARMSTRONG 1068

Asano, Yasushi, Uri A. Liberman, and **Isidore S. Edelman.** Thyroid thermogenesis. Relationships between Na^+-dependent respiration and $Na^+ + K^+$-adenosine triphosphatase activity in rat skeletal muscle 368

Assimacopoulos-Jeannet, Françoise. See KARAKASH, ASSIMACOPOULOS-JEANNET, and JEANRENAUD 1117

Austen, K. Frank. See KATER, GOETZL, and AUSTEN 1173

—. See WASSERMAN and AUSTEN 738

B

Babior, Bernard M. See CURNUTTE, KARNOVSKY, and BABIOR 1059

Bache, Robert J. See COBB, BACHE, RIVAS, and GREENFIELD 1359

Baggio, G. See MANZATO, FELLIN, BAGGIO, WALCH, NEUBECK, and SEIDEL 1248

Balcerzak, Stanley P. See KING, YANES, HURTUBISE, BALCERZAK, and LOBUGLIO 1451

Balis, M. E. See HOLLAND, DILORENZO, DANCIS, BALIS, YÜ, and COX 1600

Balow, James E. See FAUCI, BALOW, and PRATT 826

Barcenas, Camilo. See FULLER, CARTER, BARCENAS, and KNOCHEL 1019

Barger, A. Clifford. See WATKINS, BURTON, HABER, CANT, SMITH, and BARGER 1606

Bar-On, Hanoch, Paul S. Roheim, and **Howard A. Eder.** Serum lipoproteins and apolipoproteins in rats with streptozotocin-induced diabetes 714

Bartlett, John G. See GORBACH, MAYHEW, BARTLETT, THADEPALLI, and ONDERDONK 478

Bastl, Christine. See SHERWIN, BASTL, FINKELSTEIN, FISHER, BLACK, HENDLER, and FELIG 722

Baum, John. See ROSENFELD, BAUM, STEIGBIGEL, and LEDDY 1635

Baumann, Gerhard, and **Joseph F. Dingman.** Distribution, blood transport, and degradation of antidiuretic hormone in man 1109

Becker, Michael A. Patterns of phosphoribosylpyrophosphate and ribose-5-phosphate concentration and generation in fibroblasts from patients with gout and purine overproduction 308

Beller, George A., James Conroy, and **Thomas W. Smith.** Ischemia-induced alterations in myocardial $(Na^+ + K^+)$-ATPase and cardiac glycoside binding 341

Bello-Reuss, Elsa, Daniel L. Trevino, and **Carl W. Gottschalk.** Effect of renal sympathetic nerve stimulation on proximal water and sodium reabsorption 1104

Bennett, Cleaves M., Richard J. Glassock, Ramsay L. S. Chang, William M. Deen, Channing R. Robertson, and **Barry M. Brenner.** Pemselectivity of the glomerular capillary wall. Studies of experimental glomerulonephritis in the rat using dextran sulfate 1287

—. See CHANG, DEEN, ROBERTSON, BENNETT, GLASSOCK, and BRENNER 1272

Benson, James W. See PALMER, HENRY, BENSON, JOHNSON, and ENSINCK 522

Bergeron, M., L. Dubord, and **C. Hausser.** Membrane permeability as a cause of transport defects in experimental Fanconi syndrome. A new hypothesis 1181

Bergounioux, N. See AMIEL, KUNTZIGER, COUETTE, COUREAU, and BERGOUNIOUX 256

Bersch, Noelle. See GOLDE, BERSCH, and CLINE 57

Berwick, Leonard. See MORRISON, BERWICK, ORCI, and WINEGRAD 650

Bettini, Guglielmina. See ROCHESTER and BETTINI 661
Bhattacharyya, M. H. See OLSON, KNUTSON, BHATTACHARYYA, and DELUCA 1213
Bier, Dennis M. See GERICH, LORENZI, BIER, TSALIKIAN, SCHNEIDER, KARAM, and FORSHAM 875
Black, Henry. See SHERWIN, BASTL, FINKELSTEIN, FISHER, BLACK, HENDLER, and FELIG 722
Blantz, Roland C., Karen S. Konnen, and **Bryan J. Tucker.** Angiotensin II effects upon the glomerular microcirculation and ultrafiltration coefficient of the rat 419
Bluestein, Harry G., and **Nathan J. Zvaifler.** Brain-reactive lymphocytotoxic antibodies in the serum of patients with systemic lupus erythematosus 509
Boldt, David H., and **Joseph P. Armstrong.** Rosette formation between human lymphocytes and sheep erythrocytes. Inhibition of rosette formation by specific glycopeptides 1068
Bond, John H., Jr., and **Michael D. Levitt.** Fate of soluble carbohydrate in the colon of rats and man 1158
Bonjour, J-P. See TRÖHLER, BONJOUR, and FLEISCH 264
Bonte, Frederick J. See BUJA, PARKEY, STOKELY, BONTE, and WILLERSON 1508
Borg, Håkan. See ANDERSSON, BORG, GROTH, GUNNARSSON, HELLERSTRÖM, LUNDGREN, WESTMAN, and ÖSTMAN 1295
Boulding, Erwin T. See HOSKINS and BOULDING 63,74
Bowes, Kenneth L. See ZWICK, BOWES, DANIEL, and SARNA 1644
Boxer, Laurence A., and **Thomas P. Stossel.** Interactions of actin, myosin, and an actin-binding protein of chronic myelogenous leukemia leukocytes 964
Boyer, James L. See LAYDEN and BOYER 1009
Bradley, Kathryn. See HANCE, BRADLEY, and CRYSTAL 102
Brannan, Patricia G., Pedro Vergne-Marini, Charles Y. C. Pak, Alan R. Hull, and **John S. Fordtran.** Magnesium absorption in the human small intestine. Results in normal subjects, patients with chronic renal disease, and patients with absorptive hypercalciuria 1412
Brenner, Barry M. See BENNETT, GLASSOCK, CHANG, DEEN, ROBERTSON, and BRENNER 1287
—. See CHANG, DEEN, ROBERTSON, BENNETT, GLASSOCK, and BRENNER 1272
Brickman, Arnold S., Jack W. Coburn, Gerald R. Friedman, William H. Okamura, Shaul G. Massry, and **Anthony W. Norman.** Comparison of effects of 1α-hydroxy-vitamin D_3 and 1, 25-dihydroxy-vitamin D_3 in man 1540
Brooks, G. F. See PETERSEN, GRAHAM, and BROOKS 283
Brooks, Harold. See HOLLAND and BROOKS 541
Buchman, Robert R. See WINSLOW, SWENBERG, GROSS, CHERVENICK, BUCHMAN, and ANDERSON 772
Buckingham, P. D. See JONES, JONES, RHODES, BUCKINGHAM, and HUGHES 706
Buffaloe, G. See TERMAN, TAVEL, TAVEL, PETTY, HARBECK, BUFFALOE, and CARR 1201
Buja, L. Maximilian, Robert W. Parkey, Ernest M. Stokely, Frederick J. Bonte, and **James T. Willerson.** Pathophysiology of technetium-99m stannous pyrophosphate and thallium-201 scintigraphy of acute anterior myocardial infarcts in dogs 1508
Bunn, H. Franklin, David N. Haney, Steven Kamin, Kenneth H. Gabbay, and **Paul M. Gallop.** The biosynthesis of human hemoglobin A_{1c}. Slow glycosylation of hemoglobin in vivo 1652
Burger, Bruno. See HOLLENBERG, WILLIAMS, BURGER, ISHIKAWA, and ADAMS 39
Burger, Robert L. See SCHNEIDER, BURGER, MEHLMAN, and ALLEN 27
Burghen, George A., William C. Duckworth, Abbas E. Kitabchi, Solomon S. Solomon, and **Phillip L. Poffenbarger.** Inhibition of insulin degradation by nonsuppressible insulin-like activity 1089
Burke, G. See YU, FRIEDMAN, RICHMAN, and BURKE 745
Burton, James A. See WATKINS, BURTON, HABER, CANT, SMITH, and BARGER 1606
Bushkell, Lawrence L. See JORDON, HEINE, TAPPEINER, BUSHKELL, and PROVOST 1426

C

Cahill, George F., Jr. See GANDA, AOKI, SOELDNER, MORRISON, and CAHILL 1403
Callahan, Edward N. See GOLTZMAN, PEYTREMANN, CALLAHAN, SEGRE, and POTTS 8
Cannady, Preston B., Jr. See STEELE, CANNADY, MOORE, and GENTRY 156
Cant, James R. See WATKINS, BURTON, HABER, CANT, SMITH, and BARGER 1606
Carr, Ronald. See TERMAN, TAVEL, TAVEL, PETTY, HARBECK, BUFFALOE, and CARR 1201
Carson, Dennis A., and **J. Edwin Seegmiller.** Effect of adenosine deaminase inhibition upon human lymphocyte blastogenesis 274
Carter, Norman W. See FULLER, CARTER, BARCENAS, and KNOCHEL 1019
Chabner, Bruce A. See JACOBS, STOLLER, CHABNER, and JOHNS 534
Chacko, G. K. See SCHICK, KURICA, and CHACKO 1221
Chan, Lawrence, Peter O. Kohler, and **Bert W. O'Malley.** Translation of ovalbumin mRNA in *Xenopus laevis* oocytes. Characterization of the system and effects of estrogen on injected mRNA populations 576
Chan, T. See LEVINE, NASH, CHAN, and DUBROVSKIS 1490
Chang, Ramsay L. S., William M. Deen, Channing R. Robertson, Cleaves M. Bennett, Richard J. Glassock, and **Barry M. Brenner.** Permselectivity of the glomerular capillary wall. Studies of experimental glomerulonephritis in the rat using neutral dextran 1272
—. See BENNETT, GLASSOCK, CHANG, DEEN, ROBERTSON, and BRENNER 1287
Charney, Alan N., and **Mark Donowitz.** Prevention and reversal of cholera enterotoxin-induced intestinal secretion by methylprednisolone induction of Na^+-K^+-ATPase 1590
Charpin, J. See OREHEK, MASSARI, GAYRARD, GRIMAUD, and CHARPIN 301
Chayoth, Rueben. See DERUBERTIS, CHAYOTH, and FIELD 641
—. See SHUMAN, ZOR, CHAYOTH, and FIELD 1132
Cheng, F. W. See SHEFER, CHENG, DAYAL, HAUSER, TINT, SALEN, and MOSBACH 897
Chervenick, Paul A. See WINSLOW, SWENBERG, GROSS, CHERVENICK, BUCHMAN, and ANDERSON 772
Chesney, Russell W., Charles R. Scriver, and **Fazl Mohyuddin.** Localization of the membrane defect in transepithelial transport of taurine by parallel studies in vivo and in vitro in hypertaurinuric mice 183
Chihara, Kazuo, Yuzuru Kato, Kiyoshi Maeda, Shigeru Matsukura, and **Hiroo Imura.** Suppression by cyproheptadine of human growth hormone and cortisol secretion during sleep 1393
Chisari, Francis V., John A. Routenberg, and **Thomas S. Edgington.** Mechanisms responsible for defective human T-lymphocyte sheep erythrocyte rosette function associated with hepatitis B virus infections 1227

Chou, Shyan-yih, Leon F. Ferder, Daniel L. Levin, and **Jerome G. Porush.** Evidence for enhanced distal tubule sodium reabsorption in chronic salt-depleted dogs 1142
Ciccimarra, Filippo, Fred S. Rosen, Eveline Schneeberger, and **Ezio Merler.** Failure of heavy chain glycosylation of IgG in some patients with common, variable agammaglobulinemia 1386
Ciricillo, Jenny. See ALFREY, SOLOMONS, CIRICILLO, and MILLER 692
Clark, Charles M., Jr. See WILDENTHAL, ALLEN, KARLSSON, WAKELAND, and CLARK 551
Clements, Rex S., Jr., and **William B. Rhoten.** Phosphoinositide metabolism and insulin secretion from isolated rat pancreatic islets 684
Clemetson, K. J. See JENKINS, PHILLIPS, CLEMETSON, MEYER, LARRIEU, and LÜSCHER 112
Cline, Martin J. See GOLDE, BERSCH, and CLINE 57
Cobb, Frederick R., Robert J. Bache, Frank Rivas, and **Joseph C. Greenfield, Jr.** Local effects of acute cellular injury on regional myocardial blood flow 1359
Coburn, Jack W. See BRICKMAN, COBURN, FRIEDMAN, OKAMURA, MASSRY, and NORMAN 1540
Cochrane, Charles G. See REVAK and COCHRANE 852
Code, Charles F. See WOLLIN, CODE, and DOUSA 1548
Cohen, Jordan J., Nicolaos E. Madias, Charles J. Wolf, and **William B. Schwartz.** Regulation of acid-base equilibrium in chronic hypocapnia. Evidence that the response of the kidney is not geared to the defense of extracellular $[H^+]$ 1483
Colten, Harvey R. See ALPER, COLTEN, GEAR, RABSON, and ROSEN 222
Conklyn, Maryrose. See TUNG, SILBER, QUAGLIATA, CONKLYN, GOTTESMAN, and HIRSCHHORN 756
Conroy, James. See BELLER, CONROY, and SMITH 341
Cooper, Allen D. The regulation of 3-hydroxy-3-methylglutaryl coenzyme A reductase in the isolated perfused rat liver 1461
Cooper, Barry, and **Robert I. Gregerman.** Hormone-sensitive fat cell adenylate cyclase in the rat. Influences of growth, cell size, and aging 161
Couette, S. See AMIEL, KUNTZIGER, COUETTE, COUREAU, and BERGOUNIOUX 256
Coureau, C. See AMIEL, KUNTZIGER, COUETTE, COUREAU, and BERGOUNIOUX 256
Couropmitree, Chaiyapon. See FELDMAN and COUROPMITREE 1
Cox, John W. See VENUTO, COX, STEIN, and FERRIS 938
Cox, R. P. See HOLLAND, DILORENZO, DANCIS, BALIS, YÜ, and COX 1600
Crabtree, G. W. See AGARWAL, CRABTREE, PARKS, NELSON, KEIGHTLEY, PARKMAN, ROSEN, STERN, and POLMAR 1025
Craven, Patricia. See DERUBERTIS and CRAVEN 435, 1442
Crystal, Ronald G. See HANCE, BRADLEY, and CRYSTAL 102
Curnutte, John T., Manfred L. Karnovsky, and **Bernard M. Babior.** Manganese-dependent NADPH oxidation by granulocyte particles. The role of superoxide and the nonphysiological nature of the manganese requirement 1059
Czech, Michael P. Cellular basis of insulin insensitivity in large rat adipocytes 1523

SUBJECT INDEX

A

Acidosis
cerebrospinal fluid, response to carbon monoxide, 977
metabolic, chronic hypocapnia, regulation of acid-base equilibrium, role of kidney, 1483

Actin
interactions with myosin and actin-binding protein, chronic myelogenous leukemia leukocytes, 964

Adenocarcinoma
colon, cyclic AMP and cyclic GMP, 641

Adenosine deaminase
chronic lymphocytic leukemia, B and T lymphocytes, 756
deficiency, erythrocyte purine nucleoside metabolism, 1025
inhibition of lymphocyte blastogenesis, 274

Adenylate cyclase
activation by cholera toxin, liver, 450
activation, fetal heart response to glucagon, 551
and cyclic AMP, hepatic, reduced sensitivity to glucagon by continuous stimulation, 435
fat cell hormone sensitivity, effect of growth, cell size, and aging, 161
stimulation by parathyroid hormone, renal cortical membrane, 8

Adipocytes
insulin binding, glucose transport and oxidation, effects of obesity, 842
large and small, insulin action, 1523
and monocytes, obesity, decreased insulin binding, 1165

Adipose tissue
cholesterol, parameter of three-pool model of plasma cholesterol turnover, hyperlipidemia, 137
hormone sensitivity, effects of growth, cell size, and aging on adenylate cyclase, 161

Adrenal
angiotensin II receptor, effect of 1-Sar, 8-Ala analogue, 39

Adrenergic
regulation of blood pressure, chronic renal failure, 1190

β-Adrenergic
blockade, effect on renal response to renal nerve stimulation, 459

β-Adrenergic receptors
identification by (−)alprenolol binding, human lymphocytes, 149

Agammaglobulinemia
failure of heavy chain glycosylation of IgG, 1386

Aging
effect on hormone-sensitive fat cell adenylate cyclase, 161

Air pollution
effect of nitrogen dioxide on bronchial sensitivity, asthma, 301

Albumin
infusion, proximal tubule bicarbonate reabsorption, 1490
in vivo isomerization and catabolism, 398
renal excretion, comparison with Zn-α_2-glycoprotein, 945

Aldosterone
receptors, nonsteroidal anti-inflammatory drugs, mineralocorticoid agonist activity, 1
renin and angiotensin, congestive failure, 1606

Allergy
chronic urticaria, defective histamine release, 1369
IgA and IgG anti-ragweed antibodies in nasal secretions, inhibition of histamine release, 1041
ragweed hayfever, effect of immunotherapy on humoral and cellular responses, 1378

Allograft
rejection, granuloma formation, dermal reactivity, suppression of cell-mediated immunologic responses, diabetes mellitus, 362

Alprenolol
binding to β-adrenergic receptors, human lymphocytes, 149

Amino acids
free fatty acids, and carbohydrates, effects of fasting and ethanol on splanchnic metabolism, 329
glucagon and insulin, anephric patients, effect of hemodialysis, 1403
hereditary transport defect, localization of transepithelial membrane transport of taurine, 183
metabolism, skeletal muscle, effect of fasting, 444
splanchnic and leg metabolism, effect of dietary protien, diabetes mellitus, 987
transport defects, Fanconi syndrome, membrane permeability, 1181

AMP
cyclic, and adenylate cyclase, hepatic, reduced sensitivity to glucagon by continuous stimulation, 435
cyclic, and cyclic GMP, colon adenocarcinoma, 641
cyclic, effect of prostaglandins and histamine, gastric mucosa, 1548
cyclic, fetal heart response to glucagon, 551
cyclic, interaction with glucose, somatostatin, and sulfonylureas on leucine incorporation into insulin, 230
cyclic, and protein kinase, renal cortex, hormonal control, 1442
cyclic, role in regulation of urinary phosphate by parathyroid hormone and vitamin D, 559
cyclic, thyroid, refractoriness to thyroid-stimulating hormone, 1132

Anaphylaxis
slow-reacting substance, interaction with arylsulfatase B, human lung, 738

Androgen
resistance, hereditary male pseudohermaphroditism, dihydrotestosterone binding by fibroblasts, 1342

Androstanediol
induction of prostatic hypertrophy, 1093

Anemia
congenital hypoplastic, erythroid colony growth, 673
hypochromic, hemin-controlled repressor in reticulocytes, 594

Angiotensin
renin and aldosterone, congestive failure, 1606

Angiotensin II
effects of glomerular microcirculation and ultrafiltration coefficient, 419
renal, adrenal, and vascular receptors, antagonist activity of 1-Sar, 8-Ala analogue, 39

Antibodies
anti-ragweed IgA and IgG, nasal secretions, inhibition of histamine release, 1041
anti-ragweed IgE and IgG, effect of immunotherapy on cellular responses in hayfever, 1378
anti-T-cell, fractionation of T-cell subpopulations, systemic lupus erythematosus, 604
anticytotoxin response, pathogenesis of *Shigella* diarrhea, 194
anti-DNA, detection using synthetic antigens, binding of poly(deoxyadenylate-deoxythymidylate), 1330
anti-glomerular basement membrane, glomerulonephritis, 351
brain-reactive lymphocytotoxic, systemic lupus erythematosus, 509
IgG, herpes gestationis factor, 1426

production, role of C3, homozygous C3 deficiency, 222
transcortin-specific, placenta, localized immune response, 1000
Antidiuretic hormone
distribution, blood transport, and degradation, 1109
Antigen(s)
ABH blood group, degradation in human colon, enteric bacterial enzymes, 63
ABH blood group, degradation in human colon, gene control of enteric bacterial density, 74
heterogeneity, B and T lymphocytes, 390
synthetic, detection of anti-DNA antibody, binding of poly(deoxyadenylate-deoxythymidylate), 1330
Antihemophilic factor
covalently linked subunit structure, 925
Aorta
intima-media with intact endothelium, 650
Apolipoproteins
and lipoproteins, streptozotocin-induced diabetes, 714
Apoprotein B
human jejunal mucosa, 530
Arginine
transamidination, liver synthesis of guanidinosuccinic acid, 807
Articular cartilage
proteoglycan degradation by leukocyte granule neutral proteases, 615
Arylsulfatase B
human lung, interaction with slow-reacting substance of anaphylaxis, 738
Aspirin
effect on cholera toxin-stimulated intestinal electrolyte transport, 916
mineralocorticoid agonist activity, sodium retention, 1
Asthma
bronchial cell histamine release, airway reactivity to carbocholine, rhesus monkey, 586
effect of nitrogen dioxide on bronchial sensitivity, 301
ATPase
sodium-potassium activated, bile salt-independent bile flow, liver plasma membranes, effect of thyroid hormone, 1009
sodium-potassium activated, cholera enterotoxin induced intestinal secretion, effects of methylprednisolone, 1590
sodium-potassium activated, myocardial, cardiac glycoside binding, effects of ischemia, 341
sodium-potassium activated, and sodium-dependent respiration, skeletal muscle, thyroid thermogenesis, 368
Azotemia
inhibition of thymidine incorporation into renal DNA after uninephrectomy, 94

B

B cells
chronic lymphocytic leukemia, adenosine deaminase, 756
tissue lymphocyte infiltration, primary and metastatic cancer, 1471
and T lymphocytes, antigen heterogeneity, 390
B lymphocytes
immunoglobulin-bearing and complement-receptor, same population in human peripheral blood, 53
Bacteria
anaerobic, diagnosis of infection by direct gas-liquid chromatography, 478
enteric, enzymic degradation of ABH blood group antigens, 63
enteric, enzymic degradation of ABH blood group antigens, effect of human gene interaction, 74
pulmonary clearance, 811
Bactericidal
activity, *Neisseria gonorrhoeae*, complement C8 deficiency, 283
defect, virus-infected alveolar macrophages, 1533
Basophil
histamine release, chronic urticaria, 1369
Bernard-Soulier syndrome
platelet membrane glycoproteins, 112
Bicarbonate
plasma response, chronic hypocapnia, regulation of acid-base equilibrium, role of kidney, 1483
reabsorption, during Ringer and albumin infusions, proximal tubule, 1490
Bile
compounds, relation to lipoprotein-X, 1248
secretion, bile salt-independent, sodium-potassium ATPase, liver plasma membranes, effect of thyroid hormone, 1009
Bile acid
cholic acid synthesis, 25-hydroxylation, 897
receptor, liver surface membrane, 496
Bile duct
ligation, renal mechanisms of sodium retention, 408
Bile salts
biliary excretion, kinetic analysis, 473
effect on hepatic coenzyme A reductase, 1461
Blastogenesis
lymphocyte, inhibition by adenosine deaminase, 274
and skin test for *Sporotrichum schenckii*, 156
Blood
ABH group antigens, degradation in human colon, enteric bacterial enzymes, 63
ABH group antigens, degradation in human colon, gene control of enteric bacterial density, 74
and energy expenditure, diaphragmatic, effects of inspiratory airflow resistance and hypercapnia, 661
lung, measurement with oxygen-15, 706
myocardial ischemia, effects of isoproterenol, 1261
myocardial, regional, effects of acute cellular injury, 1359
uteroplacental, effect of perfusion pressure, 938
Blood pressure
adrenergic regulation, chronic renal failure, 1190
effect of 1-Sar, 8-Ala analogue on angiotensin II receptors, 39
renin-angiotensin-aldosterone system, congestive failure, 1606
Bone
pyrophosphate and extraosseous calcification, uremia, 700
Bone marrow
lymphocytes, normal human, cytotoxic effector cells, 826
Brain
lymphocytotoxic antibodies, systemic lupus erythematosus, 509
Bronchial cell
histamine release, airway reactivity to carbocholine, asthma in rhesus monkey, 586
sensitivity to nitrogen dioxide, human asthma, 301

C

Calcification
extraosseous, abnormal pyrophosphate metabolism, uremia, 692
extraosseous, bone pyrophosphate, uremia, 700
Calcium
absorption, intestinal, effect of vitamin D_3 analogues, 1540
absorption, jejunum and ileum, chronic renal disease, effect of 1 α-hydroxycholecalciferol, 861
independent nonsuppressible component, parathyroid hormone secretion in vivo, 678
influence on magnesium absorption by small intestine, 1412

parathyroid hormone-independent effect on nephron phosphate transport, 256
Cancer
primary and metastatic, tissue T and B cell infiltration, 1471
therapy, methotrexate metabolism, urinary 7-hydroxymethotrexate, 534
Capillary
wall, glomerular, permeability to dextran sulfate, glomerulonephritis, 1287
wall, glomerular, permeability to neutral dextran, glomerulonephritis, 1272
Carbamylcholine
correction of abnormal microtubule function and granule morphology, Chediak-Higashi syndrome, 1239
Carbocholine
airway reactivity to, bronchial cell histamine release, asthma in rhesus monkeys, 586
Carbohydrates
free fatty acids, and amino acids, effects of fasting and ethanol on splanchnic metabolism, 329
and lipid metabolism, effects of physiologic levels of glucagon and growth hormone, 875
metabolism, colon, 1158
splanchnic and leg metabolism, effect of dietary protein, diabetes mellitus, 987
Carbon monoxide
ventilatory response to, 977
Carcinoma
colon, cyclic AMP and cyclic GMP, 641
Cardiology
effect of glucagon on fetal heart contraction, adenylate cyclase, and cyclic AMP, 551
effects of isoproterenol on ventricular function, electrogram, and blood flow, myocardial ischemia, 1261
heart muscle performance after viral myocarditis, 569
methionine metabolism in coronary artery disease, 1079
myocardial infarction and regional blood flow, 1359
QRS complex alterations during myocardial ischemia, 541
renin-angiotensin-aldosterone system, congestive failure, 1606
sodium-potassium ATPase and cardiac glycoside binding, effects of myocardial ischemia, 341
technetium-99m and thallium-201 scintigraphy, myocardial infarction, 1508
Cartilage
bovine nasal proteoglycan degradation by human leukocyte granule neutral proteases, 625
proteoglycan degradation by human leukocyte granule neutral proteases, enzyme penetration into rabbit articular cartilage, 615
Catabolism
and isomerization in vivo, albumin, 398
Catecholamine
β-adrenergic binding to (−)alprenolol, human lymphocytes, 149
Cellular immunity
skin test and blastogenic responses to *Sporotrichum schenkii*, 156
Cerebrospinal fluid
acidosis, response to carbon monoxide, 977
Cerebrotendinous xanthomatosis
cholic acid synthesis, 25-hydroxylation, 897
Charcot-Leyden crystal
protein, comparison with eosinophil basic protein, 633
Chediak-Higashi syndrome
correction of abnormal microtubule function and granule morphology with cholinergic agonists, 1239
Chemotaxis
serum properties, hereditary deficiency of C5, 1635
Chemotherapy
lymphoma patients, immune function, 1451
Chloride
permeability, superficial and juxtamedullary nephrons, proximal convoluted tubule, 818
Cholera
enterotoxin-induced intestinal secretion, effect of methylprednisolone, 1590
toxin, activation of liver adenylate cyclase, 450
toxin, stimulation of intestinal electrolyte transport, effect of aspirin, 916
Cholestasis
lipoprotein-X, relation to bile compounds, 1248
Cholesterol
biliary excretion, kinetic analysis, 473
effect on hepatic coenzyme A reductase, 1461
plasma turnover, three-pool model, hyperlipidemic humans, 137
Cholic acid
synthesis, 25-hydroxylation, 897
Chromatography
gas-liquid, diagnosis of anaerobic infections, 478
Chylomicron
formation, apoprotein B, human jejunal mucosa, 530
Circulation
glomerular, and ultrafiltration coefficient, effect of angiotensin II, 419
Coenzyme A reductase
3-hydroxy, 3-methylglutaryl, hepatic regulation, 1461
Cold storage
pancreatic islets, maintenance of insulin release, 47
Collagen
hydroxylysine-deficient, abnormal lysyl hydroxylase in skin fibroblasts, 83
polymorphism, idiopathic chronic pulmonary fibrosis, 1498
types I and III, synthesis by rabbit and human lung cells in culture, 102
Collecting ducts
medullary, postobstructive diuresis, 1564
Colon
adenocarcinoma, cyclic AMP and cyclic GMP, 641
human, degradation of ABH blood group antigens, enteric bacterial enzymes, 63
human, degradation of ABH blood group antigens, gene control of enteric bacterial density, 74
soluble carbohydrate metabolism, 1158
Complement
C1q binding, immune complexes in rheumatoid arthritis, 1308
C3b inactivator, rheumatic disease, 1554
C5-9 complex, formation and binding of by platelets, 203
C8 deficiency, *Neisseria gonorrhoeae* bactericidal activity, 283
fifth component, hereditary deficiency, immunochemical and family studies, 1626
fifth component, hereditary deficiency, serum properties, 1635
homozygous C3 deficiency, role of C3 in antibody production, $\overline{C1s}$-induced vasopermeability, and cobra venom-induced hemolysis, 222
receptor and immunoglobulin-bearing lymphocytes, same population in human peripheral blood, 53
receptors, Raji cells, radioimmunoassay for human sera immune complexes, 169
Congestive failure
renin-angiotensin-aldosterone system, 1606
Coronary artery disease
methionine metabolism, 1079

Corticoid
mineralo-, agonist activity, nonsteroidal anti-inflammatory drugs, sodium retention, 1
Cortisol
and growth hormone secretion during sleep, suppression by cyproheptadine, 1393
Crystal
Charcot-Leyden protein, comparison with eosinophil basic protein, 633
Cyproheptadine
suppression of growth hormone and cortisol secretion during sleep, 1393
Cyst
formation, diphenylamine-exposed kidney, 796
Cytotoxicity
effector cells, normal human bone marrow lymphocytes, 826
Cytotoxin
antigen, pathogenesis of *Shigella* diarrhea, 194

D

Dexamethasone
effect on erythropoiesis, 57
Dextran
neutral, permeability of glomerular capillary wall, glomerulonephritis, 1272
sulfate, permeability of glomerular capillary wall, glomerulonephritis, 1287
Diabetes
mellitus, effect of dietary protein on splanchnic and leg metabolism, 987
mellitus, role for alpha adrenergic receptors in abnormal insulin secretion, 791
mellitus, suppression of cell-mediated immunologic responses, 362
streptozotocin, liver retention and degradation of insulin, 885
streptozotocin, serum lipoproteins and apolipoproteins, 714
tissue culture of human islets of Langerhans, 1295
Diaminodiphenylsulfone
effect on spectrofluorescent detection of in vivo red cell lipid peroxidation, 1302
Diamond-Blackfan syndrome
congenital hypoplastic anemia, erythroid colony growth, 673
Diarrhea
Shigella dysenteriae, serum anti-cytotoxin antibody response, 194
Diet
phosphate intake, renal adaptation, effect of thyroparathyroidectomy, 264
phosphorus, role on renal phosphate reabsorption, effect of thyroparathyroidectomy, 867
protein, effect on splanchnic and leg metabolism, diabetes mellitus, 987
Dihydrotestosterone
binding by fibroblasts, hereditary male pseudohermaphroditism, 1342
Diphenylamine
effect on kidney, nephron cyst formation, 796
Diuresis
postobstructive, cross-circulation of natriuretic factors, 380
postobstructive, role of medullary collecting ducts, 1564
DNA
anti-, antibody detection using synthetic antigens, 1330
circulating, degradation by extracorporeal nuclease, 1201
renal incorporation of thymidine, effect of uninephrectomy, 94

E

Ehlers-Danlos syndrome
hydroxylysine-deficient collagen, abnormal lysyl hydroxylase in skin fibroblasts, 83
Electrocardiogram
myocardial ischemia, effects of isoproterenol, 1261
QRS complex alterations during myocardial ischemia, 541
Electrolyte
transport, intestinal, stimulated by cholera toxin, effect of aspirin, 916
Endothelium
intact, aortic intima-media, 650
Energy
metabolism, total parenteral nutrition, comparison of lipid and glucose, 125
Enterotoxin
cholera, intestinal secretion, effects of methylprednisolone, 1590
Enzyme(s)
adenosine deaminase, chronic lymphocytic leukemia, B and T lymphocytes, 756
adenosine deaminase deficiency, erythroycte purine nucleoside metabolism, 1025
adenosine deaminase, inhibition of lymphocyte blastogenesis, 274
arylsulfatase B, human lung, interaction with slow-reacting substance of anaphylaxis, 738
ATPase, sodium-potassium activated, bile salt-independent bile flow, liver plasma membranes, effect of thyroid hormone, 1009
ATPase, sodium-potassium activated, cholera enterotoxin-induced intestinal secretion, effects of methylprednisolone, 1590
ATPase, sodium-potassium activated, myocardial, cardiac glycoside binding, effects of ischemia, 341
ATPase, sodium-potassium activated, and sodium-dependent respiration, skeletal muscle, thyroid thermogenesis, 368
and binding activities on separate molecular regions, human Hageman factor, 852
enteric bacterial, degradation of ABH blood group antigens, 63
enteric bacterial, degradation of ABH blood group antigens, effect of human gene interaction, 74
galactosamine-6-sulfate sulfatase, absence in Morquio disease, 1036
3-hydroxy, 3-methylglutaryl coenzyme A reductase, hepatic regulation, 1461
hypoxanthine phosphoribosyltransferase, fibroblasts, X-linked hyperuricemia, 1600
lysyl hydroxylase, abnormal properties of, skin fibroblasts in hydroxylysine-deficient collagen syndrome, 83
nuclease, extracorporeal, degradation of circulating DNA, 1201
phospholipase C, effect on human platelets, 1419
phospholipase D isolation from human eosinophils, 1173
proteases, human leukocyte granule neutral, degradation of bovine nasal cartilage proteoglycan, 625
proteases, human leukocyte granule neutral, degradation of cartilage proteoglycan, enzyme penetration into rabbit articular cartilage, 615
protein kinase and cyclic AMP, renal cortex, hormonal control, 1442
RNA polymerases, splenic nuclear, sequential activation by erythropoietin, 20
Eosinophil
basic protein, comparison with Charcot-Leyden crystal protein, 633
human phospholipase D isolation, 1173
Epinephrine
infusion, von Willebrand's disease, 1618
Erythrocyte
lipid peroxidation in vivo, spectrofluorescent detection, diaminodiphenylsulfone treatment, 1302
purine nucleoside metabolism, adeno-

sine deaminase deficiency and severe combined immunodeficiency, 1025
sheep, and human lymphocytes, rosette formation, inhibition by glycopeptides, 1068
Erythropoiesis
effect of dexamethasone, 57
erythroid colony growth, congenital hypoplastic anemia, 673
Erythropoietin
sequential activation of splenic nuclear RNA polymerases, 20
Esophagus
lower sphincter, action of pentagastrin, 1644
lower sphincter pressure, role of gastrin, 291
Estradiol
and prostatic hypertrophy, 1093
Estrogen
effect on gonadotropin secretion, polycystic ovary syndrome, 1320
effect on translation of ovalbumin mRNA in *Xenopus laevis* oocytes, 576
Ethanol
effect on splanchnic metabolism of free fatty acids, amino acids, and carbohydrates, 329
Exercise
glucagon and insulin regulation of glucose utilization during, 245

F

Factor
antihemophilic, covalently linked subunit structure, 925
antihemophilic, von Willebrand's disease, effects of epinephrine, 1618
herpes gestationis, characterization of, 1434
herpes gestationis, immunofluorescence, 1426
natriuretic, cross-circulation of, postobstructive diuresis, 380
plasma, role in augmented granulocyte adherence by inflammation, 1098
Fanconi syndrome
membrane permeability as cause of transport defects, 1181
Fasting
effect on muscle amino acid metabolism, 444
effect on splanchnic metabolism of free fatty acids, amino acids, and carbohydrates, 329
Fat cell
hormone sensitivity, effects of growth, cell size, and aging on adenylate cyclase, 161
Fetuin
glycopeptide inhibition of rossette formation between human lymphocytes and sheep erythrocytes, 1068
Fetus
effect of glucagon on heart contraction, adenylate cyclase, and cyclic AMP, 551
Fibrinogen
Paris I, structural abnormality, 782
Fibroblasts
rabbit and human lung, synthesis of types I and III collagen, 102
Fibrosis
idiopathic chronic pulmonary, collagen polymorphism, 1498
Filtration
coefficient, and glomerular circulation, effects of angiotensin II, 419
Fluid volume
extravascular, lung, measurement with oxygen-15, 706
Free fatty acids
amino acid, and carbohydrates, effects of fasting and ethanol on splanchnic metabolism, 329
Fungus
infections, suppressor thymus-derived lymphocytes, 319

G

Galactosamine-6-sulfate sulfatase
absence in Morquio disease, 1036
Gall bladder
kinetic analysis of biliary lipid excretion, 473
Gastric acid
stimulation by big and little gastrins, human duodenal ulcer, 1125
Gastrins
big and little, clearance and acid-stimulating action, human duodenal ulcer, 1125
determinant of basal lower esophageal sphincter pressure, 291
Gene
control of enteric bacterial density, degradation of ABH blood group antigens, human colon, 74
Globulin
thyroxine-binding, metabolism in inherited deficiency and excess of, 485
Glomerulonephritis
acute proliferative, functional adaptation of nephrons, 1575
glomerular basement membrane antibody-mediated, 351
permeability of glomerular capillary wall to dextran sulfate, 1287
permeability of glomerular capillary wall to neutral dextran, 1272
renal excretion of Zn-α_2-glycoprotein, comparison with albumin and retinol-binding protein, 945
Glomerulus
circulation and ultrafiltration coefficient, effects of angiotensin II, 419
Glucagon
effect on cyclic AMP and protein kinase, renal cortex, 1442
effect on fetal heart contraction, adenylate cyclase, and cyclic AMP, 551
and growth hormone, effects of physiologic levels on carbohydrate and lipid metabolism, 875
insulin, and amino acids, anephric patients, effect of hemodialysis, 1403
and insulin regulation of glucose utilization during exercise, 245
metabolism and action, effect of uremia and hemodialysis, 722
reduced sensitivity of hepatic adenylate cyclase-cyclic AMP by continuous stimulation, 435
response to hypoglycemia, effect of sympathectomy, 522
Glucocorticosteroid
effect of dexamethasone on erythropoiesis, 57
Gluconeogenesis
effect of fasting on muscle amino acid metabolism, 444
Glucose
anomeric-specific, and insulin release, 1083
interaction with cyclic AMP, somatostatin, and sulfonylureas on leucine incorporation into insulin, 230
metabolism, colon, 1158
metabolism, comparison with lipid, total parenteral nutrition, 125
metabolism, large and small adipocytes, insulin action, 1523
transport and oxidation, insulin binding, isolated adipocytes, effects of obesity, 842
utilization during exercise, regulation by insulin and glucagon, 245
Glycopeptide
inhibition of rosette formation between human lymphocytes and sheep erythrocytes, 1068
Glycoproteins
platelet membrane, role in ristocetin-induced aggregation, 112
Zn-α_2-, renal excretion of, comparison with albumin and retinol-binding protein, 945
Glycosidases
enteric bacterial, degradation of ABH blood group antigens, 63
enteric bacterial, degradation of ABH blood group antigens, effect of human gene interaction, 74
Glycoside
binding, cardiac, sodium-potassium

ATPase, effects of myocardial ischemia, 341
Glycosylation
hemoglobin A_{1C} biosynthesis, 1652
IgG heavy chain, failure of in agammaglobulinemia, 1386
GMP
cyclic, correction of abnormal microtubule function and granule morphology, Chediak-Higashi syndrome, 1239
cyclic, and cyclic AMP, colon adenocarcinoma, 641
Gonadotropin
secretion, polycystic ovary syndrome, 1320
Gonorrhea
complement C8 deficiency, bactericidal activity, 283
Gout
and purine overproduction, phosphoribosylpyrophosphate and ribose-5-phosphate, 308
Granule
abnormal morphology, Chediak-Higashi syndrome, correction with cholinergic agonists, 1239
Granulocyte(s)
adherence, effect of inflammation, mediation by plasma factor, 1098
and monocytes, comparison of metabolic response to phagocytosis, 1352
particles, manganese-dependent NADPH oxidation, 1059
release of hydrogen peroxide, modulator of platelet reactions, 955
Granuloma
formation, dermal reactivity, allograft rejection, suppression of cell-mediated immunologic responses, diabetes mellitus, 362
Growth
effect on hormone-sensitive fat cell adenylate cyclase, 161
Growth hormone
and cortisol secretion during sleep, suppression by cyproheptadine, 1393
and glucagon, effects of physiologic levels on carbohydrate and lipid metabolism, 875
Guanidinosuccinic acid
synthesis by liver, 807
Guanine nucleotide
effect on hormone-sensitive fat cell adenylate cyclase, 161

H

Hageman factor
enzymatic and binding activities on separate molecular regions, 852
Hanssen technique
renal mechanisms of sodium retention after bile duct ligation, 408
Heart
muscle performance after viral myocarditis, 569
Hematology
antihemophilic factor, covalently linked subunit structure, 925
comparison of metabolic responses by granulocytes and monocytes to phagocytosis, 1352
congenital hypoplastic anemia, erythroid colony growth, 673
effect of dexamethasone on erythropoiesis, 57
effect of phospholipase C on human platelets, 1419
epinephrine infusion, von Willebrand's disease, 1618
failure of IgG heavy chain glycosylation, agammaglobulinemia, 1386
Hageman factor, enzymatic and binding activities on separate molecular regions, 852
hemin-controlled repressor in reticulocytes, hypochromic anemias, 594
hemoglobin A_{1C} biosynthesis, slow glycosylation, 1652
hemoglobin McKees Rocks, human "nonsense" mutation, short β chain, 772
hereditary deficiency of C5, immunochemical and family studies, 1626
hereditary deficiency of C5, serum properties, 1635
hydrogen peroxide release by granulocytes, modulator of platelet reactions, 955
immunoglobulin-bearing and complement-receptor lymphocytes, same population in human peripheral blood, 53
phospholipase D isolation from human eosinophils, 1173
platelet formation and binding of C5-9 complex of human complement, 203
role of platelet membrane glycoproteins in ristocetin-induced aggregation, Bernard-Soulier syndrome and von Willebrand's disease, 112
role of transcobalamin II in plasma transport of vitamin B_{12}, 27
rosette formation between human lymphocytes and sheep erythrocytes, inhibition by glycopeptides, 1068
spectrofluorescent detection of in vivo red cell lipid peroxidation, diaminodiphenylsulfone treatment, 1302
structural abnormality of fibrinogen Paris I, 782
Hemin
control of translational repressor, reticulocytes, 594
Hemodialysis
effect on glucagon, insulin, and amino acids, anephric patients, 1403
hypotension, adrenergic regulation of blood pressure, chronic renal failure, 1190
and uremia, effect on glucagon metabolism and action, 722
Hemodynamics
adrenergic regulation of blood pressure, chronic renal failure, 1190
mechanism of intestinal secretion by elevated venous pressure, 904
Hemoglobin A_{1C}
biosynthesis, slow glycosylation, 1652
Hemoglobin McKees Rocks
human "nonsense" mutation, $\alpha_2\beta_2^{145\ Tyr\rightarrow Term}$, 772
Hemoglobinuria
paroxysmal nocturnal, platelet formation and binding of C5-9 complex of human complement, 203
Hepatectomy
effect on 25-hydroxyvitamin D_3 synthesis, 1213
Hepatitis B
virus infection, T lymphocyte rosette dysfunction, 1227
Herpes gestationis
characterization of HG factor, 1434
immunofluorescence, HG factor, 1426
Histamine
defective release, chronic urticaria, 1369
and prostaglandin action on cyclic AMP metabolism, gastric mucosa, 1548
receptor-bearing lymphocytes, modulation of cellular-immune responses, 1051
release by bronchial cells, airway reactivity to carbocholine, asthma in rhesus monkeys, 586
release, effect of immunotherapy in ragweed hayfever, 1378
release, inhibition by IgA and IgG antiragweed antibodies, nasal secretions, 1041
Hodgkin's disease
treated with chemotherapy or radiation therapy, immune function, 1451
Homocystinuria
coronary artery disease, methionine metabolism, 1079
Hormone(s)
androgen resistance, hereditary male pseudohermaphroditism, dihydrotestosterone binding by fibroblasts, 1342
androstanediol induction of prostatic hypertrophy, 1093
antidiuretic, distribution, blood transport, and degradation, 1109
cortisol and growth hormone secretion during sleep, suppression by cyproheptadine, 1393

epinephrine infusion, von Willebrand's disease, 1618
estrogen, effect on translation of ovalbumin mRNA in *Xenopus laevis* oocytes, 576
glucagon, effect on fetal heart contraction, adenylate cyclase, and cyclic AMP, 551
glucagon and growth hormone, effects of physiologic levels on carbohydrate and lipid metabolism, 875
glucagon, insulin, and amino acids, anephric patients, effect of hemodialysis, 1403
glucagon and insulin regulation of glucose utilization during exercise, 245
glucagon metabolism and action, effect of uremia and hemodialysis, 722
glucagon, reduced sensitivity of hepatic adenlyate cyclase-cylic AMP by continuous stimulation, 435
glucagon response to hypoglycemia, effect of sympathectomy, 522
gonadotropin secretion, polycystic ovary syndrome, 1320
insulin, abnormal secretion in diabetes mellitus, role for alpha adrenergic receptors, 791
insulin action on large and small adipocytes, 1523
insulin binding, glucose transport and oxidation, isolated adipocytes, effects of obesity, 842
insulin, decreased binding to adipocytes and monocytes, obesity, 1165
insulin degradation, inhibition by nonsuppressible insulin-like activity, 1089
insulin degradation inhibitor, nonsuppressible insulin-like activity, 526
insulin and proinsulin synthesis, interaction of glucose, cyclic AMP, somatostatin and sulfonylureas on leucine incorporation, 230
insulin release, cold storage of pancreatic islets, 47
insulin release, glucose anomeric-specific, 1083
insulin removal by liver, obese-hyperglycemic mice, 1117
insulin retention and degradation by liver, streptozotocin diabetes, 885
insulin secretion and phosphoinositide metabolism, isolated pancreatic islets, 684
parathyroid, glucagon, and isoproterenol, effects on cyclic AMP and protein kinase, renal cortex, 1442
parathyroid, independent calcium effect on nephron phosphate transport, 256
parathyroid, metabolism and biological activity in renal cortical membrane, 8
parathyroid, secretion in vivo, calcium-independent nonsuppressible component, 678
parathyroid, and vitamin D regulation of urinary phosphate, role of cyclic AMP, 559
thyroid, effect on bile salt-independent bile canalicular flow and sodium-potassium ATPase, liver plasma membranes, 1009
thyroid, induction of altered thyroid response to thyrotropin, short-loop feedback, 745
thyroid-stimulating, induced refractoriness of thyroid cyclic AMP, 1132

Hydrogen
plasma response, chronic hypocapnia, regulation of acid-base equilibrium, role of kidney, 1483

Hydrogen peroxide
formation by neutrophils, immune complex disease, 836
release by granulocytes, modulator of platelet reactions, 955

1α-Hydroxycholecalciferol
effect on jejunal and ileal calcium absorption, chronic renal disease, 861

Hydroxylase
lysyl, abnormal properties of, skin fibroblasts in hydroxylysine-deficient collagen syndrome, 83

25-Hydroxylation
cholic acid biosynthesis, 897

Hydroxylysine
deficiency in collagen, abnormal lysl hydroxylase in skin fibroblasts, 83

7-Hydroxymethotrexate
urinary metabolite of methotrexate, 534

25-Hydroxyvitamin D_3
effect of hepatectomy, 1213

Hypercalciuria
absorptive, magnesium absorption by small intestine, 1412

Hypercapnia
and inspiratory airflow resistance, effects on diaphragmatic blood flow and energy expenditure, 661

Hyperglycemia
and obesity, insulin removal by liver, 1117

Hyperlipidemia
three-pool model of plasma cholesterol turnover, 137

Hyperuricemia
X-linked, fibroblasts, hypoxanthine phosphoribosyltransferace, 1600

Hypocapnia
chronic, regulation of acid-base equilibrium, role of kidney, 1483

Hypoglycemia
glucagon response to, effect of sympathectomy, 522

Hypophosphatemia
reversible changes of muscle cells, 1019

Hypotension
hemodialysis, adrenergic regulation of blood pressure, chronic renal failure, 1190

Hypoxanthine phosphoribosyltransferase
fibroblasts, X-linked hyperuricemia, 1600

I

Immune complex
circulating and intraarticular, rheumatoid arthritis, 1308
Raji cell radioimmunoassay, human sera, 169

Immune complex disease
toxic oxygen by-products, formation by neutrophils, 836

Immune response
cellular, effect of histamine receptor-bearing lymphocytes, 1051
lymphoma patients treated with chemotherapy or radiation therapy, 1451

Immunodeficiency
adenosine deaminase inhibition of lymphocyte blastogenesis, 274
severe combined, adenosine deaminase deficiency, erythrocyte purine nucleoside metabolism, 1025

Immunofluorescence
properdin levels in dermal-epidermal junction and serum, systemic lupus erythematosus, 212

Immunoglobulin G
failure of heavy chain glycosylation, agammaglobulinemia, 1386

Immunoglobulins
IgA and IgG anti-ragweed antibodies, nasal secretions, inhibition of histamine release, 1041
IgE and IgG anti-ragweed antibodies, effect of immunotherapy on humoral and cellular responses in hayfever, 1378
surface, activated human thymus-derived lymphocytes, 762
surface-bearing and complement-receptor lymphocytes, same poplation in human peripheral blood, 53

Immunology
antigen heterogeneity, B and T lymphocytes, 390
brain-reactive lymphocytotoxic antibodies, systemic lupus erythematosus, 509
C3b inactivator, rheumatic diseases, 1554

cellular-immune responses, effect of histamine receptor-bearing lymphocytes, 1051
complement C8 deficiency, *Neisseria gonorrhoeae* bactericidal activity, 283
detection of anti-DNA antibody using synthetic antigens, binding of poly(deoxyadenylate-deoxythymidylate), 1330
effect of immunotherapy on humoral and cellular responses, ragweed hayfever, 1378
glomerular basement membrane antibody-mediated glomerulonephritis, 351
hereditary deficiency of C5, immunochemical and family studies, 1626
hereditary deficiency of C5, serum properties, 1635
herpes gestationis, characterization of HG factor, 1434
herpes gestationis factor, 1426
homozygous C3 deficiency, role of C3 in antibody production, $\overline{C1s}$-induced vasopermeability, and cobra venom-induced hemolysis, 222
IgA and IgG anti-ragweed antibodies in nasal secretions, inhibition of histamine release, 1041
lung arylsulfatase B interaction with slow-reacting substance of anaphylaxis, 738
mixed lymphocyte cultures, rheumatoid arthritis, 1148
placental transcortin, localized immune response, 1000
rosette formation between human lymphocytes and sheep erythrocytes, inhibition by glycopeptides, 1068
skin test and blastogenic responses to *Sporotrichum schenkii*, 156
subpopulations of T cells, fractionation using anti-T-cell antibodies, systemic lupus erythematosus, 604
suppression of cell-mediated responses, diabetes mellitus, 362
suppressor thymus-derived lymphocytes, fungal infections, 319
surface immunoglobulin, activated human thymus-derived lymphocytes, 762
T- and B-cell tissue infiltration, primary and metastatic cancer, 1471
T lymphocyte rosette dysfunction, hepatitis B virus infections, 1227

Infection
anaerobic bacteria, diagnosis by direct gas-liquid chromatography, 478
fungal, suppressor thymus-derived lymphocytes, 319
hepatitis B virus, T lymphocyte rosette dysfunction, 1227
Neisseria gonorrhoeae, bactericidal activity, complement C8 deficiency, 283
Shigella dysenteriae, pathogenesis of diarrhea, serum anticytotoxin response, 194
viral, alveolar macrophages, intracellular killing defect of *Staphylococcus aureus*, 1533

Inflammation
augmented granulocyte adherence, mediation by plasma factor, 1098
immune complex disease, toxic byproduct formation by neutrophils, 836
nonsteroidal drugs against, mineralocorticoid agonist activity, sodium retention, 1

Inspiration
airflow resistance and hypercapnia, effects on diaphragmatic blood flow and energy expenditure, 661

Insulin
abnormal secretion in diabetes mellitus, role for alpha adrenergic receptors, 791
action on large and small adipocytes, 1523
binding, glucose transport and oxidation, isolated adipocytes, effects of obesity, 842
decreased binding to adipocytes and monocytes in obesity, 1165
degradation, inhibition by nonsuppressible insulin-like activity, 1089
degradation inhibitor, nonsuppressible insulin-like activity, 526
glucagon, and amino acids, anephric patients, effect of hemodialysis, 1403
and glucagon regulation of glucose utilization during exercise, 245
interaction with glucagon and growth hormone, carbohydrate and lipid metabolism, 875
and proinsulin synthesis, interaction of glucose, cyclic AMP, somatostatin, and sulfonylureas on leucine incorporation, 230
release, cold storage of pancreatic islets, 47
release, glucose anomeric-specific, 1083
removal by liver, obese-hyperglycemic mice, 1117
retention and degradation by liver, streptozotocin diabetes, 885
secretion and phosphoinositide metabolism, isolated pancreatic islets, 684

Intestine
calcium absorption, effect of vitamin D_3 analogues, 1540
cholera enterotoxin-induced secretion, effects of methylprednisolone, 1590
colon, soluble carbohydrate metabolism, 1158
duodenal ulcer, clearance and acid-stimulating action of big and little gastrins, 1125
electrolyte transport stimulated by cholera toxin, effect of aspirin, 916
jejunal and ileal, calcium absorption, chronic renal disease, effect of 1α-hydroxycholecalciferol, 861
jejunal mucosa, apoprotein B, 530
mechanism of secretion by elevated venous pressure, 904
small, magnesium absorption, chronic renal disease, and absorptive hypercalciuria, 1412

Intima-media
aortic, with intact endothelium, 650

Ischemia
myocardial, effects of isoproterenol on ventricular function, electrogram, and blood flow, 1261
myocardial, effects on regional blood flow, 1359
myocardial, effects on sodium-potassium ATPase and cardiac glycoside bindings, 341
myocardial, QRS complex alterations, 541
myocardial, technetium-99m and thallium-201 scintigraphy, 1508

Islets
pancreatic, cold storage, maintenance of insulin release, 47

Islets of Langerhans
maintenance in tissue culture, 1295

Isomerization
and catabolism in vivo, albumin, 398

Isoproterenol
effects on cyclic AMP and protein kinase, renal cortex, 1442
effects on ventricular function, electrogram, and blood flow, myocardial ischemia, 1261

K

Kidney
acute proliferative glomerulonephritis, functional adaptation of nephrons, 1575
blood flow, effect of 1-Sar, 8-Ala analogue on angiotensin II receptors, 39
chronic renal disease, adrenergic regulation of blood pressure, 1190

chronic renal disease, jejunal and ileal calcium absorption, effect of 1α-hydroxycholecalciferol, 861
chronic renal disease, magnesium absorption by small intestine, 1412
cortical membrane, adenylyl cyclase stimulation by parathyroid hormone, 8
cross-circulation of natriuretic factors, postobstructive diuresis, 380
effect of β-adrenergic blockade on renal response to renal nerve stimulation, 459
effect of angiotensin II on glomerular microcirculation and ultrafiltration coefficient, 419
effect of diphenylamine on nephron cyst formation, 796
effect of renal sympathetic nerve stimulation on proximal water and sodium reabsorption, 1104
enhanced distal tubule sodium reabsorption, chronic salt depletion, 1142
glomerular basement membrane antibody-mediated glomerulonephritis, 351
hormonal control of cyclic AMP and protein kinase, renal cortex, 1442
insulin, glucagon, and amino acids, anephric subjects, effects of hemodialysis, 1403
intrinsic differences in superficial and juxtamedullary nephrons of proximal convoluted tubule, 818
nephron phosphate transport, parathyroid hormone-independent calcium effect, 256
parathyroid hormone and vitamin D regulation of urinary phosphate, role of cyclic AMP, 559
permeability of glomerular capillary wall to dextran sulfate, in glomerulonephritis, 1287
permeability of glomerular capillary wall to neutral dextran, in glomerulonephritis, 1272
proximal tubule bicarbonate reabsorption during Ringer and albumin infusions, 1490
renal adaptation to dietary phosphate intake, effect of thyroparathyroidectomy, 264
renal excretion of Zn-α_2-glycoprotein, comparison with albumin and retinol-binding protein, 945
renal mechanisms of sodium retention after bile duct ligation, 408
renal phosphate reabsorption, effects of dietary phosphorus and thyroparathyroidectomy, 867
role of medullary collecting ducts, postobstructive diuresis, 1564
role in regulation of acid-base equilibrium, chronic hypocapnia, 1483
sodium excretion, effect of inhibition of prostaglandin, 517
stimulation of thymidine incorporation into renal DNA after uninephrectomy, 94
transepithelial transport of taurine, localization of membrane defect, 183

L

Lesch-Nyhan syndrome
fibroblasts, hypoxanthine phosphoribosyltransferase, 1600
Leucine
incorporation into insulin, interaction of glucose, cyclic AMP, somatostatin, and sulfonylureas, 230
Leukemia
chronic lymphatic, antigen heterogeneity, B and T lymphocytes, 390
chronic lymphocytic, adenosine deaminase, T and B lymphocytes, 756
chronic myelogenous, interactions of leukocyte actin, myosin, and actin-binding protein, 964
Leukocytes
chronic myelogenous leukemia, interactions of actin, myosin, and actin-binding protein, 964
human, granule neutral proteases, degradation of bovine nasal cartilage, 625
human, granule neutral proteases, degradation of cartilage proteoglycan, enzyme penetration into rabbit articular cartilage, 615
Lipid
biliary excretion, kinetic analysis, 473
and carbohydrate metabolism, effects of physiologic levels of glucagon and growth hormone, 875
metabolism, comparison with glucose, total parenteral nutrition, 125
peroxidation in vivo, red cells, spectrofluorescence detection, diaminodiphenylsulfone treatment, 1302
Lipoproteins
and apolipoproteins, streptozotocin-induced diabetes, 714
Lipoprotein-X
relationship to bile compounds, 1248
Liver
adenylate cyclase activation by cholera toxin, 450
adenylate cyclase-cyclic AMP, reduced sensitivity to glucagon by continuous stimulation, 435
3-hydroxy, 3-methylglutaryl coenzyme A reductase, 1461
25-hydroxylation of vitamin D, 1213
insulin degradation, inhibition by serum nonsuppressible insulin-like activity, 526
plasma membranes, effect of thyroid hormone on bile salt-independent canalicular flow and ATPase, 1009
retention and degradation of insulin, streptozotocin diabetes, 885
surface membrane, bile acid receptor, 496
synthesis of guanidinosuccinic acid, 807
Lung
arylsulfatase B, interaction with slow-reacting substance of anaphylaxis, 738
bacterial clearnace, 811
collagen polymorphism, chronic fibrosis, 1498
extravascular fluid volume, measurement with oxygen-15, 706
rabbit and human cells in culture, synthesis of types I and III colgen, 102
virus-infected alveolar macrophages, intracellular killing defect of *Staphylococcus aureus*, 1533
Lupus erythematosus
systemic, brain-reactive lymphocytotoxic antibodies, 509
systemic, detection of anti-DNA antibody using synthetic antigens, 1330
systemic, properdin in serum and dermal-epidermal junction, 212
systemic, subpopulations of T cells, fractionation using anti-T-cell antibodies, 604
Lymphocytes
B and T, antigen heterogeneity, 390
B and T cell infiltration, primary and metastatic cancer, 1471
B and T, chronic lymphocytic leukemia, adenosine deaminase, 756
blastogenesis, inhibition by adenosine deaminase, 274
bone marrow, normal human, cytotoxic effector cells, 826
histamine receptor-bearing, modulation of cellular-immune responses, 1051
human, and sheep erythrocytes, rosette formation, inhibition by glycopeptides, 1068
identification of β-adrenergic receptors by (−)alprenolol binding, 149
immunoglobulin-bearing and complement-receptor, same population in human peripheral blood, 53
mixed cultures, rheumatoid arthritis, 1148
thymus-derived, rosette dysfunction, hepatitis B virus infections, 1227

thymus-derived suppressor cells, fungal infection, 319
thymus-derived, surface immunoglobulin, 762
Lymphocytotoxicity
brain-reactive antibodies, systemic lupus erythematosus, 509
Lymphoma
patients treated with chemotherapy or radiation therapy, immune function, 1451

M

Macrophages
alveolar, virus-infected, intracellular killing defect of *Staphylococcus aureus*, 1533
Magnesium
and abnormal pyrophosphate metabolism, extraosseous calcification, uremia, 692
absorption, small intestine, chronic renal disease, and absorptive hypercalciuria, 1412
and bone pyrophosphate, extraosseous calcification, uremia, 700
Manganese
role in NADPH oxidation by granulocyte particles, 1059
Membrane
defect in transepithelial transport of taurine, 183
glomerular basement, antibody-mediated glomerulonephritis, 351
liver surface, bile acid receptor, 496
permeability, cause of transport defects, Fanconi syndrome, 1181
platelet, location of phosphatidylethanolamine and phosphatidylserine, 1221
potential, skeletal muscle, phosphorus deficiency, 1019
renal cortical, adenylyl cyclase stimulation by parathyroid hormone, 8
Methionine
metabolism in coronary artery disease, 1079
Methotrexate
metabolism, urinary 7-hydroxymethotrexate, 534
Methylprednisolone
effect on cholera enterotoxin-induced intestinal secretion, 1590
Microtubule
abnormal function, Chediak-Higashi syndrome, correction with cholinergic agonists, 1239
Mineralocorticoid
agonist activity, nonsteroidal anti-inflammatory drugs, sodium retention, 1
Mitogen
activated T lymphocytes, surface immunoglobulin, 762
Monocytes
and adipocytes, obesity, decreased insulin binding, 1165
and granulocytes, comparison of metabolic response to phagocytosis, 1352
Morquio disease
absence of galactosamine-6-sulfate sulfatase, 1036
Mucopolysaccharidosis IV
absence of galactosamine-6-sulfate sulfatase, 1036
Mucosa
jejunal, apoprotein B, 530
Muscle
composition and function, reversible changes in phosphorus deficiency, 1019
skeletal, effect of fasting on amino acid metabolism, 444
skeletal, sodium-dependent respiration and sodium-potassium ATPase, thyroid thermogenesis, 368
Myocarditis
viral, effect on heart muscle performance, 569
Myocardium
ischemic, effects of isoproterenol on ventricular function, electrogram, and blood flow, 1261
ischemic, QRS complex alterations, 541
ischemic, sodium-potassium ATPase and cardiac glycoside binding, 341
ischemic, technetium-99m and thallium-201 scintigraphy, 1508
local effects of acute cellular injury on regional blood flow, 1359
Myosin
interactions with actin and actin-binding protein, chronic myelogenous leukemia leukocytes, 964

N

NAD
activation of liver adenylate cyclase by cholera toxin, 450
NADPH
oxidation, manganese-dependent, granulocyte particles, 1059
Neisseria gonorrhoeae
bactericidal activity, complement C8 deficiency, 283
Nephron
cyst formation, diphenylamine-exposed kidney, 796
functional adaptation, acute proliferative glomerulonephritis, 1575
phosphate transport, parathyroid hormone-independent calcium effect, 256
superficial and juxtamedullary, proximal convoluted tubule, intrinsic differences, 818
Nervous system
symphatetic, regulation of blood pressure, chronic renal failure, 1190
sympathetic, role in glucagon response to hypoglycemia, 522
sympathetic, role in renal water and sodium reabsorption, 1104
Neutrophils
toxic oxygen by-product formation, immune complex disease, 836
Nitrogen
balance, total parenteral nutrition, comparison of lipid and glucose, 125
Nitrogen dioxide
bronchial sensitivity to, asthma, 301
Nose
secretion, IgA and IgG anti-ragweed antibodies, inhibition of histamine release, 1041
Nuclease
extracorporeal, degradation of circulating DNA, 1201
Nucleosides
purine metabolism, erythrocytes, adenosine deaminase deficiency and severe combined immunodeficiency, 1025
Nutrition
total parenteral, comparison of lipid and glucose metabolism, 125

O

Obesity
decreased insulin binding to adipocytes and monocytes, 1165
effects on insulin binding, glucose transport and oxidation, isolated adipocytes, 842
and hyperglycemia, insulin removal by liver, 1117
Oocytes
Xenopus laevis, translation of ovalbumin mRNA, effect of estrogen, 576
Ornithine decarboxylase
thyroid response to thyrotropin, role of thyroid hormones, 745
Osteogenic sarcoma
methotrexate metabolism, urinary 7-hydroxymethotrexate, 534
Ovalbumin
mRNA, translation in *Xenopus laevis* oocytes, effect of estrogen, 576
Ovary
polycystic syndrome, gonadotropin secretion, 1320
Oxygen
affinity, Hemoglobin McKees Rocks, 772
consumption and diaphragmatic blood flow, effects of inspiratory

airflow resistance and hypercapnia, 661
toxic metabolite formation by neutrophils, immune complex disease, 836
Oxygen-15
extravascular fluid volume, lung, 706

P

Pancreas
cold storage of islets, maintenance of insulin release, 47
islet phosphoinositide metabolism and insulin secretion, 684
tissue culture of human islets of Langerhans, 1295
Pancreatectomy
glucagon and insulin regulation of glucose utilization during exercise, 245
Parathyroid hormone
effects on cyclic AMP and protein kinase, renal cortex, 1442
independent calcium effect on nephron phosphate transport, 256
metabolism and biological activity in renal cortical membrane, 8
secretion in vivo, calcium-independent nonsuppressible component, 678
and vitamin D regulation of urinary phosphate, role of cyclic AMP, 559
Pentagastrin
action on lower esophageal sphincter, 1644
Permeability
glomerular capillary wall to dextran sulfate, glomerulonephritis, 1287
glomerular capillary wall to neutral dextran, glomerulonephritis, 1272
glomerular, renal excretion of Zn-α_2-glycoprotein, comparison with albumin and retinol-binding protein, 945
membrane, cause of transport defects, Fanconi syndrome, 1181
Phagocytosis
comparison of metabolic response of granulocytes and monocytes to, 1352
Phenylbutazone
mineralocorticoid agonist activity, sodium retention, 1
Phosphate
renal adaptation to dietary intake of, effect of thyroparathyroidectomy, 264
renal reabsorption, effects of dietary phosphorus and thyroparathyroidectomy, 861
transport, nephron, parathyroid hormone-independent calcium effect, 256
urinary, regulation by parathyroid hormone and vitamin D, role of cyclic AMP, 559
Phosphatidyl ethanolamine
and posphatidyl serine, platelet plasma membrane, 1221
Phosphoinositide
metabolism and insulin secretion, isolated pancreatic islets, 684
Phospholipase C
effect on human platelets, 1419
Phospholipase D
isolation from human eosinophils, 1173
Phospholipids
biliary excretion, kinetic analysis, 473
Phosphoribosylpyrophosphate
and ribose-5-phosphate, fibroblasts from patients with gout and purine overproduction, 308
Phosphorus
deficiency, reversible changes of muscle cell, 1019
Placenta
pregnancy-associated plasma proteins, 466
transcortin, localized immune response, 1000
and uterine blood flow, effect of perfusion pressure, 938
Plasma
transport of vitamin B_{12}, role of transcobalamin II, 27
Platelet
aggregation, antihemophilic factor, covalently linked subunit structure, 925
effect of phospholipase C, 1419
formation and binding of C5-9 complex of human complement, 203
membrane glycoproteins, role in ristocetin-induced aggregation, 112
plasma membrane, location of phosphatidyl ethanolamine and phosphatidyl serine, 1221
reactions, modulation by granulocyte release of hydrogen peroxide, 955
release reaction, inhibition by vitamin E, 732
Pneumonia
lung bacterial clearance, 811
Polycystic ovary syndrome
gonadotropin secretion, 1320
Polymerases
RNA, splenic nuclear, sequential activation by erythropoietin, 20
Potassium
role in QRS complex alterations, myocardial ischemia, 541
Pregnancy
effect of perfusion pressure on uteroplacental blood flow, 938
herpes gestationis, characterization of HG factor, 1434
herpes gestationis, immunofluorescence, 1426
placenta plasma proteins, 466
Pressure
lower esophageal sphincter, and gastrin, 1644
lower esophageal sphincter, effect of pentagastrin, 291
perfusion, effect on uteroplacental blood flow, 938
venous, elevated, mechanism of intestinal secretion by, 904
Properdin
dermal-epidermal junction and serum, systemic lupus erythematosus, 212
pathway C3 convertase, rheumatic diseases, 1554
Propranolol
effect on renin response to renal nerve stimulation, 459
Prostaglandins
and histamine action on cyclic AMP metabolism, gastric mucosa, 1548
inhibition, effect on urinary sodium excretion, 517
Prostate
hypertrophy induced by androstanediol, 1093
Proteases
human leukocyte granule neutral, degradation of bovine nasal cartilage proteoglycan, 625
human leukocyte granule neutral, degradation of cartilage proteoglycan, enzyme penetration into rabbit articular cartilage, 615
Protein
actin-binding, interactions with actin and myosin, chronic myelogenous leukemia leukocytes, 964
Charcot-Leyden crystal and eosinophil basic, 633
dietary, effect on splanchnic and leg metabolism, diabetes mellitus, 987
pregnancy-associated, human placenta, 466
retinol-binding, renal excretion, comparison with Zn-α_2-glycoprotein, 945
Protein kinase
and cyclic AMP, renal cortex, hormonal control, 1442
Proteoglycan
cartilage, bovine nasal, degradation by human leukocyte granule neutral proteases, 625
cartilage, degradation by human leukocyte granule neutral proteases, enzyme penetration into rabbit articular cartilage, 615
Pseudohermaphroditism
hereditary male, androgen resistance, dihydrotestosterone binding by fibroblasts, 1342
Pulmonary
asthma, bronchial cell histamine re-

lease, airway reactivity to carbocholine, rhesus monkey, 586
asthma, bronchial sensitivity to nitrogen dioxide, 301
bacterial clearance, 811
idiopathic chronic fibrosis, collagen polymorphism, 1498
synthesis of types I and III collagen by rabbit and human lung cells in culture, 102
ventilatory response to carbon monoxide, 977
Purine
nucleoside metabolism, erythrocytes, adenosine deaminase deficiency and severe combined immunodeficiency, 1025
overproduction and gout, phosphoribosylpyrophosphate and ribose-5-phosphate in fibroblasts, 308
Pyrophosphate
bone, and extraosseous calcification, uremia, 700
metabolism, extraosseous calcification, uremia, 692

Q

QRS complex
alterations during myocardial ischemia, 541

R

Radiation therapy
lymphoma patients, immune function, 1451
Radioimmunoassay
apoprotein B, human jejunal mucosa, 530
circulating and intraarticular immune complexes, rheumatoid arthritis, 1308
parathyroid hormone secretion in vivo, calcium-independent nonsuppressible component, 678
Raji cells, human sera immune complexes, 169
Ragweed
hayfever, effect of immunotherapy on humoral and cellular responses, 1378
IgA and IgG antibodies in nasal secretions, inhibition of histamine release, 1041
Raji cell
radioimmunoassay, human sera immune complexes, 169
Receptors
α-adrenergic, role in abnormal insulin secretion, diabetes mellitus, 791
β-adrenergic, binding to (−)alprenolol, human lymphocytes, 149
bile acid, liver surface membrane, 496
complement, Raji cells, radioimmunoassay for human sera immune complexes, 169
Release reaction
platelet, inhibition by vitamin E, 732
Renin
angiotensin and aldosterone, congestive failure, 1606
response to renal nerve stimulation, effect of β-adrenergic blockade, 459
Renotropin
stimulation of thymidine incorporation into renal DNA after uninephrectomy, 94
Respiration
diaphragmatic blood flow and energy expenditure, effects of inspiratory airflow resistance and hypercapnia, 661
sodium-dependent, and sodium-potassium ATPase, skeletal muscle, thyroid thermogenesis, 368
Reticulocytes
hemin-controlled repressor, hypochromic anemias, 594
Rhesus monkey
asthma, bronchial cell histamine release, airway reactivity to carbocholine, 586
Rheumatic diseases
C3b inactivator, 1554
Rheumatoid arthritis
circulating and intraarticular immune complexes, 1308
mixed lymphocyte cultures, 1148
Ribose-5-phosphate
and phosphoribosylpyrophosphate, fibroblasts from patients with gout and purine overproduction, 308
Ringer solution
infusion, proximal tubule bicarbonate reabsorption, 1490
Ristocetin
platelet aggregation, role of membrane glycoproteins, Bernard-Soulier syndrome and von Willebrand's disease, 112
RNA
messenger, ovalbumin, translation in *Xenopus laevis* oocytes, effect of estrogen, 576
polymerases, splenic nuclear, sequential activation by erythropoietin, 20
Rosette
formation between human lymphocytes and sheep erythrocytes, inhibition by glycopeptides, 1068

S

Salt
depletion, enhanced distal tubule sodium reabsorption, 1142
Scintigraphy
technetium-99m and thallium-201, myocardial infarction, 1508
Shigella dysenteriae
pathogenesis of diarrhea, serum anticytotoxin antibody response, 194
Skin
fibroblasts, hydroxylysine-deficient collagen, abnormal lysyl hydroxylase, 83
herpes gestationis factor, immunofluorescence, 1426
properdin levels in dermal-epidermal junction, systemic lupus erythematosus, 212
Skin test
and blastogenic responses to *Sporotrichum schenckii*, 156
Sleep
cyproheptadine suppression of growth hormone and cortisol secretion during, 1393
Sodium
absorption, medullary collecting duct, postobstructive diuresis, 1564
excretion, nephron adaptation, acute proliferative glomerulonephritis, 1575
excretion, urinary, effect of inhibition of prostaglandin, 517
permeability, superficial and juxtamedullary nephrons, proximal convoluted tubule, 818
reabsorption, distal tubule, chronic salt depletion, 1142
reabsorption, proximal tubule, effect of renal sympathetic nerve stimulation, 1104
retention, mineralocorticoid agonist activity, nonsteroidal anti-inflammatory drugs, 1
retention, renal mechanisms after bile duct ligation, 408
Somatostatin
interaction with glucose, cyclic AMP, and sulfonylureas on leucine incorporation into insulin, 230
suppression of endogenous glucagon and growth hormone, effects of exogenous hormone on carbohydrate and lipid metabolism, 875
Sphincter
lower esophageal, action of pentagastrin, 1644
lower esophageal, effect of gastrin on pressure, 291
Spleen
nuclear RNA polymerases, sequential activation by erythropoietin, 20
Sporotrichum schenckii
skin test and blastogenic responses to, 156
Staphylococcus aureus
intracellular killing defect of, virus-infected alveolar macrophages, 1533

Stomach
prostaglandin and histamine action on cyclic AMP metabolism, 1548
Streptozotocin
diabetes, liver retention and degradation of insulin, 885
diabetes, serum lipoproteins and apolipoproteins, 714
diabetes, suppression of cell-mediated immunologic responses, diabetes mellitus, 362
Sulfatase
galactosamine-6-sulfate, absence in Morquio disease, 1036
Sulfonylurea
interaction with glucose, cyclic AMP, and somatostatin on leucine incorporation into insulin, 230
Superoxide
anion formation by neutrophils, immune complex disease, 836
role in granulocyte and monocyte metabolic response to phagocytosis, 1352
role in manganese-dependent NADPH oxidation, granulocyte particles, 1059
Surface
binding and enzymatic activities on separate molecular regions, human Hageman factor, 852
Sympathectomy
effect on glucagon response to hypoglycemia, 522
Sympathetic nerve
stimulation, effect on renal water and sodium reabsorption, 1104
Synovial fluid
immune complexes, rheumatoid arthritis, 1308

T

T cells
and B lymphocytes, antigen heterogeneity, 390
chronic lymphocytic leukemia, adenosine deaminase, 756
lymphocyte rosette dysfunction, hepatitis B virus infections, 1227
subpopulations, fractionation using anti-T-cell antibodies, 604
suppressor lymphocytes, fungal infection, 319
surface immunoglobulin on activated human lymphocytes, 762
tissue lymphocyte infiltration, primary and metastatic cancer, 1471
Taurine
transepithelial transport, localization of membrane defect, 183
Technetium-99m
and thallium-201 scintigraphy, myocardial infarction, 1508
Thallium-201
and technetium-99m scintigraphy, myocardial infarction, 1508
Thermogenesis
thyroid, sodium-dependent respiration and sodium-potassium ATPase, skeletal muscle, 368
Thymidine
incorporation into renal DNA, effect of uninephrectomy, 94
Thyroid
respone to thyrotropin induced by thyroid hormone, short-loop feedback, 745
thermogenesis, skeletal muscle sodium-dependent respiration and sodium-potassium ATPase, 368
Thyroid hormone
effect on bile salt-independent bile canalicular flow and sodium-potassium ATPase, liver plasma memfrane, 1009
Thyroid-stimulating hormone
induced refractoriness of thyroid cyclic AMP, 1132
Thyroparathyroidectomy
effect on renal adaptation to dietary phosphate intake, 264
effect on renal phosphate reabsorption, role of dietary phosphorus, 867
Thyrotropin
altered thyroid response to, induced by throid hormones, short-loop feedback, 745
Thyroxine
binding globulin, metabolism in inherited deficiency and excess of, 485
Tissue culture
erythroid colony growth, congenital hypoplastic anemia, 673
fibroblast binding of dihydrotestosterone, hereditary male pseudohermaphroditism, 1342
fibroblasts from patients with gout and purine overproduction, phosphoribosylpyrophosphate and ribose-5-phosphate, 308
fibroblasts, X-linked hyperuricemia, hypoxanthine phosphoribosyltransferase, 1600
human islets of Langerhans, 1295
α-Tocopherol
inhibition of platelet release reaction, 732
Toxin
cholera, activation of liver adenylate cyclase, 450
cholera, stimulation of intestinal elctrolyte transport, effect of aspirin, 916
Transcobalamin II
role in plasma transport of vitamin B_{12}, 27
Transcortin
placental, localized immune response, 1000
Transport
defects, Fanconi syndrome, membrane permeability, 1181
Triglyceride
parameter of three-pool model of plasma cholesterol turnover, hyperlipidemia, 137
Tubule
distal, enhanced sodium reabsorption, chronic salt depletion, 1142
proximal, bicarbonate reabsorption during Ringer and albumin infusions, 1490
proximal convoluted, intrinsic differences in superficial and juxtamedullary nephrons, 818
proximal, water and sodium reabsorption, effect of renal sympathetic nerve stimulation, 1104

U

Ulcer
duodenal, clearance and acid-stimulating action of big and little gastrins, 1125
Urea
cross-circulation of natriuretic factors, postobstructive diuresis, 380
Uremia
abnormal pyrophosphate metabolism, extraosseous calcification, 692
bone pyrophosphate, extraosseous calcification, 700
and hemodialysis, effect on glucagon metabolism and action, 722
liver synthesis of guanidinosuccinic acid, 807
Urticaria
chronic, defective histamine release, 1369
Uterus
and placental blood flow, effect of perfusion pressure, 938

V

Vasopermeability
$C\bar{1}s$-induced, role of C3, homozygous C3 deficiency, 222
Vasopressin
distribution, blood transport, and degradation, 1109
Ventilation
response to carbon monoxide, 977
Virus
coxsackie myocarditis, effect on heart muscle performance, 569
hepatitis B infection, T lymphocyte rosette dysfunction, 1227
Sendai, alveolar macrophage infection, intracellular killing defect of *Staphylococcus aureus*, 1533

Vitamin B_{12}
role of transcobalamin II in plasma transport of, 27
Vitamin D
25-hydroxylation, liver, 1213
and parathyroid regulation of urinary phosphate, role of cyclic AMP, 559
Vitamin D_3
1α-hydroxy-, and 1,25-dihydroxy-, effects on intestinal calcium absorption, 1540
Vitamin E
deficiency, spectrofluorescent detection of in vivo red cell lipid peroxidation, diaminodiphenylsulfone treatment, 1302
Volume expansion
extracellular, proximal tubule bicarbonate reabsorption during Ringer and albumin infusion, 1490
von Willebrand
factor, antihemophilic factor, covalently linked subunit structure, 925
von Willebrand's disease
epinephrine infusion, 1618
ristocetin-induced aggregation, role of platelet membrane glycoproteins, 112
inhibition of platelet release reaction, 732

W

Water
absorption, medullary collecting duct, postobstructive diuresis, 1564
extravascular, lung, measurement with oxygen-15, 706
reabsorption, proximal tubule, effect of renal sympathetic nerve stimulation, 1104

X

X-chromosome
and thyroxine-binding globulin metabolism, 485

THE JOURNAL OF

CLINICAL

INVESTIGATION

VOLUME 57

JANUARY TO JUNE

1976

JANUARY 1976 VOLUME 57 NUMBER 1

1 Intrinsic mineralocorticoid agonist activity of some nonsteroidal anti-inflammatory drugs. A postulated mechanism for sodium retention. *David Feldman and Chaiyapon Couropmitree*

8 Metabolism and biological activity of parathyroid hormone in renal cortical membranes. *David Goltzman, André Peytremann, Edward N. Callahan, Gino V. Segre, and John T. Potts, Jr.*

20 Sequential activation of splenic nuclear RNA polymerases by erythropoietin. *Claude A. Piantadosi, Herbert W. Dickerman, and Jerry L. Spivak*

27 The role and fate of rabbit and human transcobalamin II in the plasma transport of vitamin B_{12} in the rabbit. *Robert J. Schneider, Robert L. Burger, Carol S. Mehlman, and Robert H. Allen*

39 Blockade and stimulation of renal, adrenal, and vascular angiotensin II receptors with 1-Sar, 8-Ala angiotensin II in normal man. *Norman K. Hollenberg, Gordon H. Williams, Bruno Burger, Isao Ishikawa, and Douglass F. Adams*

47 Maintenance of insulin release from pancreatic islets stored in the cold for up to 5 weeks. *Barbara J. Frankel, Erik Gylfe, Bo Hellman, and Lars-Åke Idahl*

53 Immunoglobulin-bearing and complement-receptor lymphocytes constitute the same population in human peripheral blood. *Alfred G. Ehlenberger, Michael McWilliams, Julia M. Phillips-Quagliata, Michael E. Lamm, and Victor Nussenzweig*

57 Potentiation of erythropoiesis in vitro by dexamethasone. *David W. Golde, Noelle Bersch, and Martin J. Cline*

63 Degradation of blood group antigens in human colon ecosystems. I. In vitro production of ABH blood group-degrading enzymes by enteric bacteria. *Lansing C. Hoskins and Erwin T. Boulding*

74 Degradation of blood group antigens in human colon ecosystems. II. A gene interaction in man that affects the fecal population density of certain enteric bacteria. *Lansing C. Hoskins and Erwin T. Boulding*

83 Abnormal properties of collagen lysyl hydroxylase from skin fibroblasts of siblings with hydroxylysine-deficient collagen. *Ruth S. Quinn and Stephen M. Krane*

94 A renotropic system in rats. *H. G. Preuss and H. Goldin*

102 Lung collagen heterogeneity. Synthesis of type I and type III collagen by rabbit and human lung cells in culture. *Allan J. Hance, Kathryn Bradley, and Ronald G. Crystal*

112 Platelet membrane glycoproteins implicated in ristocetin-induced aggregation. Studies of the proteins on platelets from patients with Bernard-Soulier syndrome and von Willebrand's disease. *C. S. P. Jenkins, David R. Phillips, K. J. Clemetson, D. Meyer, M-J. Larrieu, and E. F. Lüscher*

125 Metabolic studies in total parenteral nutrition with lipid in man. Comparison with glucose. *K. N. Jeejeebhoy, G. H. Anderson, A. F. Nakhooda, G. R. Greenberg, I. Sanderson, and E. B. Marliss*

137 Parameters of the three-pool model of the turnover of plasma cholesterol in normal and hyperlipidemic humans. *Frank Rees Smith, Ralph B. Dell, Robert P. Noble, and DeWitt S. Goodman*

149 Identification of β-adrenergic receptors in human lymphocytes by (−)[^{3}H]alprenolol binding. *Lewis T. Williams, Ralph Snyderman, and Robert J. Lefkowitz*

156 Skin test and blastogenic responses to *Sporotrichum schenckii*. *Russell W. Steele, Preston B. Cannady, Jr., William L. Moore, Jr., and Layne O. Gentry*

161 Hormone-sensitive fat cell adenylate cyclase in the rat. Influences of growth, cell size, and aging. *Barry Cooper and Robert I. Gregerman*

169 The Raji cell radioimmune assay for detecting immune complexes in human sera. *Argyrios N. Theofilopoulos, Curtis B. Wilson, and Frank J. Dixon*

183 Localization of the membrane defect in transepithelial transport of taurine by parallel studies in vivo and in vitro in hypertaurinuric mice. *Russell W. Chesney, Charles R. Scriver, and Fazl Mohyuddin*

194 Pathogenesis of *Shigella* diarrhea. Serum anticytotoxin antibody response produced by toxigenic and nontoxigenic *Shigella dysenteriae* 1. *Gerald T. Keusch, Mary Jacewicz, Myron M. Levine, Richard B. Hornick, and Shaul Kochwa*

203 Human platelet-initiated formation and uptake of the C5–9 complex of human complement. *Theodore S. Zimmerman and William P. Kolb*

212 Clinical significance of serum properdin levels and properdin deposition in the dermal-epidermal junction in systemic lupus erythematosus. *Mark A. Schrager and Naomi F. Rothfield*

222 Homozygous human C3 deficiency. The role of C3 in antibody production, $C\bar{1}s$-induced vasopermeability, and cobra venom-induced passive hemolysis. *Chester A. Alper, Harvey R. Colten, John S. S. Gear, Arthur R. Rabson, and Fred S. Rosen*

230 Biosynthesis of proinsulin and insulin in newborn rat pancreas. Interaction of glucose, cyclic AMP, somatostatin, and sulfonylureas on the [^{3}H]leucine incorporation into immunoreactive insulin. *S. Duran Garcia, C. Jarrousse, and G. Rosselin*

244 JANUARY AUTHOR INDEX

FEBRUARY 1976 VOLUME 57 NUMBER 2

245 The essentiality of insulin and the role of glucagon in regulating glucose utilization and production during strenuous exercise in dogs. *M. Vranic, R. Kawamori, S. Pek, N. Kovacevic, and G. A. Wrenshall*

256 Evidence for a parathyroid hormone-independent calcium modulation of phosphate transport along the nephron. *C. Amiel, H. Kuntziger, S. Couette, C. Coureau, and N. Bergounioux*

264 Inorganic phosphate homeostasis. Renal adaptation to the dietary intake in intact and thyroparathyroidectomized rats. *U. Tröhler, J-P. Bonjour, and H. Fleisch*

274 Effect of adenosine deaminase inhibition upon human lymphocyte blastogenesis. *Dennis A. Carson and J. Edwin Seegmiller*

283 Human deficiency of the eighth component of complement. The requirement of C8 for serum *Neisseria gonorrhoeae* bactericidal activity. *B. H. Petersen, J. A. Graham, and G. F. Brooks*

291 Is gastrin a major determinant of basal lower esophageal sphincter pressure? A double-blind controlled study using high titer gastrin antiserum. *Raj K. Goyal and James E. McGuigan*

301 Effect of short-term, low-level nitrogen dioxide exposure on bronchial sensitivity of asthmatic patients. *J. Orehek, J. P. Massari, P. Gayrard, C. Grimaud, and J. Charpin*

308 Patterns of phosphoribosylpyrophosphate and ribose-5-phosphate concentration and generation in fibroblasts from patients with gout and purine overproduction. *Michael A. Becker*

319 Suppressor thymus-derived lymphocytes in fungal infection. *John D. Stobo, Sigrun Faul, Robert E. Van Scoy, and Paul E. Hermans*

329 Effects of a 3-day fast and of ethanol on splanchnic metabolism of FFA, amino acids, and carbohydrates in healthy young men. *B. M. Wolfe, J. R. Havel, E. B. Marliss, J. P. Kane, J. Seymour, and S. P. Ahuja*

341 Ischemia-induced alternations in myocardial ($Na^+ + K^+$)-ATPase and cardiac glycoside binding. *George A. Beller, James Conroy, and Thomas W. Smith*

351 Glomerulonephritis mediated by antibody to glomerular basement membrane. Immunological, clinical, and histopathological characteristics. *John J. McPhaul, Jr., and James D. Mullins*

362 Induced and spontaneous diabetes mellitus and suppression of cell-mediated immunologic responses. Granuloma formation, delayed dermal reactivity, and allograft rejection. *Adel A. F. Mahmoud, Harvey M. Rodman, Mark A. Mandel, and Kenneth S. Warren*

368 Thyroid thermogenesis. Relationships between Na^+-dependent respiration and $Na^+ + K^+$-adenosine triphosphatase activity in rat skeletal muscle. *Yasushi Asano, Uri A. Liberman, and Isidore S. Edelman*

380 Cross-circulation study of natriuretic factors in postobstructive diuresis. *Douglas R. Wilson and Ursula Honrath*

390 Antigen heterogeneity of human B and T lymphocytes. *Enrique M. Rabellino, Howard M. Grey, Sandra LaForge, Bernard Pirofsky, Noburu Kashiwagi, and Arthur Malley*

398 Spontaneous in vivo isomerization of bovine serum albumin as a determinant of its normal catabolism. *K. Wallevik*

408 Intrarenal mechanisms of salt retention after bile duct ligation in rats. *William E. Yarger*

419 Angiotensin II effects upon the glomerular microcirculation and ultrafiltration coefficient of the rat. *Roland C. Blantz, Karen S. Konnen, and Bryan J. Tucker*

435 Reduced sensitivity of the hepatic adenylate cyclase-cyclic AMP system to glucagon during sustained hormonal stimulation. *Frederick R. DeRubertis and Patricia Craven*

444 Effects of brief starvation on muscle amino acid metabolism in nonobese man. *Thomas Pozefsky, Robert G. Tancredi, Richard T. Moxley, John Dupre, and Jordon D. Tobin*

450 Activation of adenylate cyclase by cholera toxin in rat liver homogenates. *Jorge Flores, Patricia Witkum, and Geoffrey W. G. Sharp*

459 Effect of beta adrenergic blockade on renin response to renal nerve stimulation. *M. Sadi Taher, Larry G. McLain, Keith M. McDonald, and Robert W. Schrier*

466 Quantitative analysis of pregnancy-associated plasma proteins in human placenta. *Tsue-Ming Lin, Seymour P. Halbert, and David Kiefer*

473 Kinetic analysis of biliary lipid excretion in man and dog. *Charles I. Wagner, Bruce W. Trotman, and Roger D. Soloway*

478 Rapid diagnosis of anaerobic infections by direct gas-liquid chromatography of clinical specimens. *Sherwood L. Gorbach, James W. Mayhew, John G. Bartlett, Haragopal Thadepalli, and Andrew B. Onderdonk*

485 Metabolism of thyroxine-binding globulin in man. Abnormal rate of synthesis in inherited thyroxine-binding globulin deficiency and excess. *Samuel Refetoff, Victor S. Fang, James S. Marshall, and Noel I. Robin*

496 Identification and characterization of a bile acid receptor in isolated liver surface membranes. *Luigi Accatino and Francis R. Simon*

509 Brain-reactive lymphocytotoxic antibodies in the serum of patients with systemic lupus erythematosus. *Harry G. Bluestein and Nathan J. Zvaifler*

CONCISE PUBLICATIONS

517 The effect of inhibition of prostaglandin synthesis on urinary sodium excretion in the conscious dog. *Michael A. Kirschenbaum and Jay H. Stein*

522 Glucagon response to hypoglycemia in sympathectomized man. *Jerry P. Palmer, David P. Henry, James W. Benson, David G. Johnson, and John W. Ensinck*

526 Nonsuppressible insulin-like activity of human serum. A potent inhibitor of insulin degradation. *C. Ronald Kahn, Klara Megyesi, and Jesse Roth*

530 Apoprotein B in fasting and postprandial human jejunal mucosa. *Daniel Rachmilewitz, John J. Albers, and David R. Saunders*

534 7-Hydroxymethotrexate as a urinary metabolite in human subjects and rhesus monkeys receiving high dose methotrexate. *Samuel A. Jacobs, Ronald G. Stoller, Bruce A. Chabner, and David G. Johns*

540 FEBRUARY AUTHOR INDEX

541 The QRS complex during myocardial ischemia. An experimental analysis in the porcine heart. *Roger P. Holland and Harold Brooks*

551 Responsiveness to glucagon in fetal hearts. Species variability and apparent disparities between changes in beating, adenylate cyclase activation, and cyclic AMP concentration. *Kern Wildenthal, Donald O. Allen, Jan Karlsson, Jacquline R. Wakeland, and Charles M. Clark, Jr.*

559 Renal adenylate cyclase and the interrelationship between parathyroid hormone and vitamin D in the regulation of urinary phosphate and adenosine cyclic 3′,5′-monophosphate excretion. *Leonard R. Forte, G. Allen Nickols, and Constantine S. Anast*

569 Heart muscle performance after experimental viral myocarditis. *C. O. Adesanya, A. H. Goldberg, W. P. C. Phear, K. A. Thorp, N. A. Young, and W. H. Abelmann*

576 Translation of ovalbumin mRNA in *Xenopus laevis* oocytes. Characterization of the system and effects of estrogen on injected mRNA populations. *Lawrence Chan, Peter O. Kohler, and Bert W. O'Malley*

586 Reagin-mediated asthma in rhesus monkeys and relation to bronchial cell histamine release and airway reactivity to carbocholine. *Roy Patterson, Kathleen E. Harris, Irena M. Suszko, and Mary Roberts*

594 A rabbit reticulocyte model for the role of hemin-controlled repressor in hypochromic anemias. *Michael L. Freedman and Judith Rosman*

604 Fractionation of cells on a discontinuous Ficoll gradient. Study of subpopulations of human T cells using anti-T-cell antibodies from patients with systemic lupus erythematosus. *Wieslaw Glinski, M. Eric Gershwin, and Alfred D. Steinberg*

615 Degradation of cartilage proteoglycan by human leukocyte granule neutral proteases—a model of joint injury. I. Penetration of enzyme into rabbit articular cartilage and release of $^{35}SO_4$-labeled material from the tissue. *Aaron Janoff, Gad Feinstein, Charles J. Malemud, and Julius M. Elias*

625 Degradation of cartilage proteoglycan by human leukocyte granule neutral proteases—a model of joint injury. II. Degradation of isolated bovine nasal cartilage proteoglycan. *Harold Keiser, Robert A. Greenwald, Gad Feinstein, and Aaron Janoff*

633 Comparative properties of the Charcot-Leyden crystal protein and the major basic protein from human eosinophils. *Gerald J. Gleich, David A. Loegering, Kenneth G. Mann, and Jorge E. Maldonado*

641 The content and metabolism of cyclic adenosine 3′,5′-monophosphate and cyclic guanosine 3′,5′-monophosphate in adenocarcinoma of the human colon. *Frederick R. DeRubertis, Reuben Chayoth, and James B. Field*

650 Morphology and metabolism of an aortic intima-media preparation in which an intact endothelium is preserved. *Anthony D. Morrison, Leonard Berwick, Lelio Orci, and Albert I. Winegrad*

661 Diaphragmatic blood flow and energy expenditure in the dog. Effects of inspiratory airflow resistance and hypercapnia. *Dudley F. Rochester and Guglielmina Bettini*

673 Erythroid colony growth in congenital hypoplastic anemia. *Melvin H. Freedman, Dominick Amato, and E. Fred Saunders*

678 Parathyroid hormone secretion in vivo. Demonstration of a calcium-independent, nonsuppressible component of secretion. *G. P. Mayer, Joel F. Habener, and John T. Potts, Jr.*

684 Phosphoinositide metabolism and insulin secretion from isolated rat pancreatic islets. *Rex S. Clements, Jr., and William B. Rhoten*

692 Extraosseous calcification. Evidence for abnormal pyrophosphate metabolism in uremia. *Allen C. Alfrey, Clive C. Solomons, Jenny Ciricillo, and Nancy L. Miller*

700 Bone pyrophosphate in uremia and its association with extraosseous calcification. *Allen C. Alfrey and Clive C. Solomons*

706 Distribution of extravascular fluid volumes in isolated perfused lungs measured with $H_2{}^{15}O$. *T. Jones, Hazel A. Jones, C. G. Rhodes, P. D. Buckingham, and J. M. B. Hughes*

714 Serum lipoproteins and apolipoproteins in rats with streptozotocin-induced diabetes. *Hanoch Bar-On, Paul S. Roheim, and Howard A. Eder*

722 Influence of uremia and hemodialysis on the turnover and metabolic effects of glucagon. *Robert S. Sherwin, Christine Bastl, Fredric O. Finkelstein, Merrick Fisher, Henry Black, Rosa Hendler, and Philip Felig*

732 Vitamin E. An inhibitor of the platelet release reaction. *Manfred Steiner and John Anastasi*

738 Arylsulfatase B of human lung. Isolation, characterization, and interaction with slow-reacting substance of anaphylaxis. *Stephen I. Wasserman and K. Frank Austen*

745 Altered thyroidal responsitivity to thyrotropin induced by circulating thyroid hormones. A "short-loop" regulatory mechanism? *S. Yu, Y. Friedman, R. Richman, and G. Burke*

756 Adenosine deaminase activity in chronic lymphocytic leukemia. Relationship to B- and T-cell subpopulations. *Ronald Tung, Robert Silber, Franco Quagliata, Maryrose Conklyn, Jenny Gottesman, and Rochelle Hirschhorn*

762 Surface immunoglobulin on activated human peripheral blood thymus-derived cells. *Theresa L. Whiteside and Bruce S. Rabin*

772 Hemoglobin McKees Rocks ($\alpha_2\beta_2^{145\ Tyr\rightarrow Term}$). A human "nonsense" mutation leading to a shortened β-chain. *Robert M. Winslow, Mei-Lie Swenberg, Erhard Gross, Paul A. Chervenick, Robert R. Buchman, and W. French Anderson*

782 Studies on the structural abnormality of fibrinogen Paris I. *Michael W. Mosesson, David L. Amrani, and Doris Ménaché*

791 A role for alpha-adrenergic receptors in abnormal insulin secretion in diabetes mellitus. *R. Paul Robertson, Jeffrey B. Halter, and Daniel Porte, Jr.*

796 Function and structure in the diphenylamine-exposed kidney. *Kenneth D. Gardner, Jr., Sidney Solomon, William W. Fitzgerrel, and Andrew P. Evan*

CONCISE PUBLICATION

807 The biosynthesis of guanidinosuccinic acid by perfused rat liver. *Guido Perez, Alberto Rey, and Eugene Schiff*

810 March Author Index

APRIL 1976 VOLUME 57 NUMBER 4

ATLANTIC CITY MEETING 1976 – PROGRAMS

ii The American Society for Clinical Investigation
The American Federation for Clinical Research
The Association of American Physicians

811 Determinants of lung bacterial clearance in normal mice. *Stephen J. Jay, Waldemar G. Johanson, Jr., Alan K. Pierce, and Joan S. Reisch*

818 Intrinsic differences in various segments of the proximal convoluted tubule. *Harry R. Jacobson and Juha P. Kokko*

826 Human bone marrow lymphocytes. Cytotoxic effector cells in the bone marrow of normal individuals. *Anthony S. Fauci, James E. Balow, and Karen R. Pratt*

836 Elaboration of toxic oxygen by-products by neutrophils in a model of immune complex disease. *Richard B. Johnston, Jr., and Joyce E. Lehmeyer*

842 The effects of spontaneous obesity on insulin binding, glucose transport, and glucose oxidation of isolated rat adipocytes. *Jerrold M. Olefsky*

852 The relationship of structure and function in human Hageman factor. The association of enzymatic and binding activities with separate regions of the molecule. *Susan D. Revak and Charles G. Cochrane*

861 Jejunal and ileal calcium absorption in patients with chronic renal disease. Effect of 1α-hydroxycholecalciferol. *Pedro Vergne-Marini, Tom F. Parker, Charles Y. C. Pak, Alan R. Hull, Hector F. DeLuca, and John S. Fordtran*

867 Influence of dietary phosphorus on renal phosphate reabsorption in the parathyroidectomized rat. *Thomas H. Steele and Hector F. DeLuca*

875 Effects of physiologic levels of glucagon and growth hormone on human carbohydrate and lipid metabolism. Studies involving administration of exogenous hormone during suppression of endogenous hormone secretion with somatostatin. *John E. Gerich, Mara Lorenzi, Dennis M. Bier, Eva Tsalikian, Victor Schneider, John H. Karam, and Peter H. Forsham*

885 Retention and degradation of ^{125}I-insulin by perfused livers from diabetic rats. *Susan Terris and Donald F. Steiner*

897 A 25-hydroxylation pathway of cholic acid biosynthesis in man and rat. *S. Shefer, F. W. Cheng, B. Dayal, S. Hauser, G. S. Tint, G. Salen, and E. H. Mosbach*

904 Mechanism of production of intestinal secretion by elevated venous pressure. *Michael E. Yablonski and Nathan Lifson*

916 Effect of aspirin on normal and cholera toxin-stimulated intestinal electrolyte transport. *R. Kent Farris, Edward J. Tapper, Don W. Powell, and Sarah M. Morris*

925 Studies on human antihemophilic factor. Evidence for a covalently linked subunit structure. *Mary Ellen Switzer and Patrick A. McKee*

938 The effect of changes in perfusion pressure on uteroplacental blood flow in the pregnant rabbit. *Rocco C. Venuto, John W. Cox, Jay H. Stein, and Thomas F. Ferris*

945 Renal handling of Zn-α_2-glycoprotein as compared with that of albumin and the retinol-binding protein. *Rolf Ekman, Bengt G. Johansson, and Uffe Ravnskov*

955 Leukocyte-platelet interaction. Release of hydrogen peroxide by granulocytes as a modulator of platelet reactions. *Peter H. Levine, Ronald S. Weinger, JoAnn Simon, Kristine L. Scoon, and Norman I. Krinsky*

964 Interactions of actin, myosin, and an actin-binding protein of chronic myelogenous leukemia leukocytes. *Laurence A. Boxer and Thomas P. Stossel*

977 Mechanism of the ventilatory response to carbon monoxide. *Teodoro V. Santiago and Norman H. Edelman*

987 Effect of protein ingestion on splanchnic and leg metabolism in normal man and in patients with diabetes mellitus. *John Wahren, Philip Felig, and Lars Hagenfeldt*

1000 Placenta, transcortin, and localized immune response. *Seymour Werthamer, Shanthi Govindaraj, and Leonard Amaral*

1009 The effect of thyroid hormone on bile salt-independent bile flow and Na^+, K^+-ATPase activity in liver plasma membranes enriched in bile canaliculi. *Thomas J. Layden and James L. Boyer*

1019 Reversible changes of the muscle cell in experimental phosphorus deficiency. *Thomas J. Fuller, Norman W. Carter, Camilo Barcenas, and James P. Knochel*

1025 Purine nucleoside metabolism in the erythrocytes of patients with adenosine deaminase deficiency and severe combined immunodeficiency. *R. P. Agarwal, G. W. Crabtree, R. E. Parks, Jr., J. A. Nelson, R. Keightley, R. Parkman, F. S. Rosen, R. C. Stern, and S. H. Polmar*

1036 *N*-Acetylgalactosamine-6-sulfate sulfatase in man. Absence of the enzyme in Morquio disease. *Jagat Singh, Nicola Di Ferrante, Paul Niebes, and Daniela Tavella*

1041 IgA and IgG anti-ragweed antibodies in nasal secretions. Quantitative measurements of antibodies and correlation with inhibition of histamine release. *T. A. E. Platts-Mills, R. K. von Maur, K. Ishizaka, P. S. Norman, and L. M. Lichtenstein*

1051 Modulation of cellular-immune responses in vivo and in vitro by histamine receptor-bearing lymphocytes. *Ross E. Rocklin*

1059 Manganese-dependent NADPH oxidation by granulocyte particles. The role of superoxide and the nonphysiological nature of the manganese requirement. *John T. Curnutte, Manfred L. Karnovsky, and Bernard M. Babior*

1068 Rosette formation between human lymphocytes and sheep erythrocytes. Inhibition of rosette formation by specific glycopeptides. *David H. Boldt and Joseph P. Armstrong*

CONCISE PUBLICATIONS

1079 The pathogenesis of coronary artery disease. A possible role for methionine metabolism. *D. E. L. Wilcken and Bridget Wilcken*

1083 Insulin release in glucose anomeric specific in the human. *Aldo A. Rossini and J. Stuart Soeldner*

1089 Inhibition of insulin degradation by nonsuppressible insulin-like activity. *George A. Burghen, William C. Duckworth, Abbas E. Kitabchi, Solomon S. Solomon, and Phillip L. Poffenbarger.*

1093 The induction of prostatic hypertrophy in the dog with androstanediol. *Patrick C. Walsh and Jean D. Wilson*

1098 The induction of augmented granulocyte adherence by inflammation. Mediation by a plasma factor. *Arnold L. Lentnek, Alan D. Schreiber, and Rob Roy MacGregor*

1104 Effect of renal sympathetic nerve stimulation on proximal water and sodium reabsorption. *Elsa Bello-Reuss, Daniel L. Trevino, and Carl W. Gottschalk*

1108 APRIL AUTHOR INDEX

MAY 1976 VOLUME 57 NUMBER 5

1109 Distribution, blood transport, and degradation of antidiuretic hormone in man. *Gerhard Baumann and Joseph F. Dingman*

1117 An anomaly of insulin removal in perfused livers of obese-hyperglycemic (*ob/ob*) mice. *Clairette Karakash, Françoise Assimacopoulos-Jeannet, and Bernard Jeanrenaud*

1125 Clearance and acid-stimulating action of human big and little gastrins in duodenal ulcer subjects. *John H. Walsh, Jon I. Isenberg, James Ansfield, and Vernon Maxwell*

1132 Exposure of thyroid slices to thyroid-stimulating hormone induces refractoriness of the cyclic AMP system to subsequent hormone stimulation. *Sandra J. Shuman, Uriel Zor, Rueben Chayoth, and James B. Field*

1142 Evidence for enhanced distal tubule sodium reabsorption in chronic salt-depleted dogs. *Shyan-yih Chou, Leon F. Ferder, Daniel L. Levin, and Jerome G. Porush*

1148 Mixed Lymphocyte Cultures in rheumatoid arthritis. *Peter Stastny*

1158 Fate of soluble carbohydrate in the colon of rats and man. *John H. Bond, Jr., and Michael D. Levitt*

1165 Decreased insulin binding to adipocytes and circulating monocytes from obese subjects. *Jerrold M. Olefsky*

1173 Isolation of human eosinophil phospholipase D. *Laurence A. Kater, Edward J. Goetzl, and K. Frank Austen*

1181 Membrane permeability as a cause of transport defects in experimental Fanconi syndrome. A new hypothesis. *M. Bergeron, L. Dubord, and C. Hausser*

1190 Adrenergic regulation of blood pressure in chronic renal failure. *John J. Lilley, Joel Golden, and Richard A. Stone*

1201 Degradation of circulating DNA by extracorporeal circulation over nuclease immobilized on nylon microcapsules. *David S. Terman, Arnold Tavel, Tracie Tavel, Donald Petty, Ronald Harbeck, G. Buffaloe, and Ronald Carr*

1213 The effect of hepatectomy on the synthesis of 25-hydroxyvitamin D_3. *E. B. Olson, Jr., J. C. Knutson, M. H. Bhattacharyya, and H. F. DeLuca*

1221 Location of phosphatidylethanolamine and phosphatidylserine in the human platelet plasma membrane. *P. K. Schick, K. B. Kurica, and G. K. Chacko*

1227 Mechanisms responsible for defective human T-lymphocyte sheep erythrocyte rosette function associated with hepatitis B virus infections. *Francis V. Chisari, John A. Routenberg, and Thomas S. Edgington*

1239 Correction of characteristic abnormalities of microtubule function and granule morphology in Chediak-Higashi syndrome with cholinergic agonists. Studies in vitro in man and in vivo in the beige mouse. *Janet M. Oliver and Robert B. Zurier*

1248 Formation of lipoprotein–X. Its relationship to bile compounds. *E. Manzato, R. Fellin, G. Baggio, S. Walch, W. Neubeck, and D. Seidel*

1261 Effects of isoproterenol on regional myocardial function, electrogram, and blood flow in conscious dogs with myocardial ischemia. *Stephen F. Vatner, Ronald W. Millard, Thomas A. Patrick, and Guy R. Heyndrickx*

1272 Permselectivity of the glomerular capillary wall. Studies of experimental glomerulonephritis in the rat using neutral dextran. *Ramsay L. S. Chang, William M. Deen, Channing R. Robertson, Cleaves M. Bennett, Richard J. Glassock, and Barry M. Brenner*

1287 Permselectivity of the glomerular capillary wall. Studies of experimental glomerulonephritis in the rat using dextran sulfate. *Cleaves M. Bennett, Richard J. Glassock, Ramsay L. S. Chang, William M. Deen, Channing R. Robertson, and Barry M. Brenner*

1295 Survival of isolated human islets of Langerhans maintained in tissue culture. *Arne Andersson, Håkan Borg, Carl-Gustav Groth, Rolf Gunnarsson, Claes Hellerström, Göran Lundgren, Jan Westman, and Jan Östman*

1302 Spectrofluorescent detection of in vivo red cell lipid peroxidation in patients treated with diaminodiphenylsulfone. *Bernard D. Goldstein and Evelyn M. McDonagh*

1308 Circulating and intra-articular immune complexes in patients with rheumatoid arthritis. Correlation of ^{125}I-C1q binding activity with clinical and biological features of the disease. *R. H. Zubler, U. Nydegger, L. H. Perrin, K. Fehr, J. McCormick, P. H. Lambert, and P. A. Miescher*

1320 Characterization of the inappropriate gonadotropin secretion in polycystic ovary syndrome. *R. Rebar, H. L. Judd, S. S. C. Yen, J. Rakoff, G. Vandenberg, and F. Naftolin*

1330 Detection of anti-DNA antibody using synthetic antigens. Characterization and clinical significance of binding of poly (deoxyadenylate-deoxythymidylate) by serum. *Charles R. Steinman, Utis Deesomchok, and Harry Spiera*

1342 Dihydrotestosterone binding by cultured human fibroblasts. Comparison of cells from control subjects and from patients with hereditary male pseudohermaphroditism due to androgen resistance. *James E. Griffin, Kannikar Punyashthiti, and Jean D. Wilson*

1352 A comparison of the metabolic response to phagocytosis in human granulocytes and monocytes. *Arthur L. Sagone, Jr., Gerald W. King, and Earl N. Metz*

1359 Local effects of acute cellular injury on regional myocardial blood flow. *Frederick R. Cobb, Robert J. Bache, Frank Rivas, and Joseph C. Greenfield, Jr.*

1369 Defective histamine release in chronic urticaria. *Frank Kern and Lawrence M. Lichtenstein*

1378 The effect of immunotherapy on humoral and cellular responses in ragweed hayfever. *Richard Evans, Hobert Pence, Hyman Kaplan, and Ross E. Rocklin*

CONCISE PUBLICATION

1386 Failure of heavy chain glycosylation of IgG in some patients with common, variable agammaglobulinemia. *Filippo Ciccimarra, Fred S. Rosen, Eveline Schneeberger, and Ezio Merler*

1392 MAY AUTHOR INDEX

JUNE 1976 VOLUME 57 NUMBER 6

1393 Suppression by cyproheptadine of human growth hormone and cortisol secretion during sleep. *Kazuo Chihara, Yuzuru Kato, Kiyoshi Maeda, Shigeru Matsukura, and Hiroo Imura*

1403 Hormone-fuel concentrations in anephric subjects. Effect of hemodialysis (with special reference to amino acids). *Om P. Ganda, Thomas T. Aoki, J. Stuart Soeldner, Robert S. Morrison, and George F. Cahill, Jr.*

1412 Magnesium absorption in the human small intestine. Results in normal subjects, patients with chronic renal disease, and patients with absorptive hypercalciuria. *Patricia G. Brannan, Pedro Vergne-Marini, Charles Y. C. Pak, Alan R. Hull, and John S. Fordtran*

1419 The effect of phospholipase C on human blood platelets. *Anne-Brit Otnaess and Turid Holm*

1426 The immunopathology of herpes gestationis. Immunofluorescence studies and characterization of "HG factor". *Robert E. Jordon, Karl G. Heine, Gerhard Tappeiner, Lawrence L. Bushkell, and Thomas T. Provost*

1434 Herpes gestationis. Immunopathology and characterization of the HG factor. *Stephen I. Katz, Kenneth C. Hertz, and Hideo Yaoita*

1442 Hormonal modulation of cyclic adenosine 3′, 5′-monophosphate-dependent protein kinase activity in rat renal cortex. Specificity of enzyme translocation. *Frederick R. DeRubertis and Patricia A. Craven*

1451 Immune function of successfully treated lymphoma patients. *Gerald W. King, Basel Yanes, Paul E. Hurtubise, Stanley P. Balcerzak, and Albert F. LoBuglio*

1461 The regulation of 3-hydroxy-3-methylglutaryl coenzyme A reductase in the isolated perfused rat liver. *Allen D. Cooper*

1471 Tissue T and B cell infiltration of primary and metastatic cancer. *Gunnar Husby, Peter M. Hoagland, Robert G. Strickland, and Ralph C. Williams, Jr.*

1483 Regulation of acid-base equilibrium in chronic hypocapnia. Evidence that the response of the kidney is not geared to the defense of extracellular $[H^+]$. *Jordan J. Cohen, Nicolaos E. Madias, Charles J. Wolf, and William B. Schwartz*

1490 Proximal bicarbonate reabsorption during Ringer and albumin infusions in the rat. *D. Z. Levine, L. A. Nash, T. Chan, and A. H. E. Dubrovskis*

1498 Collagen polymorphism in idiopathic chronic pulmonary fibrosis. *J. M. Seyer, E. T. Hutcheson, and A. H. Kang*

1508 Pathophysiology of technetium-99m stannous pyrophosphate and thallium-201 scintigraphy of acute anterior myocardial infarcts in dogs. *L. Maximilian Buja, Robert W. Parkey, Ernest M. Stokely, Frederick J. Bonte, and James T. Willerson*

1523 Cellular basis of insulin insensitivity in large rat adipocyes. *Michael P. Czech*

1533 Defect in intracellular killing of *Staphylococcus aureus* within alveolar macrophages in Sendai virus-infected murine lungs. *George J. Jakab and Gareth M. Green*

1540 Comparison of effects of 1_α-hydroxy-vitamin D_3 and 1, 25-dihydroxy-vitamin D_3 in man. *Arnold S. Brickman, Jack W. Coburn, Gerald R. Friedman, William H. Okamura, Shaul G. Massry, and Anthony W. Norman*

1548 Interaction of prostaglandins and histamine with enzymes of cyclic AMP metabolism from guinea pig gastric mucosa. *Armin Wollin, Charles F. Code, and Thomas P. Dousa*

1554 C3b inactivator in the rheumatic diseases. Measurement by radial immunodiffusion and by inhibition of formation of properdin pathway C3 convertase. *Keith Whaley, Peter H. Schur, and Shaun Ruddy*

1564 The role of the medullary collecting ducts in postobstructive diuresis. *H. Sonnenberg and D. R. Wilson*

1575 Functional adaptation of nephrons in dogs with acute progressing to chronic experimental glomerulonephritis. *Jon P. Wagnild and Frank D. Gutmann*

1590 Prevention and reversal of cholera enterotoxin-induced intestinal secretion by methylprednisolone induction of Na^+-K^+-ATPase. *Alan N. Charney and Mark Donowitz*

1600 Hypoxanthine phosphoribosyltransferase activity in intact fibroblasts from patients with X-linked hyperuricemia. *Mary J. C. Holland, A. M. DiLorenzo, J. Dancis, M. E. Balis, T. F. Yü, and R. P. Cox*

1606 The renin-angiotensin-aldosterone system in congestive failure in conscious dogs. *Levi Watkins, Jr., James A. Burton, Edgar Haber, James R. Cant, Franklin W. Smith, and A. Clifford Barger*

1618 The effects of epinephrine infusion in patients with von Willebrand's disease. *Frederick R. Rickles, Leon W. Hoyer, Margaret E. Rick, and David J. Ahr*

1626 Hereditary deficiency of the fifth component of complement in man. I. Clinical, immunochemical, and family studies. *Stephen I. Rosenfeld, Mary E. Kelly, and John P. Leddy*

1635 Hereditary deficiency of the fifth component of complement in man. II. Biological properties of C5-deficient human serum. *Stephen I. Rosenfeld, John Baum, Roy T. Steigbigel, and John P. Leddy*

1644 Mechanism of action of pentagastrin on the lower esophageal sphincter. *Robert Zwick, Kenneth L. Bowes, E. E. Daniel, and S. K. Sarna*

1652 The biosynthesis of human hemoglobin A_{1c}. Slow glycosylation of hemoglobin in vivo. *H. Franklin Bunn, David N. Haney, Steven Kamin, Kenneth H. Gabbay, and Paul M. Gallop*

PRESIDENTIAL ADDRESS

1660 The health of clinical investigation beyond Atlantic City. *Laurence E. Earley*

1666 JUNE AUTHOR INDEX

1679 INDEXES TO VOLUME 57

AUTHOR INDEX

A

Adcock, Eugene W., III. See LEMONS, ADCOCK, JONES, NAUGHTON, MESCHIA, and BATTAGLIA 1428
Agus, Zalman S. See DEFRONZO, GOLDBERG, and AGUS 83
Ahmed, Aftab. See KRAVIS, AHMED, BROWN, FULMER, and CRYSTAL 1223
Al-Awqati, Qais, Laurence H. Norby, Allan Mueller, and **Philip R. Steinmetz.** Characteristics of stimulation of H^+ transport by aldosterone in turtle urinary bladder 351
Alper, Chester A. See RAUM, GLASS, CARPENTER, ALPER, and SCHUR 1249
Anderson, N. Leigh. Hemoglobin St. Louis (β28 (B10) Leu→Gln). Crystal structure of the fully reduced (deoxy) form 1107
Anderson, Porter. See SHAW, SMITH, ANDERSON, and SMITH 1019
Anderson, Robert J., Robert E. Cronin, Keith M. McDonald, and **Robert W. Schrier.** Mechanisms of portal hypertension-induced alterations in renal hemodynamics, renal water excretion, and renin secretion 964
Andreoli, Thomas E. See SCHAFER and ANDREOLI 500
Applegarth, Derek A. See VALLE, GOODMAN, APPLEGARTH, SHIH, and PHANG 598
Arieff, Allen I., Raul Guisado, Shaul G. Massry, and **Virginia C. Lazarowitz.** Central nervous system pH in uremia and the effects of hemodialysis 306
Askenase, Philip W., and **J. Edward Atwood.** Basophils in tuberculin and "Jones-Mote" delayed reactions of humans 1145
Atkinson, John P. See JAFFE, ATKINSON, and FRANK 942
Atwood, J. Edward. See ASKENASE and ATWOOD 1145
Aynedjian, Hagop S. See BANK and AYNEDJIAN 336

B

Babior, Bernard M., John T. Curnutte, and **B. Jane McMurrich.** The particulate superoxide-forming system from human neutrophils. Properties of the system and further evidence supporting its participation in the respiratory burst 989
—. See CHESON, CHRISTENSEN, SPERLING, KOHLER, and BABIOR 789
Baehner, Robert L. See RISTER and BAEHNER 1174
Balcerzak, Stanley P. See METZ, BALCERZAK, and SAGONE 797
Bandelin, Janet G. See MUNDY, SHAPIRO, BANDELIN, CANALIS, and RAISZ 529
Bank, Arthur. See MANIATIS, RAMIREZ, CANN, MARKS, and BANK 1419
—. See RAMIREZ, O'DONNELL, NATTA, and BANK 1475
Bank, Norman, and **Hagop S. Aynedjian.** A micropuncture study of the effect of parathyroid hormone on renal bicarbonate reabsorption 336
Bar, Robert S., Phillip Gorden, Jesse Roth, C. Ronald Kahn, and **Pierre De Meyts.** Fluctuations in the affinity and concentration of insulin receptors on circulating monocytes of obese patients. Effects of starvation, refeeding, and dieting 1123
Barbuto, A. J. See KUSHNER, BARBUTO, and LEE 1089
Barnhorst, Donald A. See CHESEBRO, RITMAN, FRYE, SMITH, CONNOLLY, RUTHERFORD, DAVIS, DANIELSON, PLUTH, BARNHORST, and WALLACE 1339
Bartter, Frederic C. See BAXTER, SCHAMBELAN, MATULICH, SPINDLER, TAYLOR, and BARTTER 579
Bass, Paul. See CLINE, LORENZSONN, BENZ, BASS, and OLSEN 380
Battaglia, Frederick C. See LEMONS, ADCOCK, JONES, NAUGHTON, MESCHIA, and BATTAGLIA 1428
Baum, John. See CHWALINSKA-SADOWSKA and BAUM 871
Baxter, John D., Morris Schambelan, Daniel T. Matulich, Benjamin J. Spindler, Addison A. Taylor, and **Frederic C. Bartter.** Aldosterone receptors and the evaluation of plasma mineralocorticoid activity in normal and hypertensive states 579
Baylink, David J. See HUGHES, BAYLINK, JONES, and HAUSSLER 61
Bayliss, Colin E. See VAN, BAYLISS, and RONCARI 699
Beach, P. Maynard. See PINE, BEACH, COTTRELL, SCOLA, and TURINO 482
Beaven, Michael A. See MOSS, DE MELLO, VAUGHAN, and BEAVEN 137
Becker, Lewis C. Effect of nitroglycerin and dipyridamole on regional left ventricular blood flow during coronary artery occlusion 1287
Becker, Martin J. See FELDMANN, BECKER, MOUTSOPOULOS, FYE, BLACKMAN, EPSTEIN, and TALAL 173
Beisswenger, Paul J. Glomerular basement membrane. Biosynthesis and chemical composition in the streptozotocin diabetic rat 844
Beller, George A. See KHAW, BELLER, HABER, and SMITH 439
Bennett, J. Claude. See HURST, VOLANAKIS, STROUD, and BENNETT 16
Bennett, William. See DEMOTS, RAHIMTOOLA, KREMKAU, BENNETT, and MAHLER 312
Benson, James W. See PALMER, BENSON, WALTER, and ENSINCK 565
Benz, Linda. See CLINE, LORENZSONN, BENZ, BASS, and OLSEN 380
Bertiger, Gerald. See MATHIAS, CARLSON, DIMARINO, BERTIGER, MORTON, and COHEN 91
Bilheimer, David W. See HO, BROWN, BILHEIMER, and GOLDSTEIN 1465
Blackman, Marcia. See FELDMANN, BECKER, MOUTSOPOULOS, FYE, BLACKMAN, EPSTEIN, and TALAL 173
Blantz, Roland C., and **Curtis B. Wilson.** Acute effects of antiglomerular basement membrane antibody on the process of glomerular filtration in the rat 899
Bloch, Kurt J. See CRONLUND, HARDIN, BURTON, LEE, HABER, and BLOCH 142
Blondin, Joanne, and **Aaron Janoff.** The role of lysosomal elastase in the digestion of *Escherichia coli* proteins by human polymorphonuclear leukocytes. Experiments with living leukocytes 971
Bobrove, Arthur M. see FUKS, STROBER, BOBROVE, SASAZUKI, MCMICHAEL, and KAPLAN 803
Boer, Pnina. See BROSH, BOER, KUPFER, DE VRIES, and SPERLING 289
Bogusky, Ronald T., Leah M. Lowenstein, and **John M. Lowenstein.** The purine nucleotide cycle. A pathway for ammonia production in the rat kidney 326

Bourgoignie, Jacques J. See FINE, BOURGOIGNIE, HWANG, and BRICKER 590
—. See GILBERT, WEBER, TURCHIN, FINE, BOURGOIGNIE, and BRICKER 1348
Bowers, Ronald E. See BRIGHAM, BOWERS, and OWEN 391
Braley, L. M. See WILLIAMS, BRALEY, and UNDERWOOD 221
Bricker, Neal S. See FINE, BOURGOIGNIE, HWANG, and BRICKER 590
—. See GILBERT, WEBER, TURCHIN, FINE, BOURGOIGNIE, and BRICKER 1348
Brigham, Kenneth L., Ronald E. Bowers, and **Patty Jill Owen.** Effects of antihistamines on the lung vascular response to histamine in unanesthetized sheep. Diphenhydramine prevention of pulmonary edema and increased permeability 391
Broder, Samuel, Richard L. Edelson, Marvin A. Lutzner, David L. Nelson, Richard P. MacDermott, Mary E. Durm, Carolyn K. Goldman, Bruce D. Meade, and **Thomas A. Waldmann.** The Sézary syndrome. A malignant proliferation of helper T cells 1297
Brosh, Sara, Pnina Boer, Batia Kupfer, Andre de Vries, and **Oded Sperling.** De novo synthesis of purine nucleotides in human peripheral blood leukocytes. Excessive activity of the pathway in hypoxanthine-guanine phosphoribosyltransferase deficiency 289
Brown, Michael S. See HO, BROWN, BILHEIMER, and GOLDSTEIN 1465
Brown, Timothy E. See KRAVIS, AHMED, BROWN, FULMER, and CRYSTAL 1223
Buchanan, T. M. See SCHOOLNIK, BUCHANAN, and HOLMES 1163
Buckley, Rebecca H., Richard B. Gilbertsen, Richard I. Schiff, Euripides Ferreira, S. Ozden Sanal, and **Thomas A. Waldmann.** Heterogeneity of lymphocyte subpopulations in severe combined immunodeficiency. Evidence against a stem cell defect 130
Bunn, Paul A., Jr., Stanley E. Shackney, and **Sharon S. Ford.** The effects of colcemid on hematopoiesis in the mouse 1280
Burger, A., D. Dinichert, P. Nicod, M. Jenny, T. Lemarchand-Béraud, and **M. B. Vallotton.** Effect of amiodarone on serum triiodothyronine, reverse triiodothyronine, thyroxin, and thyrotropin. A drug influencing peripheral metabolism of thyroid hormones 255
Burke, Thomas J. See CONGER, FALK, GUGGENHEIM, and BURKE 681
Burr, I. M., A. E. Slonim, and **R. Sharp.** Interactions of acetylcholine and epinephrine on the dynamics of insulin release in vitro 230
Burton, James. See CRONLUND, HARDIN, BURTON, LEE, HABER, and BLOCH 142
Butler, V. P., Jr. See NOSSEL, TI, KAPLAN, SPANONDIS, SOLAND, and BUTLER 1136

C

Cader, A. Martin. See DIEDERICH, TRUEWORTHY, GILL, CADER, and LARSEN 642
Canalis, Ernesto M. See MUNDY, SHAPIRO, BANDELIN, CANALIS, and RAISZ 529
Cann, Almira. See MANIATIS, RAMIREZ, CANN, MARKS, and BANK 1419
Carlson, Gerald M. See MATHIAS, CARLSON, DIMARINO, BERTIGER, MORTON, and COHEN 91
Carpenter, C. B. See RAUM, GLASS, CARPENTER, ALPER, and SCHUR 1240
Catt, Kevin J. See DOUGLAS and CATT 834
Cerasi, E. See RABINOVITCH, GRILL, RENOLD, and CERASI 1209
Chan, Lawrence, Richard L. Jackson, Bert W. O'Malley, and **Anthony R. Means.** Synthesis of very low density lipoproteins in the cockerel. Effects of estrogen. 368
Chaubey, Y. P. See HALL, HYDE, SCHWARTZ, MUDHOLKAR, WEBB, CHAUBEY, and TOWNES 1069
Cherrington, A. D., J. L. Chiasson, J. E. Liljenquist, A. S. Jennings, U. Keller, and **W. W. Lacy.** The role of insulin and glucagon in the regulation of basal glucose production in the postabsorptive dog 1407
Chesebro, James H., Erik L. Ritman, Robert L. Frye, Hugh C. Smith, Daniel C. Connolly, Barry D. Rutherford, George D. Davis, Gordon K. Danielson, James R. Pluth, Donald A. Barnhorst, and **Robert B. Wallace.** Videometric analysis of regional left ventricular function before and after aortocoronary artery bypass surgery. Correlation of peak rate of myocardial wall thickening with late postoperative graft flows 1339
Cheson, Bruce D. Ronald L. Christensen, Richard Sperling, Bryan E. Kohler, and **Bernard M. Babior.** The origin of the chemiluminescence of phagocytosing granulocytes 789
Chiasson, J. L. See CHERRINGTON, CHIASSON, LILJENQUIST, JENNINGS, KELLER, and LACY 1407
Chihara, Tadao. See VAUGHAN, CHIHARA, MOORE, ROBBINS, TANIMOTO, JOHNSON, and MCMILLAN 933
Chopra, Inder J. An assessment of daily production and significance of thyroidal secretion of 3,3′,5′-triiodothyronine (reverse T_3) in man 32
Chrambach, Andreas. See VIGERSKY, LORIAUX, HOWARDS, HODGEN, LIPSETT, and CHRAMBACH 1061
Christensen, Ronald L. See CHESON, CHRISTENSEN, SPERLING, KOHLER, and BABIOR 789
Christophe, Jean. See DESCHODT-LANCKMAN, ROBBERECHT, DE NEFF, LAMMENS, and CHRISTOPHE 891
Chwalinska-Sadowska, Hanna, and **John Baum.** The effect of D-penicillamine on polymorphonuclear leukocyte function 871
Clark, Charles M., Jr. See VINICOR, HIGDON, CLARK, and CLARK 571
Clark, Julia F. See VINICOR, HIGDON, CLARK, and CLARK 571
Clark, Robert A., F. Leonard Johnson, Seymour J. Klebanoff, and **E. Donnall Thomas.** Defective neutrophil chemotaxis in bone marrow transplant patients 22
Cline, William S., Vilja Lorenzsonn, Linda Benz, Paul Bass, and **Ward A. Olsen.** The effects of sodium ricinoleate on small intestinal function and structure 380
Cohen, Jordan J., Henry N. Hulter, Neil Smithline, James C. Melby, and **William B. Schwartz.** The critical role of the adrenal gland in the renal regulation of acid-base equilibrium during chronic hypotonic expansion. Evidence that chronic hyponatremia is a potent stimulus to aldosterone secretion 1201
Cohen, Sidney. See MATHIAS, CARLSON, DIMARINO, BERTIGER, MORTON, and COHEN 91
Cohen-Solal, Michel. See THILLET, COHEN-SOLAL, SELIGMANN, and ROSA 1098
Colombo, M. See STEVENS, COLOMBO, GONZALES, HOLLANDER, and SCHMID 470
Conger, John D., Sandor A. Falk, Stephen J. Guggenheim, and **Thomas J. Burke.** A micropuncture study of the early phase of acute urate nephropathy 681
Connolly, Daniel C. See CHESEBRO, RITMAN, FRYE, SMITH, CONNOLLY, RUTHERFORD, DAVIS, DANIELSON, PLUTH, BARNHORST, and WALLACE 1339

Conolly, M. E., and **J. K. Greenacre** The lymphocyte β-adrenoceptor in normal subjects and patients with bronchial asthma. The effect of different forms of treatment on receptor function 1307
Cook, William W. See JUERS, ROGERS, MCCURDY, and COOK 271
Corbett, C. L. See ISAACS, CORBETT, RILEY, HAWKER, and TURNBERG 535
Corcino, José J., Ann M. Reisenauer, and **Charles H. Halsted.** Jejunal perfusion of simple and conjugated folates in tropical sprue 298
Cottrell, Thomas S. See PINE, BEACH, COTTRELL, SCOLA, and TURINO 482
Coy, David H. See KONTUREK, TASLER, OBTULOWICZ, COY, and SCHALLY 1
Craven, Patricia A. See DERUBERTIS, ZENSER, CRAVEN, and DAVIS 1370
Crawhall, John C. See THOENE, OSHIMA, CRAWHALL, OLSON, and SCHNEIDER 180
Cronin, Robert E. See ANDERSON, CRONIN, MCDONALD, and SCHRIER 964
Cronlund, Malcolm, John Hardin, James Burton, Loretta Lee, Edgar Haber, and **Kurt J. Bloch.** Fibrinopeptide A in plasma of normal subjects and patients with disseminated intravascular coagulation and systemic lupus erythematosus 142
Cryer, Philip E. See GARBER, CRYER, SANTIAGO, HAYMOND, PAGLIARA, and KIPNIS 7
Crystal, Ronald G. See KRAVIS, AHMED, BROWN, FULMER, and CRYSTAL 1223
Cuche, Jean-Louis, Gary R. Marchand, Rainer F. Greger, Florian C. Lang, and **Franklyn G. Knox.** Phosphaturic effect of dopamine in dogs. Possible role of intrarenally produced dopamine in phosphate regulation 71
Cuendet, Guy S., Ernest G. Loten, Bernard Jeanrenaud, and **Albert E. Renold.** Decreased basal, noninsulin-stimulated glucose uptake and metabolism by skeletal soleus muscle isolated from obese-hyperglycemic (*ob/ob*) mice 1078
Curnutte, John T. See BABIOR, CURNUTTE, and MCMURRICH 989

D

Dagenais, Gilles R., Robert G. Tancredi, and **Kenneth L. Zierler.** Free fatty acid oxidation by forearm muscle at rest, and evidence for an intramuscular lipid pool in the human forearm 421
Dancey, John T., Kurt A Deubelbeiss, Laurence A. Harker, and **Clement A. Finch.** Neutrophil kinetics in man 705
Danielson, Gordon K. See CHESEBRO, RITMAN, FRYE, SMITH, CONNOLLY, RUTHERFORD, DAVIS, DANIELSON, PLUTH, BARNHORST, and WALLACE 1339
Davis, Bernard B. See DERUBERTIS, ZENSER, CRAVEN, and DAVIS 1370
Davis, George D. See CHESEBRO, RITMAN, FRYE, SMITH, CONNOLLY, RUTHERFORD, DAVIS, DANIELSON, PLUTH, BARNHORST, and WALLACE 1339
DeChatelet, Lawrence R. See MCPHAIL, DECHATELET, and SHIRLEY 774
DeFronzo, Ralph A., Martin Goldberg, and **Zalman S. Agus.** The effects of glucose and insulin on renal electrolyte transport 83
de Mello, Maria C. See MOSS, DE MELLO, VAUGHAN, and BEAVEN 137
De Meyts, Pierre. See BAR, GORDEN, ROTH, KAHN, and DE MEYTS 1123
DeMots, Henry, Shahbudin H. Rahimtoola, E. Louise Kremkau, William Bennett, and **Delmar Mahler.** Effects of ouabain on myocardial oxygen supply and demand in patients with chronic coronary artery disease. A hemodynamic, volumetric, and metabolic study in patients without heart failure 312
De Neef, Philippe. See DESCHODT-LANCKMAN, ROBBERECHT, DE NEEF, LAMMENS, and CHRISTOPHE 891
DeRubertis, Frederick R., Terry V. Zenser, Patricia A. Craven, and **Bernard B. Davis.** Modulation of the cyclic AMP content of rat renal inner medulla by oxygen. Possible role of local prostaglandins 1370
Deschodt-Lanckman, Monique, Patrick Robberecht, Philippe De Neef, Marc Lammens, and **Jean Christophe.** In vitro action of bombesin and bombesin-like peptides on amylase secretion, calcium efflux, and adenylate cyclase activity in the rat pancreas. A comparison with other secretagogues 891
Deubelbeiss, Kurt A. See DANCEY, DEUBELBEISS, HARKER, and FINCH 705
de Vries, Andre. See BROSH, BOER, KUPFER, DE VRIES, and SPERLING 289
Diederich, Dennis A., Robert C. Trueworthy, Paul Gill, A. Martin Cader, and **William E. Larsen.** Hematologic and clinical responses in patients with sickle cell anemia after chronic extracorporeal red cell carbamylation 642
Dietschy, John M. See WESTERGAARD and DIETSCHY 97
DiMagno, E. P. See MALAGELADA, DIMAGNO, SUMMERSKILL, and GO 493
DiMarino, A. J. See MATHIAS, CARLSON, DIMARINO, BERTIGER, MORTON, and COHEN 91
Dinichert, D. See BURGER, DINICHERT, NICOD, JENNY, LEMARCHAND-BÉRAUD, and VALLOTTON 255
Douglas, Janice, and **Kevin J. Catt.** Regulation of angiotensin II receptors in the rat adrenal cortex by dietary electrolytes 834
Dunlap, Carol L. See ROMERO, DUNLAP, and STRONG 282
Dunn, Michael J. Renal prostaglandin synthesis in the spontaneously hypertensive rat 862
Durm, Mary E. See BRODER, EDELSON, LUTZNER, NELSON, MACDERMOTT, DURM, GOLDMAN, MEADE, and WALDMANN 1297

E

Edelson, Richard L. See BRODER, EDELSON, LUTZNER, NELSON, MACDERMOTT, DURM, GOLDMAN, MEADE, and WALDMANN 1297
Elliot, Richard. See HENG, SINGH, NORRIS, JOHN, and ELLIOT 1317
Emmanouel, D. S., J. B. Jaspan, S. F. Kuku, A. H. Rubenstein, and **A. I. Katz.** Pathogenesis and characterization of hyperglucagonemia in the uremic rat 1266
—. See KUKU, JASPAN, EMMANOUEL, ZEIDLER, KATZ, and RUBENSTEIN 742
Engelman, Donald M., and **Gerald M. Hillman.** Molecular organization of the cholesteryl ester droplets in the fatty streaks of human aorta 997
—. See HILLMAN and ENGELMAN 1008
Ensinck, John W. See PALMER, BENSON, WALTER, and ENSINCK 565
Epstein, Wallace V. See FELDMANN, BECKER, MOUTSOPOULOS, FYE, BLACKMAN, EPSTEIN, and TALAL 173

F

Faber, J. Job. See THORNBURG and FABER 912
Falk, Sandor A. See CONGER, FALK, GUGGENHEIM, and BURKE 681

Feldmann, Jean-Louis, Martin J. Becker, Haralampos Moutsopoulos, Kenneth Fye, Marcia Blackman, Wallace V. Epstein, and **Norman Talal.** Antibody-dependent cell-mediated cytotoxicity in selected autoimmune diseases 173

Felig, Philip, John Wahren, and **Rosa Hendler.** Influence of physiologic hyperglucagonemia on basal and insulin-inhibited splanchnic glucose output in normal man 761

Ferreira, Euripides. See BUCKLEY, GILBERTSEN, SCHIFF, FERREIRA, SANAL, and WALDMANN 130

Fielding, Christopher J. See HAMILTON, WILLIAMS, FIELDING, and HAVEL 667

Finch, C. A., Louise R. Miller, A. R. Inamdar, Richard Person, Katherine Seiler, and **Bruce Mackler.** Iron deficiency in the rat. Physiological and biochemical studies of muscle dysfunction 447

—. See DANCEY, DEUBELBEISS, HARKER, and FINCH 705

Fine, Leon G., Jacques J. Bourgoignie, Kuo H. Hwang, and **Neal S. Bricker.** On the influence of the natriuretic factor from patients with chronic uremia on the bioelectric properties and sodium transport of the isolated mammalian collecting tubule 590

—. See GILBERT, WEBER, TURCHIN, FINE, BOURGOIGNIE, and BRICKER 1348

Fink, Kay. See VALENTINE, PAGLIA, FINK, and MADOKORO 926

Fischer, Dina, Martin B. Van der Weyden, Ralph Snyderman, and **William N. Kelley.** A role for adenosine deaminase in human monocyte maturation 399

Fishkin, Ben G. See SPIEGELBERG and FISHKIN 1259

Fitzgibbons, James F., Robert D. Koler, and **Richard T. Jones.** Red cell age-related changes of hemoglobins A_{Ia+b} and A_{Ic} in normal and diabetic subjects 820

Flier, Jeffrey S., C. Ronald Kahn, David B. Jarrett, and **Jesse Roth.** Characterization of antibodies to the insulin receptor. A cause of insulin-resistant diabetes in man 1442

Flink, Ron. See WU, THOMPSON, KOEPKE, HOAK, and FLINK 432

Ford, Sharon S. See BUNN, SHACKNEY, and FORD 1280

Fordtran, John S. See RICHARDSON, WALSH, HICKS, and FORDTRAN 623

Forsham, Peter H. See GERICH, LANGLOIS, NOACCO, LORENZI, KARAM, and FORSHAM 320

Frank, Michael M. See JAFFE, ATKINSON, and FRANK 942

Frederiksen, James W. See WEISS, FREDERIKSEN, and WEISFELDT 751

Frye, Robert L. See CHESEBRO, RITMAN, FRYE, SMITH, CONNOLLY, RUTHERFORD, DAVIS, DANIELSON, PLUTH, BARNHORST, and WALLACE 1339

Fuks, Zvi, Samuel Strober, Arthur M. Bobrove, Takehiko Sasazuki, Andrew McMichael, and **Henry S. Kaplan.** Long term effects of radiation on T and B lymphocytes in peripheral blood of patients with Hodgkin's disease 803

Fulmer, Jack D. See KRAVIS, AHMED, BROWN, FULMER, and CRYSTAL 1223

Fye, Kenneth. See FELDMANN, BECKER, MOUTSOPOULOS, FYE, BLACKMAN, EPSTEIN, and TALAL 173

G

Gallacher, Albert. See SPILBERG, GALLACHER, MEHTA, and MANDELL 815

Garber, Alan J., Philip E. Cryer, Julio V. Santiago, Morey W. Haymond, Anthony S. Pagliara, and **David M. Kipnis.** The role of adrenergic mechanisms in the substrate and hormonal response to insulin-induced hypoglycemia in man 7

Gardner, Jerry D. See SHELBY, GROSS, LICHTY, and GARDNER 1482

Garrelts, Glenda. See KHALAF, STROBER, GARRELTS, and STINSON 212

Gerich, John E., Maurice Langlois, Claudio Noacco, Mara Lorenzi, John H. Karam, and **Peter H. Forsham.** Comparison of the suppressive effects of elevated plasma glucose and free fatty acid levels on glucagon secretion in normal and insulin-dependent diabetic subjects. Evidence for selective alpha-cell insensitivity to glucose in diabetes mellitus 320

Giammarco, R. A., M. B. Goldstein, M. L. Halperin, and **B. J. Stinebaugh.** The effect of hyperventilation on distal nephron hydrogen ion secretion 77

—. See YU, GIAMMARCO, GOLDSTEIN, STINEBAUGH, and HALPERIN 557

Gibson, David. See GLASS, RAUM, GIBSON, STILLMAN, and SCHUR 853

Gilbert, Richard M., Herbert Weber, Louise Turchin, Leon G. Fine, Jacques J. Bourgoignie, and **Neal S. Bricker.** A study of the intrarenal recycling of urea in the rat with chronic experimental pyelonephritis 1348

Gilbertsen, Richard B. See BUCKLEY, GILBERTSEN, SCHIFF, FERREIRA, SANAL, and WALDMANN 130

Gill, Paul. See DIEDERICH, TRUEWORTHY, GILL, CADER, and LARSEN 642

Glass, David, Donald Raum, David Gibson, J. Sydney Stillman, and **Peter H. Schur.** Inherited deficiency of the second component of complement. Rheumatic disease associations 853

—. See RAUM, GLASS, CARPENTER, ALPER, and SCHUR 1240

Gleich, Gerald J. See SOLLEY, GLEICH, JORDON, and SCHROETER 408

Go, V. L. W. See MALAGELADA, DIMAGNO, SUMMERSKILL, and GO 493

Goldberg, Martin. See DEFRONZO, GOLDBERG, and AGUS 83

Goldman, Carolyn K. See BRODER, EDELSON, LUTZNER, NELSON, MACDERMOTT, DURM, GOLDMAN, MEADE, and WALDMANN 1297

Goldstein, Joseph L. See HO, BROWN, BILHEIMER, and GOLDSTEIN 1465

Goldstein, Marc B. See YU, GIAMMARCO, GOLDSTEIN, STINEBAUGH, and HALPERIN 557

SUBJECT INDEX

A

Acetylcholine
effect on ion transport, intestinal mucosa, 535
and epinephrine interactions, insulin release dynamics, 230

Acetylsalicylic acid
effect on lymphocyte cyclic AMP, 524

Acid-base
equilibrium during chronic hypotonic expansion, role of adrenal gland in renal regulation of, 1201

Acidification
urinary, aldosterone stimulation of, 351

Acidosis
metabolic, phosphate stimulation of ammonia production and excretion, 557
renal tubular, classic type 1, impaired conservation of sodium and chloride, 454

Acinar cells
pancreas, effect of cholecystokinin and cholinergic agents on membrane-bound calcium, 1482

Actin-spectrin
lattice, irreversible deformation, sickled cells, 955

Adenosine
metabolism, phytohemagglutinin-stimulated lymphocytes, 654

Adenosine deaminase
role in human monocyte maturation, 399

Adenylate cyclase
glucagon-sensitive system, neonatal liver, 571
pancreatic, effect of bombesin, 891

Adipocytes
effect of fasting on insulin binding, glucose transport and oxidation, 1450
precursors in culture, cytological and enzymological characterization, 699

Adipose tissue
stromal-vascular fraction, adipocyte precursors in culture, 699

Adrenal cortex
angiotensin II receptors, regulation by dietary electrolytes, 834

Adrenal gland
role in renal regulation of acid-base equilibrium during chronic hypotonic expansion, 1201

Adrenergic
and cholinergic interactions, insulin release dynamics, 230

Adrenergic mechanisms
role in hormonal response to insulin hypoglycemia, 7

β-Adrenoceptor
lymphocyte, in bronchial asthma, effects of drug therapy, 1307

Age
dependence and gas exchange, arterial blood gases, idiopathic scoliosis, 825
effect on bone mineral loss, 716
effect on erythrocyte changes of hemoglobin A_{Ia+b} and A_{Ic}, diabetes, 820

Aldosterone
receptors, plasma mineralocorticoid activity, in hypertension, 579
stimulation of hydrogen ion transport, turtle urinary bladder, 351

Alpha cell
insensitivity to glucose, diabetes mellitus, 320

Alveolar
lining material, macrophage bactericidal enhancement by, 271

Amino acid
metabolism, myocardial, ischemic heart disease, 1185
uptake, fetal umbilicus, 1428

Aminopeptidase
activity, chemotactic factor inactivator, 123

Aminothiols
intracellular cystine depletion, 180

Amiodarone
effect on metabolism of thyroid hormones, 255

Ammonia
production and excretion, stimulation by inorganic phosphate, 557
production by kidney, purine nucleotide cycle, 326

AMP
cyclic, and insulin release, response to glucose in pancreatic islets, 1209
cyclic, lymphocyte, effect of aspirin, 524
cyclic, renal inner medulla, oxygen control, role of prostaglandins, 1370
cyclic, response to adrenergic drugs, in bronchial asthma, 1307

Amylase
pancreatic, effect of bombesin, 891

Androgen
binding protein, man and monkey testis and epididymis, 1061
5α-dihydrotestosterone, deficient binding in skin fibroblasts, male pseudohermaphroditism, 345

Anemia
hemolytic, in lead poisoning, 926
pernicious, insulin and gastrin secretion, 41
sickle cell, irreversible deformation of spectrin-actin lattice, sickled cells, 955
sickle cell, response to extracorporeal red cell carbamylation, 642

Anesthetics
general, selective inhibition of osmotic water flow, toad urinary bladder, 980

Angiotensin
and renin system, effect of indomethacin, 282

Angiotensin II
receptors in adrenal cortex, regulation by dietary electrolytes, 834

Anion
transport, superficial proximal straight tubule, 500

Antibodies
anti-insulin receptor, in diabetes, 1442
IgE, role in wheal and flare late phase skin reaction, 408

Antibody
antiglomerular basement membrane, effect on glomerular filtration, 899
cardiac myosin-specific, myocardial infarction, 439
cell-mediated cytotoxicity, autoimmune diseases, 173
response, human platelet transfusions, 432

Antigen(s)
cutaneous, stimulation of lymphokine production, scleroderma lymphocytes, 1388
Escherichia coli O and K, immune response to, pyelonephritis, 276
mannan, invasive *Candida* infection, 1045

Antihistamine
diphenhydramine prevention of histamine-induced pulmonary edema, 391

α-1-Antitrypsin
deficiency, pulmonary abnormalities in, 1069

Aorta
glycosaminoglycans, changes in atherosclerosis, 470
human, fatty streaks, compositional mapping of cholesteryl ester droplets, 1008
human, fatty streaks, molecular or-

ganization of cholesteryl ester droplets, 997
Aortocoronary artery bypass surgery
regional left ventricular function, myocardial wall thickening and postoperative graft flows, 1339
Arginine
stimulation of acute phase of insulin and glucagon secretion, in diabetes, 565
Arteriosclerosis
homocystine-induced, role of endothelial cell injury and platelet response, 731
Arthritis
rheumatoid, antibody-dependent cell-mediated cytotoxicity, 173
rheumatoid, direct hemolytic plaque assay of rheumatoid factor, 933
rheumatoid, inherited second component of complement deficiency, 853
rheumatoid lymphocytes, cytotoxicity for synovial cells, 613
rheumatoid lymphocytes and leukocytes, cytotoxicity for synovial cells, 699
Aspirin
effect on lymphocytic cyclic AMP, 524
effect on renin-angiotensin system, 282
Asthma
bronchial, lymphocyte β-adrenoceptor function, effects of drug therapy, 1307
Atherosclerosis
changes in arterial glycosaminoglycans, 470
physical chemistry of plaque lipid, 200
ATP
and glucose levels, pancreatic islet tissue, diabetes, 1193
Autoimmune diseases
antibody-dependent cell-mediated cytotoxicity, 173

B

B lymphocytes
alterations in heart transplant patients, 212
differentiation, leukocyte suppression, hypogammaglobulinemia, 109
long-term effects of radiation, Hodgkin's disease, 803
Bacteremia
gram-negative rod, neutrophil function, 190
Hemophilus influenzae type B, in presence of serum bactericidal activity, 1019
Bactericidal
action, normal human sera, resistance of in gonococcal infection, 1163
activity and *Hemophilus influenzae* type B bacteremia, 1019
Bactericidal capacity
macrophages, enhancement by alveolar lining material, 271
Basement membrane
antiglomerular antibody, effect on glomerular filtration, 899
glomerular, biosynthesis and chemical composition, diabetes, 844
Basophil
IgE antibodies, role in wheal and flare late phase skin reaction, 408
stippling, in lead poisoning, 926
tuberculin and "Jones-Mote" delayed hypersensitivity reactions, 1145
Bicarbonate
absorption, superficial proximal straight tubule, 500
reabsorption, renal, effect of parathyroid hormone, 336
Bile acids
and fatty acids, regulation of pancreatic and gallbladder functions, 493
increased fatty acid and cholesterol uptake by intestinal mucosa, 97
Bladder
urinary, aldosterone stimulation of hydrogen ion transport, 351
urinary, osmotic water flow, selective inhibition by general anesthetics, 980
Blood
clinical samples, fibrinopeptide A generation, thrombin activity, 1136
clotting, radioimmunoassay of thrombin, 1249
hyperviscosity, paraproteinemia, clinical manifestations, 1155
Blood flow
left ventricular, effect of nitroglycerin and dipyridamole, coronary artery occlusion, 1287
Bombesin
effect on pancreatic amylase, calcium, and adenylate cyclase, 891
Bone
mineral loss, effect of age and activity, 716
resorption, inhibition by divalent cation ionophores A23187 and X-537A, 1327
resorption, thyroid hormone stimulation, 529
Bone marrow
neutrophil kinetics, human, 705
transplantation, defective neutrophil chemotaxis, 22

C

Calcium
membrane-bound, pancreatic acinar cells, effect of cholecystokinin and cholinergic agents, 1482
pancreatic, effect of bombesin, 891
phosphorus and parathyroid hormone, roles in insulin secretion, 359
Candida
infection, mannan antigenemia, 1045
Carbamylation
red cell, extracorporeal, response in sickle cell anemia, 642
Cardiology
arterial glycosaminoglycans, changes in atherosclerosis, 470
atherosclerosis lesions, physical chemistry of lipids, 200
effect of nitroglycerin and dipyridamole on left ventricular blood flow, coronary artery occlusion, 1287
epicardial ST-segment elevation and myocardial ischemic damage, coronary artery occlusion, 1317
heart transplantation, alterations in B and T lymphocytes, 212
human aorta fatty streaks, compositional mapping of cholesteryl ester droplets, 1008
human aorta fatty streaks, molecular organization of cholesteryl ester droplets, 997
myocardial amino acid metabolism, ischemic heart disease, 1185
myocardial oxygen metabolism, effects of ouabain, chronic coronary artery disease, 312
regional left ventricular function before and after aortocoronary artery bypass surgery, myocardial wall thickening and postoperative graft flows, 1339
time-course of left ventricular pressure fall, 751
Cartilage
articular, proteoglycan digestion by metalloproteases at neutral and acid pH, 1030
Catalase
polymorphonuclear leukocytes and alveolar macrophages, effect of hyperoxia, 1174
Catecholamines
role in hormonal response to insulin hypoglycemia, 7
Cation
divalent, ionophores A23187 and X-537A, inhibition of bone resorption, 1327
Central nervous system
intracellular pH, in uremia, effects of hemodialysis, 306
Chemiluminescence
neutrophil, Group B streptococcal opsonins, 1379
phagocytosing granulocytes, 789
and superoxide production, myeloperoxidase-deficient leukocytes, 50

Chemotactic factor
inactivator, aminopeptidase activity, 123
Chemotaxis
neutrophil dysfunction, bone marrow transplantation, 22
polymorphonuclear leukocytes, effect of penicillamine, 871
urate crystal-induced factor, 815
Chloride
concentration gradients, role in sodium chloride and water reabsorption, proximal convoluted tubule, 1110
impaired conservation of, type 1 classic renal tubular acidosis, 454
and sodium transport, thin ascending limb of Henle, 1054
transport, superficial proximal straight tubule, 500
Cholecystokinin
effect on membrane-bound calcium in pancreatic acinar cells, 1482
exocrine pancreatic secretion, effect of somatostatin, 1
Cholera
enterotoxin and live *Vibrio cholerae*, intestinal myoelectric response, 91
Cholesterol
and fatty acid uptake by intestinal mucosa, role of bile acids, 97
Cholesteryl ester
compositional mapping of droplets, fatty streaks of human aorta, 1008
molecular organization of droplets, fatty streaks of human aorta, 997
Cholinergic
and adrenergic interactions, insulin release dynamics, 230
agents, effect on membrane-bound calcium in pancreatic acinar cells, 1482
Chromosome
order, gene coding for major histocompatibility complex, properdin Factor B, and C2 deficiency, 1240
Cirrhosis
hepatic, elevated 3,3′,5′-triiodothyronine (reverse T_3) secretion, 32
Coagulation
disseminated intravascular, fibrinopeptide A, 142
Cockerel
estrogen effect on very low density lipoprotein synthesis, 368
Colcemid
effect on hematopoiesis, 1280
Cold agglutinin disease
role of complement in clearance of sensitized erythrocytes, 942
Collagen
accumulation, lymphokine stimulation, 240
induction of migration inhibition factor and cytotoxicity, role of lymphocytes, pulmonary fibrosis, 1223
Collecting ducts
human kidney, ion dependency of potential difference, 1233
sodium transport, heterogeneity of nephron function, 767
urate nephropathy, micropuncture study, 681
Complement
fixation by Cμ4 fragments of immunoglobulin M proteins, 16
role in clearance of cold agglutinin-sensitized erythrocytes, 942
second component deficiency, major histocompatibility complex, and properdin Factor B, relationship of gene coding for, 1240
second component hereditary deficiency, rheumatic disease associations, 1240
Coronary
artery disease, effects of ouabain on myocardial oxygen metabolism, 312
artery occlusion, effect of nitroglycerin and dipyridamole on left ventricular blood flow, 1287
artery occlusion, epicardial ST-segment elevation and myocardial ischemic damage, 1317
heart disease, myocardial amino acid metabolism, 1185
Corrections
253, 1043
Crystal structure
fully reduced deoxy hemoglobin St. Louis, 1107
Cysteamine
intracellular cystine depletion, 180
Cystinosis
aminothiol treatment, 180
Cytochrome *c* reductase
polymorphonuclear leukocytes and alveolar macrophages, effect of hyperoxia, 1174
Cytotoxicity
antibody-dependent cell-mediated, autoimmune diseases, 173
collagen-induced, role of lymphocytes, pulmonary fibrosis, 1223
rheumatoid arthritis leukocytes and lymphocytes for synovial cells, 690
rheumatoid arthritis lymphocytes for synovial cells, 613

D

Diabetes mellitus
acute phase of insulin and glucagon secretion, effect of arginine, 565
anti-insulin receptor antibodies, 1442
comparison of suppressive effects of glucose and free fatty acids on glucagon secretion, 320
erythrocyte age-related changes of hemoglobin A_{Ia+b} and A_{Ic}, 820
glomerular basement membrane, biosynthesis and chemical composition, 844
glucose and ATP levels, pancreatic islet tissue, 1193
and pernicious anemia, insulin and gastrin secretion, 41
Dialysis disequilibrium syndrome
central nervous system pH, 306
Diet
effect on affinity and concentration of insulin receptors on monocytes, 1123
effects of specific components on gastric acid secretion, 623
electrolyte regulation of angiotensin II receptors in adrenal cortex, 834
low-calorie ketogenic and nonketogenic, metabolic response of obese patients, 722
Diffusion
resistance, steady-state concentration gradients of ferritin, rabbit hemochlorial placenta, 912
sodium transport, thin ascending limb of Henle, 1054
5α-Dihydrotestosterone
deficient binding in skin fibroblasts, male pseudohermaphroditism, 345
Diphenhydramine
prevention of histamine-induced pulmonary edema, 391
Dipyridamole
effect on left ventricular blood flow, coronary artery occlusion, 1287
Discoidal bilayer
nascent high density liver lipoproteins, 667
DNA
complementary, quantitation of γ-globin genes and globin mRNA, 1475
Dopamine
intrarenal production, role in phosphate regulation, 71
Drugs
adrenergic effect on lymphocyte cyclic AMP, in bronchial asthma, 1307

E

Edema
pulmonary, lymph flow and extravascular water, effect of α-naphthylthiourea, 482
Electrolytes
dietary, regulation of angiotensin II receptors in adrenal cortex, 834
transport, renal, effect of glucose and insulin, 83

Electrophysiology
ion dependency of potential difference, human collecting ducts, 1233
Endothelium
injury and platelet response, role in homocystine-induced arteriosclerosis, 731
Energy-nitrogen balance
composition of weight lost during weight reduction, obese patients, 722
Enterotoxin
cholera, and live *Vibrio cholerae*, intestinal myoelectric response, 91
Enzyme(s)
adenosine deaminase, role in human monocyte maturation, 399
adenylate cyclase and amylase, pancreatic, effect of bombesin, 891
aminopeptidase, chemotactic factor inactivator, 123
hypoxanthine-guanine phosphoribosyl transferase deficiency, purine nucleotide synthesis in leukocytes, 289
imidazoleacetate phosphoribosyl transferase, salicylate inhibition of, 137
lecithin-cholesterol acyltransferase, high density lipoprotein as substrate, 667
lysosomal elastase, role in *Escherichia coli* protein digestion by human polymorphonuclear leukocytes, 971
lysosomal, polymorphonuclear leukocytes, effect of penicillamine, 871
metalloprotease digestion of articular cartilage proteoglycan at neutral and acid pH, 1030
myeloperoxidase deficiency, polymorphonuclear leukocytes, chemiluminescence and superoxide production, 50
NADPH oxidase activity, polymorphonuclear leukocytes, 774
pyrimidine 5′-nucleotidase deficiency, erythrocytes, in lead poisoning, 926
Δ^1-pyrroline-5-carboxylic acid dehydrogenase deficiency, type II hyperprolinemia, 598
sulfite oxidase deficiency, characterization of molecular defect, 551
sulfite oxidase, purification of from human liver, 543
superoxide dismutase, catalase, glutathione peroxidase and cytochrome *c* reductase, leukocytes and alveolar macrophages, effect of hyperoxia, 1174
uroporphyrinogen decarboxylase, decreased activity in porphyria cutanea tarda, inherited defect, 1089
Epididymis
androgen binding protein, man and monkey, 1061
Epinephrine
and acetylcholine interactions, insulin release dynamics, 230
Erythrocytes
age-related changes of hemoglobin A_{Ia+b} and A_{Ic}, in diabetes, 820
carbamylation, extracorporeal, response in sickle cell anemia, 642
cold agglutinin-sensitized, role of complement in clearance of, 942
decreased uroporphyrinogen decarboxylase activity, inherited defect in porphyria cutanea tarda, 1089
methylene blue stimulation of hexose monophosphate shunt, 797
pyrimidine 5′-nucleotidase deficiency, pyrimidine accumulation, in lead poisoning, 926
sickled cells, irreversible deformation of spectrin-actin lattice, 955
Escherichia coli
O and K antigens, immune response to, pyelonephritis, 276
protein digestion by human polymorphonuclear leukocytes, role of lysosomal elastase, 971
Esterification
long chain fatty acid, role of protein binding, 632
Estrogen
effect on very low density lipoprotein synthesis, in cockerel, 368
role in decreased uroporphyrinogen decarboxylase activity, porphyria cutanea tarda, 1089
Exercise
maximal oxygen consumption, lung disease, 880

F

Factor
natriuretic, inhibition of sodium transport, collecting tubule, 590
urate crystal-induced chemotaxis, 815
Fasting
effect on insulin binding, glucose transport and oxidation, adipocytes, 1450
Fat cells
insulin receptor binding, insulin sensitivity in obesity, 1435
precursors in culture, cytological and enzymological characterization, 699
Fatty acids
and bile acids, regulation of pancreatic and gallbladder functions, 493
binding protein, role in esterification, 632
and cholesterol uptake by intestinal mucosa, role of bile acids, 97
hydroxy, effects of ricinoleic acid on small intestinal function and structure, 380
Fatty streaks
atherosclerosis, physical chemistry of lipids, 200
human aorta, compositional mapping of cholesteryl ester droplets, 1008
human aorta, molecular organization of cholesteryl ester droplets, 997
Ferritin
steady-state concentration gradients, rabbit hemochlorial placenta, 912
Fetus
umbilical amino acid uptake, 1428
Fibrinopeptide A
generation of in clinical blood samples, thrombin activity, 1136
radioimmunoassay, disseminated intravascular coagulation and systemic lupus erythematosus, 142
Fibroblast
collagen accumulation, lymphokine stimulation, 240
Filtration
glomerular, effect of antiglomerular basement membrane antibody, 899
Flaujeac factor deficiency
high molecular weight-kininogen permeability enhancing peptide, 1395
Folates
simple and conjugated, jejunal perfusion in tropical sprue, 298
Food
stimulation of gastric acid secretion, 623
Forearm
skeletal muscle, free fatty acid oxidation, intramuscular lipid pool, 421
Free fatty acids
and glucose suppression of glucose, diabetes mellitus, 320
oxidation by human skeletal muscle, intramuscular lipid pool, 421

G

Gallbladder
and pancreatic functions, regulation by intraluminal fatty acids and bile acids, 493
Gas
exchange and age dependence of arterial blood gases, idiopathic scoliosis, 825
Gastric acid
secretion, food stimulation, 623

Gastrin
and insulin secretion, pernicious anemia, 41
release, effects of specific dietary components, 623
Gene
coding for major histocompatibility complex, properdin Factor B, and C2 deficiency, 1240
Genes
human γ-globin and γ-globin mRNA, quantitation with complementary DNA, 1475
Globin
mRNA, translation and stability in *Xenopus* oocytes, 1419
γ-Globin
genes and mRNA, quantitation with complementary DNA, 1475
Glomerulus
basement membrane, biosynthesis and chemical composition, diabetes, 844
filtration, effect of antiglomerular basement membrane antibody, 899
Glucagon
effect on splanchnic glucose output, 761
heterogeneity of components, chronic renal failure, 742
and insulin acute phase of secretion, effect of arginine, in diabetes, 565
and insulin, role in regulation of basal glucose production, 1407
metabolism of in uremia, 1266
sensitivity, neonatal rat liver, 571
suppression by glucose and free fatty acids, alpha cell insensitivity to glucose, diabetes mellitus, 320
Gluconeogenesis
response to insulin hypoglycemia, role of adrenergic mechanisms, 7
Glucose
and ATP levels, pancreatic islet tissue, diabetes, 1193
basal production, role of insulin and glucagon in regulation of, 1407
and insulin, effects on renal electrolyte transport, 83
pancreatic islet response, insulin release and cyclic AMP accumulation, 1209
splanchnic output, effect of hyperglucagonemia, 761
suppression of glucagon, alpha cell insensitivity to, diabetes mellitus, 320
tolerance in pernicious anemia, insulin and gastrin secretion, 41
transport and oxidation, insulin binding, effects of fasting, adipocytes, 1450
uptake and metabolism, insulin resistance, skeletal soleus muscle, obese-hyperglycemic mice, 1078
Glutathione peroxidase
polymorphonuclear leukocytes and alveolar macrophages, effect of hyperoxia, 1174
Glycosaminoglycans
arterial, changes in atherosclerosis, 470
Gonorrhea
resistance to bactericidal action of normal human sera, 1163
Graft flow
and postoperative myocardial wall thickening, regional left ventricular function before and after aortocoronary artery bypass surgery, 1339
Graft versus host disease
bone marrow transplantation, defective neutrophil chemotaxis, 22
Granulocytes
phagocytosing, chemiluminescence, 789
Granulomatous disease
chronic, chemiluminescence and superoxide production by myeloperoxidase-deficient leukocytes, 50
Gruel plaques
atherosclerosis, physical chemistry of lipids, 200

H

Halothane
inhibition of osmotic water flow, toad urinary bladder, 980
Heart
disease, ischemic, myocardial amino acid metabolism, 1185
transplant patients, alterations in B and T lymphocytes, 212
Helper T cells
neoplastic, Sézary syndrome, 1297
Hematology
blood hyperviscosity, paraproteinemia, clinical manifestations, 1155
direct hemolytic plaque assay, rheumatoid factor, 933
effect of colcemid on hematopoiesis, 1280
erythrocyte age-related changes of hemoglobin A_{Ia+b} and A_{Ic}, in diabetes, 820
extracorporeal red cell carbamylation, sickle cell anemia, 642
fibrinopeptide A, disseminated intravascular coagulation and systemic lupus erythematosus, 142
fibrinopeptide A generation in clinical blood samples, thrombin activity, 1136
Flaujeac factor deficiency, high molecular weight-kininogen permeability enhancing peptide, 1395
hemoglobin St. Louis, crystal structure of fully reduced deoxy form, 1107
hemoglobin St. Louis, variant with ferric β-heme iron, 1098
iron deficiency, muscle dysfunction, 447
irreversible deformation of spectrin-actin lattice, sickled cells, 955
lead poisoning and hemolytic anemia, basophilic stippling, erythrocyte pyrimidine 5′-nucleotidase deficiency, intraerythrocyte pyrimidine accumulation, 926
methylene blue stimulation of hexose monophosphate shunt, erythrocytes, 797
neutrophil kinetics, human, 705
radioimmunoassay of thrombin, clotting blood, 1249
thromboxane A_2, platelet release-inducing activity in plasma, 1119
Hematopoiesis
effect of colcemid, 1280
Hemodialysis
effects on central nervous system pH, uremia, 306
Hemodynamics
myocardial oxygen metabolism, effects of ouabain, chronic coronary artery disease, 312
renal, effect of hypertension, 964
time-course of left ventricular pressure fall, 751
Hemoglobin A_{Ia+b} and A_c
erythrocyte age-related changes, in diabetes, 820
Hemoglobin St. Louis
β 28(B1O)Leu → Gln, crystal structure of fully reduced deoxy form, 1107
variant with ferric β-heme iron, 1098
Hemophilus influenzae
type B bacteremia in presence of serum bactericidal activity, 1019
Hexose
monophosphate shunt, stimulation by methylene blue, erythrocytes, 797
Histamine
effect of salicylates, inhibition of imidazoleacetate phosphoribosyl transferase, 137
Histidine
metabolism, effect of salicylates, inhibition of imidazoleacetate phosphoribosyl transferase, 137
Histocompatibility complex
properdin Factor B, and C2 deficiency, relationship of gene coding for, 1240
Hodgkin's disease
long-term effects of radiation, T and B lymphocytes, 803
Homocystine
induction of arteriosclerosis, role of endothelial cell injury and platelet response, 731

Hormone(s)
aldosterone receptors, plasma mineralocorticoid activity, in hypertension, 579
aldosterone stimulation of hydrogen ion transport, turtle urinary bladder, 351
androgen binding protein, man and monkey testis and epididymis, 1061
5α-dihydrotestosterone, deficient binding in skin fibroblasts, male pseudohermaphroditism, 345
glucagon, effect on splanchnic glucose output, 761
glucagon, heterogeneity of components, chronic renal failure, 742
glucagon and insulin acute phase of secretion, effect of arginine, in diabetes, 565
glucagon and insulin, role in regulation of basal glucose production, 1407
glucagon metabolism in uremia, 1266
glucagon sensitivity, neonatal rat liver, 571
growth hormone-release inhibiting, effect on pancreatic secretory response to secretin and cholecystokinin, 1
insulin binding, glucose transport and oxidation, effect of fasting, adipocytes, 1450
insulin and gastrin secretion, pernicious anemia, 41
insulin and glucose, effects on renal electrolyte transport, 83
insulin hypoglycemia, role of adrenergic mechanisms in hormonal response to, 7
insulin receptor binding in fat cells, sensitivity in obesity, 1435
insulin receptors on monocytes, fluctuations in affinity and concentration of, 1123
insulin release and cyclic AMP accumulation, response to glucose in pancreatic islets, 1209
insulin release dynamics, acetylcholine and epinephrine interactions, 230
insulin resistance, diabetes, inhibitor of receptor binding, 1442
insulin resistance, glucose uptake and metabolism, skeletal soleus muscle, obese-hyperglycemic mice, 1078
insulin secretion, roles of calcium, phosphorus and parathyroid hormone, 359
parathyroid, effect on renal bicarbonate reabsorption, 336
parathyroid, exaggerated phosphaturic response to, familial X-linked hypophosphaturic rickets, 152
parathyroid, inhibition of renal action by hypermagnesemia, 1273
parathyroid, liver and renal uptake of, 781
renal resistance to during phosphorus depletion, 1461
thyroid, effect of amiodarone on metabolism of, 255
thyroid, stimulation of bone resorption, 529
Hydrogen ion
secretion, distal nephron, effect of hyperventilation, 77
transport stimulation by aldosterone, turtle urinary bladder, 351
Hydrogen peroxide
methylene blue stimulation of hexose monophosphate shunt, erythrocytes, 797
role in chemiluminescence, phagocytosing granulocytes, 789
18-Hydroxy 11-deoxycorticosterone
regulation of in man, 221
5-Hydroxytryptamine
release from platelets, thromboxane A_2-like material, 1119
25-Hydroxyvitamin D
transport, isolation of binding protein, 514
Hyperglucagonemia
effect on splanchnic glucose output, 761
uremic, pathogenesis of, 1266
Hyperglycemia
effect on renal electrolyte transport, 83
Hyperlipoproteinemia
inhibition of lymphoproliferation, 950
Hypermagnesemia
inhibition of renal action of parathyroid hormone, 1273
Hyperprolinemia
type II, Δ^1-pyrroline-5-carboxylic acid dehydrogenase deficiency, 598
Hypersensitivity
role of IgE antibodies in wheal and flare late phase skin reaction, 408
tuberculin and "Jones-Mote" delayed reactions, basophils in, 1145
Hypertension
aldosterone receptors and plasma mineralocorticoid activity, 579
effect on renal hemodynamics, water excretion, and renin secretion, 964
18-hydroxy 11-deoxycorticosterone regulation in man, 221
renal prostaglandin synthesis, 862
Hyperuricemia
micropuncture study, 681
Hyperventilation
effect on distal nephron hydrogen ion secretion, 77
Hypervitaminosis D
radioligand receptor assay, 25-hydroxyvitamin D_2/D_3 and 1α,25-dihydroxyvitamin D_2/D_3, 61
Hypogammaglobulinemia
leukocyte suppression of B cell differentiation, 109
Hypoglycemia
insulin-induced, role of adrenergic mechanisms in hormonal response to, 7
Hypoxanthine-guanine phosphoribosyl transferase
deficiency, purine nucleotide synthesis in leukocytes, 289

I

Imidazoleacetate phosphoribosyl transferase
salicylate inhibition of, 137
Immunodeficiency
hypogammaglobulinemia, leukocyte suppression of B-cell differentiation, 109
severe combined, lymphocyte subpopulations, stem cell defect, 130
severe combined, role of adenosine deaminase in monocyte maturation, 399
Immunoglobulin
class, paraprotein, relationship to blood viscosity, 1155
inhibitor of receptor binding in insulin-resistant diabetes, 1442
Immunoglobulin A
half-molecules, multiple myeloma, 1259
Immunoglobin E
antibodies, role in wheal and flare late phase skin reaction, 408
Immunoglobulin M
protein complement fixation by Cμ4 fragments, 16
Immunology
antibody-dependent cell-mediated cytotoxicity, autoimmune diseases, 173
antibody response, platelet transfusion, 432
anti-insulin receptor antibodies, in diabetes, 1442
basophils in tuberculin and "Jones-Mote" delayed hypersensitivity reactions, 1145
cardiac myosin-specific antibody, myocardial infarction, 439
cutaneous antigen stimulation of lymphokine production, scleroderma lymphocytes, 1388
effects of antiglomerular basement membrane antibody on glomerular filtration, 899
gene coding for major histocompatibility complex, properdin Factor B, and C2 deficiency, 1240
heart transplantation, alterations in B and T lymphocytes, 212

IgA half-molecules, multiple myeloma, 1259
inherited second component of complement deficiency, rheumatic diseases, 853
long-term effects of radiation on T and B lymphocytes, Hodgkin's disease, 803
mannan antigenemia, invasive *Candida* infection, 1045
response to *Escherichia coli* O and K antigens, pyelonephritis, 276
role of complement in clearance of cole agglutinin-sensitized erythrocytes, 942
Indomethacin
effect on renin-angiotensin system, 282
Infection
Candida, mannan antigenemia, 1045
gonococcal, resistance to bactericidal action of normal human sera, 1163
gram-negative rod bacteremia, neutrophil function, 190
Group B streptococcus, opsonins, neutrophil chemiluminescence, 1379
Hemophilus influenzae type B bacteremia in presence of serum bactericidal activity, 1019
Inflammation
anti-, effect of indomethacin and other drugs on renin-angiotensin system, 282
Insulin
binding, glucose transport and oxidation, effect of fasting, adipocytes, 1450
and gastrin secretion, pernicious anemia, 41
and glucagon acute phase of secretion, effect of arginine, in diabetes, 565
and glucagon, role in regulation of basal glucose production, 1407
and glucose, effects on renal electrolyte transport, 83
hypoglycemia, role of adrenergic mechanisms in hormonal response to, 7
receptor binding in fat cells, sensitivity in obesity, 1435
receptors on monocytes, fluctuations in affinity and concentration of, 1123
release and cyclic AMP accumulation, response to glucose in pancreatic islets, 1209
release dynamics, acetylcholine and epinephrine interactions, 230
resistance, diabetes, inhibitor of receptor binding, 1442
resistance, glucose uptake and metabolism, skeletal soleus muscle, obese-hyperglycemic mice, 1078
secretion, role of calcium, phosphorus, and parathyroid hormone, 359
Intestine
cholera enterotoxin and live *Vibrio cholerae*, myoelectric response, 91
fatty acid binding protein, role in esterification, 632
jejunal perfusion of simple and conjugated folates, tropical sprue, 298
mucosa, effect of acetylcholine on ion transport, 535
mucosa, fatty acid and cholesterol uptake, role of bile acids, 97
regulation of pancreatic and gallbladder functions by fatty acids and bile acids, 493
small, effects of sodium ricinoleate on function and structure, 380
Ion
dependency of potential difference, human collecting ducts, 1233
Ionophores
A23187 and X-537A, divalent cation, inhibition of bone resorption, 1327
Ion transport
intestinal mucosa, effect of acetylcholine, 535
Iron
deficiency, muscle dysfunction, 447
ferric β-heme, hemoglobin St. Louis, 1098
Ischemia
myocardial damage, epicardial ST-segment elevation, coronary artery occlusion, 1317
myocardial infarction, cardiac myosin-specific antibody, 439
Isovaleric acidemia
leucine metabolism in skin fibroblasts, 164

J

Jejunum
perfusion of simple and conjugated folates, tropical sprue, 298
"Jones-Mote"
and tuberculin delayed hypersensitivity reactions, basophils in, 1145

K

Kallikrein
high molecular weight-kininogen permeability enhancing peptide, Flaujeac factor deficiency, 1395
Kidney
ammonia production and excretion, stimulation by inorganic phosphate, 557
ammonia production, purine nucleotide cycle, 326
anion transport, superficial proximal straight tubule, 500
bicarbonate reabsorption, effect of parathyroid hormone, 336
central nervous system pH, in uremia, effect of hemodialysis, 306
collecting duct sodium transport, heterogeneity of nephron function, 767
collecting tubule sodium transport, effect of natriuretic factor, 590
distal nephron hydrogen ion secretion, effect of hyperventilation, 77
effects of antiglomerular basement membrane antibody on glomerular filtration, 899
effect of hypertension on renal hemodynamics, water excretion, and renin secretion, 964
electrolyte transport, effects of glucose and insulin, 83
exaggerated phosphaturic response to parathyroid hormone, familial X-linked hypophosphatemic rickets, 152
glomerular basement membrane, biosynthesis and chemical composition, diabetes, 844
and hepatic uptake of parathyroid hormone, 781
heterogeneity of plasma glucagon, chronic renal failure, 742
immune response to *Escherichia coli* O and K antigens, 276
impaired conservation of sodium and chloride, type 1 classic renal tubular acidosis, 454
inner medulla cyclic AMP, oxygen control, role of prostaglandins, 1370
intrarenal dopamine production, role in phosphate regulation, 71
intrarenal urea recycling, pyelonephritis, 1348
pathogenesis of uremic hyperglucagonemia, 1266
perfused human collecting ducts, ion dependency of potential difference, 1233
renal action of parathyroid hormone, inhibition by hypermagnesemia, 1273
renal prostaglandin synthesis, hypertension, 862
renal resistance to parathyroid hormone during phosphorus depletion, 1461
role of adrenal gland in renal regulation of acid-base equilibrium during chronic hypotonic expansion, 1201
sodium and chloride transport, thin ascending limb of Henle, 1054
sodium chloride and water reabsorption, proximal convoluted tubule, role of chloride concentration gradients, 1110

urate nephropathy, micropuncture study, 681
urea secretion by straight segment of proximal tubule, 604
Kininogen
high molecular weight, permeability enhancing peptide, Flaujeac factor deficiency, 1395

L

Lead
kinetics of metabolism in healthy humans, 260
poisoning, hemolytic anemia, basophilic stippling, erythrocyte pyrimidine 5′-nucleotidase deficiency, intraerythrocyte pyrimidine accumulation, 926
Lecithin-cholesterol acyltransferase
high density lipoprotein as substrate, 667
Leucine
metabolism in skin fibroblasts, isovaleric acidemia and maple syrup urine disease, 164
Leukocyte(s)
polymorphonuclear, effect of hyperoxia on superoxide dismutase, catalase, glutathione peroxidase, and cytochrome *c* reductase, 1174
polymorphonuclear, effect of penicillamine, 871
polymorphonuclear, human, digestion of *Escherichia coli* proteins, role of lysosomal elastase, 971
polymorphonuclear, myeloperoxidase deficiency, chemiluminescence and superoxide production, 50
polymorphonuclear, NADPH oxidase activity, 774
proliferation, inhibition by hyperlipoproteinemia, 950
purine nucleotide synthesis, hypoxanthine-guanine phosphoribosyl transferase deficiency, 289
rheumatoid arthritis, cytotoxicity for synovial cells, 690
suppression of B cell differentiation, hypogammaglobulinemia, 109
Limb of Henle
thin ascending, sodium and chloride transport, 1054
Lipid
absorption by intestinal mucosa, role of bile acids, 97
atherosclerosis lesions, physical chemistry of, 200
intramuscular pool, free fatty acid oxidation, human skeletal muscle, 421
Lipoprotein(s)
low-density, receptors on lymphocytes, 1465
nascent high-density, liver, discoidal bilayer structure, 667
very low density, effect of estrogen on synthesis, in cockerel, 368
very low density, inhibition of leukocyte proliferation, 950
Liver
nascent high-density lipoproteins, discoidal bilayer structure, 667
neonatal, glucagon sensitivity, 571
purification of sulfite oxidase, 543
and renal uptake of parathyroid hormone, 781
Lung
fibrosis, collagen-induced migration inhibition factor and cytotoxicity, role of lymphocytes, 1223
lymph flow and extravascular water, effect of α-naphthylthiourea, 482
macrophage bactericidal enhancement by alveolar lining material, 271
mechanical abnormalities, intermediate α-1-antitrypsin deficiency, 1069
vascular response to histamine, antihistamine prevention of pulmonary edema and increased permeability, 391
Lung disease
maximal oxygen consumption, 880
Lupus erythematosus
systemic, antibody-dependent cell-mediated cytotoxicity, 173
systemic and discoid, inherited second component of complement deficiency, 853
systemic, fibrinopeptide A, 142
Lymph
flow and extravascular water, lung, effect of α-naphthylthiourea, 482
Lymphocyte(s)
β-adrenoceptor function, in bronchial asthma, effects of drug therapy, 1307
B and T, alterations in heart transplant patients, 212
B and T, long-term effects of radiation, in Hodgkin's disease, 803
cAMP metabolism, effect of aspirin, 524
collagen-induced migration inhibition factor and cytotoxicity, pulmonary fibrosis, 1223
and leukocytes, rheumatoid arthritis, cytotoxicity for synovial cells, 690
low-density lipoprotein receptors, 1465
lymphokine production, cutaneous antigen stimulation, in scleroderma, 1388
phytohemagglutinin-stimulated, adenosine metabolism, 654
potassium transport, effect of phytohemagglutinin, 1358
Δ¹-pyrroline-5-carboxylic acid dehydrogenase deficiency, type II hyperprolinemia, 598
rheumatoid arthritis, cytotoxicity for synovial cells, 613
secretion of rheumatoid factor, direct hemolytic plaque assay, 933
subpopulations, severe combined immunodeficiency, stem cell defect, 130
Lymphokine
production by scleroderma lymphocytes, cutaneous antigen stimulation, 1388
stimulation of collagen accumulation, 240
Lymphoproliferation
inhibition by hyperlipoproteinemia, 950
Lysosomal elastase
role in *Escherichia coli* protein digestion by human polymorphonuclear leukocytes, 971

M

Macrophages
alveolar, effect of hyperoxia on superoxide dismutase, catalase, glutathione peroxidase, and cytochrome *c* reductase, 1174
bactericidal enhancement by alveolar lining material, 271
Magnesium
inhibition of renal action of parathyroid hormone, 1273
Male pseudohermaphroditism
deficient 5α-dihydrotestosterone binding in skin fibroblasts, 345
Mannan
antigenemia, invasive *Candida* infection, 1045
Maple syrup urine disease
leucine metabolism in skin fibroblasts, 164
Mast cell
IgE antibodies, role in wheal and flare late phase skin reaction, 408
Meclofenamate
effect on renin-angiotensin system, 282
Metalloproteases
digestion of articular cartilage proteoglycan at neutral and acid pH, 1030
Methohexital
inhibition of osmotic water flow, toad urinary bladder, 1980
Methoxyflurane
inhibition of osmotic water flow, toad urinary bladder, 1980
Methylene blue
stimulation of hexose monophosphate shunt, erythrocytes, 797
Methylenecyclopropylacetic acid
inhibition of leucine oxidation, 164

Migration inhibition factor
collagen-induced, role of lymphocytes, pulmonary fibrosis, 1223
Mineral
homeostasis disorders, protein binding vitamin D and metabolites, 1217
loss, bone, effect of age and activity, 716
Mineralocorticoid
18-hydroxy 11-deoxycorticosterone regulation in man, 221
plasma activity, aldosterone receptors, in hypertension, 579
role in renal regulation of acid-base equilibrium during chronic hypotonic expansion, 1201
Molybdenum
cofactor of sulfite oxidase, 543
levels in sulfite oxidase deficiency, 551
Monocyte
insulin receptors, fluctuations in affinity and concentration, 1123
maturation, role of adenosine deaminase, 399
Mucopolysaccharides
arterial, changes in atherosclerosis, 470
Mucosa
intestinal, effect of acetylcholine on ion transport, 535
small intestine, exfoliation of by ricinoleic acid, 380
Muscle
dysfunction, iron deficiency, 447
skeletal, human, free fatty acid oxidation, intramuscular lipid pool, 421
skeletal soleus, obese-hyperglycemic mice, decreased noninsulin-stimulated glucose uptake and metabolism, 1078
Myeloperoxidase
deficiency, polymorphonuclear leukocytes, chemiluminescence and superoxide production, 50
Myeloma
multiple, IgA half-molecules, 1259
Myocardium
amino acid metabolism, ischemic heart disease, 1185
infarction, cardiac myosin-specific antibody, 439
ischemic damage, epicardial ST-segment elevation, coronary artery occlusion, 1317
oxygen metabolism, effects of ouabain, chronic coronary artery disease, 312
wall thickening and postoperative graft flows, regional left ventricular function before and after aortocoronary artery bypass surgery, 1339
Myoelectric response
intestinal, cholera enterotoxin and live *Vibrio cholerae*, 91
Myosin
cardiac, specific antibody, myocardial infarction, 439

N

NADPH oxidase
activity in polymorphonuclear leukocytes, 774
α-Naphthylthiourea
effect on lymph flow and extravascular lung water, 482
Natriuretic factor
inhibition of sodium transport, collecting tubule, 590
Neisseria gonorrhoeae
resistance to bactericidal action of normal human sera, 1163
Neonate
liver, glucagon sensitivity, 571
Neoplasm
helper T cells, Sézary syndrome, 1297
Nephron
distal, hydrogen ion secretion, effect of hyperventilation, 77
function, heterogeneity of, collecting duct sodium transport, 767
Neutrophil(s)
chemiluminescence, group B streptococcal opsonins, 1379
chemotaxis dysfunction, bone marrow transplant patients, 22
function, gram-negative rod bacteremia, 190
kinetics, human, 705
particulate superoxide-forming system, role in respiratory burst, 989
phagocytosis, urate crystal-induced chemotactic factor, 815
Nitroglycerin
effect on left ventricular blood flow, coronary artery occlusion, 1287
Nucleotide
purine, kidney ammonia production, 326
purine, synthesis in human leukocytes, hypoxanthine-guanine phosphoribosyl transferase deficiency, 289

O

Obesity
composition of weight lost during weight reduction, 722
hyperglycemic mice, decreased noninsulin-stimulated glucose uptake and metabolism by skeletal soleus muscle, 1078
insulin receptors on monocytes, fluctuations in affinity and concentration, 1123
insulin sensitivity, correlation with insulin receptor binding in fat cells, 1435
Oocytes
Xenopus laevis, translation and stability of human globin mRNA, 1419
Opsonins
Group B streptococcal, neutrophil chemiluminescence, 1379
Organ culture
bone resorption, inhibition by divalent cation ionophores, 1327
Osteoporosis
effect of age and activity, 716
Ouabain
effects on myocardial oxygen metabolism, chronic coronary artery disease, 312
Oxidation
free fatty acids, human skeletal muscle, intramuscular lipid pool, 421
Oxygen
control of inner medulla cyclic AMP, role of prostaglandins, 1370
effect on superoxide dismutase, catalase, glutathione peroxidase, and cytochrome *c* reductase, leukocytes and alveolar macrophages, 1174
high-affinity, hemoglobin St. Louis, 1098
maximal consumption, lung disease, 880
myocardial metabolism, effects of ouabain, chronic coronary artery disease, 312

P

Pancreas
acinar cells, effect of cholecystokinin and cholinergic agents on membrane-bound calcium, 1482
effect of bombesin on amylase, calcium, and adenylate cyclase, 891
exocrine secretion, response to secretin and cholecystokinin, effect of somatostatin, 1
and gallbladder functions, regulation by intraluminal fatty acids and bile acids, 493
glucose and ATP levels in islet tissue, diabetes, 1193
islet response to glucose, insulin release and cyclic AMP accumulation, 1209
Paraproteinemia
blood hyperviscosity, clinical manifestations, 1155
Parathyroid hormone
calcium and phosphorus, roles in insulin secretion, 359
effect on renal bicarbonate reabsorption, 336
exaggerated phosphaturic response to, in familial X-linked hypophosphatemic rickets, 152
inhibition of renal action by hypermagnesemia, 1273

liver and renal uptake of, 781
renal resistance to during phosphorus depletion, 1461
Penicillamine
effect on polymorphonuclear leukocyte function, 871
Peptides
bombesin-like, effect on pancreatic amylase, calcium, and adenylate cyclase, 891
permeability-enhancing, high molecular weight kininogen, in Flaujeac factor deficiency, 1395
Permeability
lung vascular, histamine-induced, prevention by antihistamine, 391
pH
central nervous system, in uremia, effect of hemodialysis, 306
urine, effect of hyperventilation, 77
Phagocytosis
granulocytes, chemiluminescence, 789
neutrophil function, gram-negative rod bacteremia, 190
neutrophils, urate crystal-induced chemotactic factor, 815
polymorphonuclear leukocytes, effect of penicillamine, 871
polymorphonuclear leukocytes, NADPH oxidase activity, 774
Phosphorus
calcium and parathyroid hormone, roles in insulin secretion, 359
depletion, renal resistance to parathyroid hormone during, 1461
inorganic, stimulation of ammonia production and excretion, 557
reduced renal absorption, response to parathyroid hormone, familial X-linked hypophosphatemic rickets, 152
regulation, role in intrarenal dopamine production, 71
Physical activity
effect on bone mineral loss, 716
Phytohemagglutinin
effect on potassium transport, lymphocytes, 1358
stimulation of lymphocytes, adenosine metabolism, 654
Placenta
hemochorial, rabbit, steady-state concentration gradients of ferritin, 912
Plaque
direct hemolytic assay, rheumatoid factor, 933
lipid, atherosclerosis, physical chemistry of, 200
Platelet
release-inducing activity in plasma, thromboxane A_2, 1119
response, endothelial cell injury, role in homocystine-induced arteriosclerosis, 731
transfusion, antibody response, 432
Polyarteritis nodosa
antibody-dependent cell-mediated cytotoxicity, 173
Porphyria cutanea tarda
decreased uroporphyrinogen decarboxylase activity, inherited defect, 1089
Potassium
transport, phytohemagglutinin-treated lymphocytes, 1358
Potential difference
ion dependency of, human collecting ducts, 1233
Pressure
left ventricular, hemodynamics of fall of, 751
Proglucagon
increase in chronic renal failure, 742
Proline
type II hyperprolinemia, Δ^1-pyrroline-5-carboxylic acid dehydrogenase deficiency, 598
Properdin
Factor B, major histocompatibility complex, and C2 deficiency, relationship of gene coding for, 1240
Prostaglandin
renal synthesis, hypertension, 862
role in oxygen control of renal medullary cyclic AMP, 1370
Protease
activity, chemotactic factor inactivator, 123
metallo-, digestion of articular cartilage proteoglycan at neutral and acid pH, 1030
Protein
androgen binding, man and monkey testis and epididymis, 1061
binding fatty acid, role in esterification, 632
binding vitamin D and 25-hydroxyvitamin D, isolation of, 514
binding vitamin D and metabolites, patients with mineral homeostasis disorders, 1217
Escherichia coli, digestion by human polymorphonuclear leukocytes, role of lysosomal elastase, 971
immunoglobulin M, complement fixation by Cμ4 fragments, 16
Proteoglycan
articular cartilage, metalloprotease digestion of at neutral and acid pH, 1030
Pseudohermaphroditism
male, deficient 5α-dihydrotestosterone binding in skin fibroblasts, 345
Pulmonary
disease, maximal oxygen consumption, 880
edema and increased permeability, histamine-induced, prevention by antihistamine, 391
fibrosis, collagen-induced migration inhibition factor and cytotoxicity, role of lymphocytes, 1223
lymph flow and extravascular water, effect of α-naphthylthiourea, 482
macrophage bactericidal enhancement by alveolar lining material, 271
mechanical abnormalities, intermediate α-1-antitrypsin deficiency, 1069
Purine
nucleotide cycle, kidney ammonia production, 326
nucleotide synthesis, human leukocytes, hypoxanthine-guanine phosphoribosyl transferase deficiency, 289
Pyelonephritis
immune response to *Escherichia coli* O and K antigens, 276
intrarenal urea recycling, 1348
Pyridine nucleotides
electron donors for particulate superoxide-forming system in neutrophils, 989
Pyrimidine 5′-nucleotidase
deficiency, erythrocytes, in lead poisoning, 926
Δ^1-Pyrroline-5-carboxylic acid dehydrogenase
deficiency in type II hyperprolinemia, 598

R

Radiation
long-term effects on T and B lymphocytes, Hodgkin's disease, 803
Radioimmunoassay
fibrinopeptide A, disseminated intravascular coagulation and systemic lupus erythematosus, 142
18-hydroxy 11-deoxycorticosterone regulation in man, 221
protein binding vitamin D and metabolites, patients with mineral homeostasis disorders, 1217
thrombin in clotting blood, 1249
Radioligand receptor assay
25-hydroxyvitamin D_2/D_3 and 1α-25-dihydroxyvitamin D_2/D_3, 61
Receptors
aldosterone, plasma mineralocorticoid activity, in hypertension, 579
angiotensin II, adrenal cortex, regulation by dietary electrolytes, 834
binding, inhibitor of in insulin-resistant diabetes, 1442
insulin, binding in fat cells, sensitivity in obesity, 1435
insulin, on monocytes, fluctuations in affinity and concentration, 1123

low-density lipoproteins, lymphocytes, 1465
Renal tubular acidosis
classic type 1, impaired conservation of sodium and chloride, 454
Renin
release, effect of indomethacin, 282
secretion, renal, effect of hypertension, 964
Respiration
gas exchange and age dependence of arterial blood gases, in idiopathic scoliosis, 825
Respiratory burst
role of particulate superoxide-forming system in neutrophils, 989
Rheumatic disease
inherited second component of complement deficiency, 853
Rheumatoid factor
direct hemolytic plaque assay, 933
Ricinoleic acid
effects on small intestinal function and structure, 380
Rickets
familial X-linked hypophosphatemic, exaggerated phosphaturic response to parathyroid hormone, 152
RNA
messenger γ-globin, and γ-globin genes, quantitation with complementary DNA, 1475
messenger, human globin, translation and stability of in *Xenopus* oocytes, 1419
messenger, role in estrogen effect on very low density lipoprotein synthesis, in cockerel, 368

S

Salicylates
effect on histamine and histidine metabolism, inhibition of imidazoleacetate phosphoribosyl transferase, 137
Scleroderma
progressive systemic sclerosis, lymphokine production by lymphocytes, cutaneous antigen stimulation, 1388
Scoliosis
idiopathic, gas exchange and age dependence of arterial blood gases, 825
Secretin
exocrine pancreatic secretion, effect of somatostatin, 1
Sézary syndrome
neoplastic helper T cells, 1297
Sickle cell anemia
human globin mRNA, translation and stability of in *Xenopus* oocytes, 1419
irreversible deformation of spectrin-actin lattice, sickled cells, 955
response to extracorporeal red cell carbamylation, 642
Sjögren's syndrome
antibody-dependent cell-mediated cytotoxicity, 173
Skin
wheal and flare reactions, late phase, role of IgE antibodies, 408
Sodium
and chloride transport, thin ascending limb of Henle, 1054
chloride and water reabsorption, proximal convoluted tubule, role of chloride concentration gradients, 1110
impaired conservation of, type 1 classic renal tubular acidosis, 454
transport, collecting duct, heterogeneity of nephron function, 767
transport, collecting tubule, effect of natriuretic factor, 590
Somatostatin
effect on pancreatic secretion response to secretin and cholecystokinin, 1
Spectrin-actin
lattice, irreversible deformation, sickled cells, 955
Sprue
tropical, jejunal perfusion of simple and conjugated folates, 298
Starvation
metabolic response of obese patients, 722
Stem cell
defect, lymphocyte subpopulations, severe combined immunodeficiency, 130
Streptococcus
Group B, opsonins, neutrophil chemiluminescence, 1379
Streptozotocin diabetes
glomerular basement membrane, biosynthesis and chemical composition, 844
Stromal-vascular fraction
adipocyte precursors in culture, 699
ST-segment
elevation, myocardial ischemic damage, coronary artery occlusion, 1317
Sulfite oxidase
purification of from human liver, 543
Sulfite oxidase deficiency
characterization of molecular defect, 551
Superoxide
forming system, neutrophils, role in respiratory burst, 989
production and chemiluminescence, myeloperoxidase-deficient leukocytes, 50
role in chemiluminescence, phagocytosing, 789
Superoxide dismutase
polymorphonuclear leukocytes and alveolar macrophages, effect of hyperoxia, 1174
Suppression
B cell differentiation, leukocytes from hypogammaglobulinemia patients, 109
Synovium
allogenic and autologous, cytotoxicity of rheumatoid lymphocytes for, 613
rheumatoid arthritis, cytotoxicity of leukocytes and lymphocytes, 690

T

T helper cell defect
lymphocyte subpopulations, severe combined immunodeficiency, 130
T lymphocytes
alterations in heart transplant patients, 212
helper, neoplastic, Sézary syndrome, 1297
long-term effects of radiation, Hodgkin's disease, 803
Testicular feminization
deficient 5α-dihydrotestosterone binding in skin fibroblasts, 345
Testis
androgen-binding protein, man and monkey, 1061
Thalassemia
quantiation of γ-globin genes and γ-globin mRNA, 1475
Thrombin
activity, fibrinopeptide A generation in clinical blood samples, 1136
radioimmunoassay in clotting blood, 1249
Thrombocytosis
induction by colcemid, 1280
Thromboxane A_2
platelet release-inducing activity in plasma, 1119
Thyroid
daily secretion of 3,3′,5′-triiodothyronine (reverse T_3), 32
stimulation of bone resorption, 529
Thyrotropin
effect of amiodarone on metabolism of, 255
Thyroxin
effect of amiodarone on metabolism of, 255
Transfusion
platelet, antibody response, 432
Transplantation
bone marrow, defective neutrophil chemotaxis, 22
heart, alterations in B and T lymphocytes, 212
Triiodothyronine
effect of amiodarone on metabolism of, 255

3,3',5'-, (reverse T_3), daily thyroid secretion, 32
Tuberculin
and "Jones-Mote" delayed hypersensitivity reactions, basophils in, 1145
Tubule
collecting, sodium transport, effect of natriuretic factor, 590
proximal convoluted, sodium chloride and water reabsorption, role of chloride concentration gradients, 1110
proximal, straight segment, urea secretion, 604
superficial proximal straight, anion transport, 500

U

Umbilicus
fetal lamb, amino acid uptake, 1428
Urate
crystal-induced chemotactic factor, 815
nephropathy, micropuncture study, 681
Urea
intrarenal recycling, pyelonephritis, 1348
secretion by straight segment of proximal tubule, 604
Uremia
central nervous system pH, effects of hemodialysis, 306
intrarenal urea recycling, pyelonephritis, 1348
natriuretic factor, inhibition of sodium transport, collecting tubule, 590
pathogenesis of hyperglucagonemia, 1266
Uroporphyrinogen decarboxylase
decreased activity in porphyria cutanea tarda, inherited defect, 1089

V

Ventricular
pressure fall, hemodynamics of, 751
Vibrio cholerae
and cholera enterotoxin, intestinal myoelectric response, 91
Videometry
regional left ventricular function before and after aortocoronary artery bypass surgery, myocardial wall thickening and postoperative graft flows, 1339
Viscosity
hyper-, blood, paraproteinemia, clinical manifestations, 1155
Vitamin D
and 25-hydroxyvitamin D transport, isolation of binding protein, 514
metabolites, binding protein, patients with mineral homeostasis disorders, 1217
metabolites, 25-hydroxyvitamin D_2/D_3 and 1α,25-dihydroxyvitamin D_2/D_3, radioligand receptor assay, 61
Volume expansion
chronic hypotonic, renal regulation of acid-base equilibrium during, role of adrenal gland, 1201
heterogeneity of nephron function, collecting duct sodium transport, 767

W

Water
excretion, renal, effect of hypertension, 964
extravascular, and lymph flow, lung, effect of α-naphthylthiourea, 482
flow, osmotic, selective inhibition by general anesthetics, toad urinary bladder, 980
layer, intestinal mucosa, role of bile acids in lipid absorption, 97
and sodium chloride reabsorption, proximal convoluted tubule, role of chloride concentration gradients, 1110
Weight
reduction, obese patients, composition of weight lost, 722

X

Xenopus laevis
oocytes, translation and stability of human globin mRNA, 1419
X-ray diffraction
human aorta fatty streaks, 997

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of Clinical Investigation produced monthly by The Rockefeller University Press at 1230 York Ave., New York 10021 for The American Society for Clinical Investigation, San Francisco, California, nonprofit corporation, authorized to mail at special rates. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 6775; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 6361. Total paid circulation, 6361; free subscriptions, 21; office use, left-over, unaccounted, spoiled, 393; net press run, 6775. Single issue nearest date October 1976.

JULY 1976 VOLUME 58 NUMBER 1

1 Effect of growth hormone-release inhibiting hormone on hormones stimulating exocrine pancreatic secretion. *Stanislaw J. Konturek, Janina Tasler, Wojciech Obtulowicz, David H. Coy, and Andrew V. Schally*

7 The role of adrenergic mechanisms in the substrate and hormonal response to insulin-induced hypoglycemia in man. *Alan J. Garber, Philip E. Cryer, Julio V. Santiago, Morey W. Haymond, Anthony S. Pagliara, and David M. Kipnis*

16 A comparative analysis of the C1-binding ability of fragments derived from complement-fixing and non-complement-fixing IgM proteins. *Mary M. Hurst, John E. Volanakis, Robert M. Stroud, and J. Claude Bennett*

22 Defective neutrophil chemotaxis in bone marrow transplant patients. *Robert A. Clark, F. Leonard Johnson, Seymour J. Klebanoff, and E. Donnall Thomas*

32 An assessment of daily production and significance of thyroidal secretion of 3,3′,5′-triiodothyronine (reverse T_3) in man. *Inder J. Chopra*

41 Disturbed islet-cell function related to endogenous gastrin release. Studies on insulin secretion and glucose tolerance in pernicious anemia. *Jens F. Rehfeld*

50 Chemiluminescence and superoxide production by myeloperoxidase-deficient leukocytes. *Henry Rosen and Seymour J. Klebanoff*

61 Radioligand receptor assay for 25-hydroxyvitamin D_2/D_3 and 1α,25-dihydroxyvitamin D_2/D_3. Application to hypervitaminosis D. *Mark R. Hughes, David J. Baylink, Patricia G. Jones, and Mark R. Haussler*

71 Phosphaturic effect of dopamine in dogs. Possible role of intrarenally produced dopamine in phosphate regulation. *Jean-Louis Cuche, Gary R. Marchand, Rainer F. Greger, Florian C. Lang, and Franklyn G. Knox*

77 The effect of hyperventilation on distal nephron hydrogen ion secretion. *R. A. Giammarco, M. B. Goldstein, M. L. Halperin, and B. J. Stinebaugh*

83 The effects of glucose and insulin on renal electrolyte transport. *Ralph A. DeFronzo, Martin Goldberg, and Zalman S. Agus*

91 Intestinal myoelectric activity in response to live *Vibrio cholerae* and cholera enterotoxin. *John R. Mathias, Gerald M. Carlson, A. J. DiMarino, Gerald Bertiger, Harry E. Morton, and Sidney Cohen*

97 The mechanism whereby bile acid micelles increase the rate of fatty acid and cholesterol uptake into the intestinal mucosal cell. *Henrik Westergaard and John M. Dietschy*

109 Suppression of B-cell differentiation by leukocytes from hypogammaglobulinemic patients. *Frederick P. Siegal, Marta Siegal, and Robert A. Good*

123 Characterization of the protease activity in the chemotactic factor inactivator. *Peter A. Ward and Juris Ozols*

130 Heterogeneity of lymphocyte subpopulations in severe combined immunodeficiency. Evidence against a stem cell defect. *Rebecca H. Buckley, Richard B. Gilbertsen, Richard I. Schiff, Euripedes Ferreira, S. Ozden Sanal, and Thomas A. Waldmann*

137 Effect of salicylates on histamine and L-histidine metabolism. Inhibition of imidazoleacetate phosphoribosyl transferase. *Joel Moss, Maria C. de Mello, Martha Vaughan, and Michael Beaven*

142 Fibrinopeptide A in plasma of normal subjects and patients with disseminated intravascular coagulation and systemic lupus erythematosus. *Malcolm Cronlund, John Hardin, James Burton, Loretta Lee, Edgar Haber, and Kurt J. Bloch*

152 Exaggerated phosphaturic response to circulating parathyroid hormone in patients with familial X-linked hypophosphatemic rickets. *Elizabeth Short, R. Curtis Morris, Jr., Anthony Sebastian, and Martin Spencer*

164 Metabolism of [1-^{14}C] and [2-^{14}C]leucine in cultured skin fibroblasts from patients with isovaleric acidemia. Characterization of metabolic defects. *Kay Tanaka, Roseann Mandell, and Vivian E. Shih*

173 Antibody-dependent cell-mediated cytotoxicity in selected autoimmune diseases. *Jean-Louis Feldmann, Martin J. Becker, Haralampos Moutsopoulos, Kenneth Fye, Marcia Blackman, Wallace V. Epstein, and Norman Talal*

180 Cystinosis. Intracellular cystine depletion by aminothiols in vitro and in vivo. *Jess G. Thoene, Robert G. Oshima, John C. Crawhall, David L. Olson, and Jerry A. Schneider*

190 Neutrophil function in gram-negative rod bacteremia. The interaction between phagocytic cells, infecting organisms, and humoral factors. *Ralph J. Weinstein and Lowell S. Young*

200 Physical chemistry of the lipids of human atherosclerotic lesions. Demonstration of a lesion intermediate between fatty streaks and advanced plaques. *Saul S. Katz, G. Graham Shipley, and Donald M. Small*

212 Alterations in T and B lymphocytes in heart transplant patients early and late postoperatively. *Tariq H. Khalaf, Samuel Strober, Glenda Garrelts, and Edward B. Stinson*

221 The regulation of plasma 18-hydroxy 11-deoxycorticosterone in man. *G. H. Williams, L. M. Braley, and R. H. Underwood*

230 Interactions of acetylcholine and epinephrine on the dynamics of insulin release in vitro. *I. M. Barr, A. E. Slonim, and R. Sharp*

240 Lymphokine stimulation of collagen accumulation. *Robert Lee Johnson and Morris Ziff*

253 CORRECTION

254 JULY AUTHOR INDEX

AUGUST 1976 VOLUME 58 NUMBER 2

255 Effect of amiodarone on serum triiodothyronine, reverse triiodothyronine, thyroxin, and thyrotropin. A drug influencing peripheral metabolism of thyroid hormones. *A. Burger, D. Dinichert, P. Nicod, M. Jenny, T. Lemarchand-Béraud, and M. B. Vallotton*

260 Kinetic analysis of lead metabolism in healthy humans. *Michael B. Rabinowitz, George W. Wetherill, and Joel D. Kopple*

271 Enhancement of bactericidal capacity of alveolar macrophages by human alveolar lining material. *John A. Juers, Robert M. Rogers, Joel B. McCurdy, and William W. Cook*

276 The local immune response to *Escherichia coli* O and K antigen in experimental pyelonephritis. *James W. Smith and Bertil Kaijser*

282 The effect of indomethacin and other anti-inflammatory drugs on the renin-angiotensin system. *J. Carlos Romero, Carol L. Dunlap, and Cameron G. Strong*

289 De novo synthesis of purine nucleotides in human peripheral blood leukocytes. Excessive activity of the pathway in hypoxanthine-guanine phosphoribosyltransferase deficiency. *Sara Brosh, Pnina Boer, Batia Kupfer, Andre de Vries, and Oded Sperling*

298 Jejunal perfusion of simple and conjugated folates in tropical sprue. *José J. Corcino, Ann M. Reisenauer, and Charles H. Halsted*

306 Central nervous system pH in uremia and the effects of hemodialysis. *Allen I. Arieff, Raul Guisado, Shaul G. Massry, and Virginia C. Lazarowitz*

312 Effects of ouabain on myocardial oxygen supply and demand in patients with chronic coronary artery disease. A hemodynamic, volumetric, and metabolic study in patients without heart failure. *Henry DeMots, Shahbudin H. Rahimtoola, E. Louise Kremkau, William Bennett, and Delmar Mahler*

320 Comparison of the suppressive effects of elevated plasma glucose and free fatty acid levels on glucagon secretion in normal and insulin-dependent diabetic subjects. Evidence for selective alpha-cell insensitivity to glucose in diabetes mellitus. *John E. Gerich, Maurice Langlois, Claudio Noacco, Mara Lorenzi, John H. Karam, and Peter H. Forsham*

326 The purine nucleotide cycle. A pathway for ammonia production in the rat kidney. *Ronald T. Bogusky, Leah M. Lowenstein, and John M. Lowenstein*

336 A micropuncture study of the effect of parathyroid hormone on renal bicarbonate reabsorption. *Norman Bank and Hagop S. Aynedjian*

345 Male pseudohermaphroditism presumably due to target organ unresponsiveness to androgens. Deficient 5α-dihydrotestosterone binding in cultured skin fibroblasts. *Morris Kaufman, Cipia Straisfeld, and Leonard Pinsky*

351 Characteristics of stimulation of H^+ transport by aldosterone in turtle urinary bladder. *Qais Al-Awqati, Laurence H. Norby, Allan Mueller, and Philip R. Steinmetz*

359 The relative roles of calcium, phosphorus, and parathyroid hormone in glucose- and tolbutamide-mediated insulin release. *H. R. Harter, J. V. Santiago, W. E. Rutherford, E. Slatopolsky, and S. Klahr*

368 Synthesis of very low density lipoproteins in the cockerel. Effects of estrogen. *Lawrence Chan, Richard L. Jackson, Bert W. O'Malley, and Anthony R. Means*

380 The effects of sodium ricinoleate on small intestinal function and structure. *William S. Cline, Vilja Lorenzsonn, Linda Benz, Paul Bass, and Ward A. Olsen*

391 Effects of antihistamines on the lung vascular response to histamine in unanesthetized sheep. Diphenhydramine prevention of pulmonary edema and increased permeability. *Kenneth L. Brigham, Ronald E. Bowers, and Patty Jill Owen*

399 A role for adenosine deaminase in human monocyte maturation. *Dina Fischer, Martin B. Van der Weyden, Ralph Snyderman, and William N. Kelley*

408 The late phase of the immediate wheal and flare skin reaction. Its dependence upon IgE antibodies. *Graham O. Solley, Gerald J. Gleich, Robert E. Jordon, and Arnold L. Schroeter*

421 Free fatty acid oxidation by forearm muscle at rest, and evidence for an intramuscular lipid pool in the human forearm. *Gilles R. Dagenais, Robert G. Tancredi, and Kenneth L. Zierler*

432 Heterogeneity of antibody response to human platelet transfusion. *Kenneth K. Wu, John S. Thompson, John A. Koepke, John C. Hoak, and Ron Flink*

439 Localization of cardiac myosin-specific antibody in myocardial infarction. *Ban An Khaw, George A. Beller, Edgar Haber, and Thomas W. Smith*

447 Iron deficiency in the rat. Physiological and biochemical studies of muscle dysfunction. *C. A. Finch, Louise R. Miller, A. R. Inamdar, Richard Person, Katherine Seiler, and Bruce Mackler*

454 Impaired renal conservation of sodium and chloride during sustained correction of systemic acidosis in patients with type 1, classic renal tubular acidosis. *Anthony Sebastian, Elisabeth McSherry, and R. Curtis Morris, Jr.*

470 The glycosaminoglycans of the human artery and their changes in atherosclerosis. *R. L. Stevens, M. Colombo, J. J. Gonzales, W. Hollander, and K. Schmid*

482 The relationship between right duct lymph flow and extravascular lung water in dogs given α-naphthylthiourea. *Michael B. Pine, P. Maynard Beach, Thomas S. Cottrell, Mildred Scola, and Gerard M. Turino*

493 Regulation of pancreatic and gallbladder functions by intraluminal fatty acids and bile acids in man. *Juan-R. Malagelada, E. P. DiMagno, W. H. J. Summerskill, and V. L. W. Go*

500 Anion transport processes in the mammalian superficial proximal straight tubule. *James A. Schafer and Thomas E. Andreoli*

514 The transport of vitamin D and its 25-hydroxy metabolite in human plasma. Isolation and partial characterization of vitamin D and 25-hydroxyvitamin D binding protein. *Michio Imawari, Kaichi Kida, and DeWitt S. Goodman*

CONCISE PUBLICATION

524 Aspirin effects on lymphocyte cyclic AMP levels in normal human subjects. *Dixie E. Snider and Charles W. Parker*

528 August Author Index

529 Direct stimulation of bone resorption by thyroid hormones. *Gregory R. Mundy, James L. Shapiro, Janet G. Bandelin, Ernesto M. Canalis, and Lawrence G. Raisz*

535 In vitro behavior of human intestinal mucosa. The influence of acetyl choline on ion transport. *P. E. T. Isaacs, C. L. Corbett, A. K. Riley, P. C. Hawker, and L. A. Turnberg*

543 Purification and properties of sulfite oxidase from human liver. *Jean L. Johnson and K. V. Rajagopalan*

551 Human sulfite oxidase deficiency. Characterization of the molecular defect in a multicomponent system. *Jean L. Johnson and K. V. Rajagopalan*

557 Stimulation of ammonia production and excretion in the rabbit by inorganic phosphate. Study of control mechanisms. *Henry L. Yu, Rose Giammarco, Marc B. Goldstein, Bobby J. Stinebaugh, and Mitchell L. Halperin*

565 Arginine-stimulated acute phase of insulin and glucagon secretion in diabetic subjects. *Jerry P. Palmer, James W. Benson, Robert M. Walter, and John W. Ensinck*

571 Development of glucagon sensitivity in neonatal rat liver. *Frank Vinicor, Gary Higdon, Julia F. Clark, and Charles M. Clark, Jr.*

579 Aldosterone receptors and the evaluation of plasma mineralocorticoid activity in normal and hypertensive states. *John D. Baxter, Morris Schambelan, Daniel T. Matulich, Benjamin J. Spindler, Addison A. Taylor, and Frederic C. Bartter*

590 On the influence of the naturiuretic factor from patients with chronic uremia on the bioelectric properties and sodium transport of the isolated mammalian collecting tubule. *Leon G. Fine, Jacques J. Bourgoignie, Kuo H. Hwang, and Neal S. Bricker*

598 Type II hyperprolinemia. Δ^1-pyrroline-5-carboxylic acid dehydrogenase deficiency in cultured skin fibroblasts and circulating lymphocytes. *David Valle, Stephen I. Goodman, Derek A. Applegarth, Vivian E. Shih, and James M. Phang*

604 Urea secretion by the straight segment of the proximal tubule. *Satoshi Kawamura and Juha P. Kokko*

613 Cytotoxic activity of rheumatoid and normal lymphocytes against allogeneic and autologous synovial cells in vitro. *Marie M. Griffiths, Charles B. Smith, John R. Ward, and Melville R. Klauber*

623 Studies on the mechanisms of food-stimulated gastric acid secretion in normal human subjects. *Charles T. Richardson, John H. Walsh, Martha I. Hicks, and John S. Fordtran*

632 Fatty acid binding protein. Role in esterification of absorbed long chain fatty acid in rat intestine. *Robert K. Ockner and Joan A. Manning*

642 Hematologic and clinical responses in patients with sickle cell anemia after chronic extracorporeal red cell carbamylation. *Dennis A. Diederich, Robert C. Trueworthy, Paul Gill, A. Martin Cader, and William E. Larsen*

654 Adenosine metabolism in phytohemagglutinin-stimulated human lymphocytes. *Floyd F. Snyder, John Mendelsohn, and J. Edwin Seegmiller*

667 Discoidal bilayer structure of nascent high density lipoproteins from perfused rat liver. *Robert L. Hamilton, Mary C. Williams, Christopher J. Fielding, and Richard J. Havel*

681 A micropuncture study of the early phase of acute urate nephropathy. *John D. Conger, Sandor A. Falk, Stephen J. Guggenheim, and Thomas J. Burke*

690 The cytotoxicity of leukocytes and lymphocytes from patients with rheumatoid arthritis for synovial cells. *Donald A. Person, John T. Sharp, and Martin D. Lidsky*

699 Cytological and enzymological characterization of adult human adipocyte precursors in culture. *Robin L. R. Van, Colin E. Bayliss, and Daniel A. K. Roncari*

705 Neutrophil kinetics in man. *John T. Dancey, Kurt A. Deubelbeiss, Laurence A. Harker, and Clement A. Finch*

716 Age and activity effects on rate of bone mineral loss. *David M. Smith, M. R. A. Khairi, James Norton, and C. Conrad Johnston, Jr.*

722 Composition of weight lost during short-term weight reduction. Metabolic responses of obese subjects to starvation and low-calorie ketogenic and nonketogenic diets. *Mei-Uih Yang and Theodore B. Van Itallie*

731 Homocystine-induced arteriosclerosis. The role of endothelial cell injury and platelet response in its genesis. *Laurence A. Harker, Russell Ross, Sherrill J. Slichter, and C. Ronald Scott*

742 Heterogeneity of plasma glucagon. Circulating components in normal subjects and patients with chronic renal failure. *S. F. Kuku, J. B. Jaspan, D. S. Emmanouel, A. Zeidler, A. I. Katz, and A. H. Rubenstein*

751 Hemodynamic determinants of the time-course of fall in canine left ventricular pressure. *James L. Weiss, James W. Frederiksen, and Myron L. Weisfeldt*

CONCISE PUBLICATION

761 Influence of physiologic hyperglucagonemia on basal and insulin-inhibited splanchnic glucose output in normal man. *Philip Felig, John Wahren, and Rosa Hendler*

766 SEPTEMBER AUTHOR INDEX

OCTOBER 1976 VOLUME 58 NUMBER 4

767 Direct measurement of papillary collecting duct sodium transport in the rat. Evidence for heterogeneity of nephron function during Ringer loading. *Jay H. Stein, Richard W. Osgood, and Robert T. Kunau, Jr.*

774 Further characterization of NADPH oxidase activity of human polymorphonuclear leukocytes. *Linda C. McPhail, Lawrence R. DeChatelet, and Pamela S. Shirley*

781 Selective uptake of intact parathyroid hormone by the liver. Differences between hepatic and renal uptake. *K. Martin, K. Hruska, A. Greenwalt, S. Klahr, and E. Slatopolsky*

789 The origin of the chemiluminescence of phagocytosing granulocytes. *Bruce D. Cheson, Ronald L. Christensen, Richard Sperling, Bryan E. Kohler, and Bernard M. Babior*

797 Mechanisms of methylene blue stimulation of the hexose monophosphate shunt in erythrocytes. *Earl N. Metz, Stanley P. Balcerzak, and Arthur L. Sagone, Jr.*

803 Long term effects of radiation on T and B lymphocytes in peripheral blood of patients with Hodgkin's disease. *Zvi Fuks, Samuel Strober, Arthur M. Bobrove, Takehiko Sasazuki, Andrew McMichael, and Henry S. Kaplan*

815 Urate crystal-induced chemotactic factor. Isolation and partial characterization. *Isaias Spilberg, Alberto Gallacher, Jagdish M. Mehta, and Brian Mandell*

820 Red cell age-related changes of hemoglobins A_{1a+b} and A_{1c} in normal and diabetic subjects. *James F. Fitzgibbons, Robert D. Koler, and Richard T. Jones*

825 Idiopathic scoliosis. Gas exchange and the age dependence of arterial blood gases. *Enid R. Kafer*

834 Regulation of angiotensin II receptors in the rat adrenal cortex by dietary electrolytes. *Janice Douglas and Kevin J. Catt*

844 Glomerular basement membrane. Biosynthesis and chemical composition in the streptozotocin diabetic rat. *Paul J. Beisswenger*

853 Inherited deficiency of the second component of complement. Rheumatic disease associations. *David Glass, Donald Raum, David Gibson, J. Sydney Stillman, and Peter H. Schur*

862 Renal prostaglandin synthesis in the spontaneously hypertensive rat. *Michael J. Dunn*

871 The effect of D-penicillamine on polymorphonuclear leukocyte function. *Hanna Chwalinska-Sadowska and John Baum*

880 Maximal oxygen consumption in patients with lung disease. *Kenneth L. Wehr and Robert L. Johnson, Jr.*

891 In vitro action of bombesin and bombesin-like peptides on amylase secretion, calcium efflux, and adenylate cyclase activity in the rat pancreas. A comparison with other secretagogues. *Monique Deschodt-Lanckman, Patrick Robberecht, Philippe De Neef, Marc Lammens, and Jean Christophe*

899 Acute effects of antiglomerular basement membrane antibody on the process of glomerular filtration in the rat. *Roland C. Blantz and Curtis B. Wilson*

912 The steady state concentration gradients of an electron-dense marker (ferritin) in the three-layered hemochorial placenta of the rabbit. *Kent L. Thornburg and J. Job Faber*

926 Lead poisoning. Association with hemolytic anemia, basophilic stippling, erythrocyte pyrimidine 5′-nucleotidase deficiency, and intraerythocytic accumulation of pyrimidines. *William N. Valentine, Donald E. Paglia, Kay Fink, and Glenn Madokoro*

933 Rheumatoid factor-producing cells detected by direct hemolytic plaque assay. *John H. Vaughan, Tadao Chihara, Terry L. Moore, Dick L. Robbins, Kiyoaki Tanimoto, John S. Johnson, and Robert McMillan*

942 The role of complement in the clearance of cold agglutinin-sensitized erythrocytes in man. *Charles J. Jaffe, John P. Atkinson, and Michael M. Frank*

950 Inhibition of lymphoproliferation by hyperlipoproteinemic plasma. *Caroline C. Waddell, O. David Taunton, and Jeremiah J. Twomey*

955 Irreversible deformation of the spectrin-actin lattice in irreversibly sickled cells. *Samuel E. Lux, Kathryn M. John, and Morris J. Karnovsky*

964 Mechanisms of portal hypertension-induced alterations in renal hemodynamics, renal water excretion, and renin secretion. *Robert J. Anderson, Robert E. Cronin, Keith M. McDonald, and Robert W. Schrier*

971 The role of lysosomal elastase in the digestion of *Escherichia coli* proteins by human polymorphonuclear leukocytes. Experiments with living leukocytes. *Joanne Blondin and Aaron Janoff*

980 Selective inhibition of osmotic water flow by general anesthetics in toad urinary bladder. *Sherman D. Levine, Rhoda D. Levine, Ronald E. Worthington, and Richard M. Hays*

989 The particulate superoxide-forming system from human neutrophils. Properties of the system and further evidence supporting its participation in the respiratory burst. *Bernard M. Babior, John T. Curnutte, and B. Jane McMurrich*

997 Molecular organization of the cholesteryl ester droplets in the fatty streaks of human aorta. *Donald M. Engelman and Gerald M. Hillman*

1008 Compositional mapping of cholesteryl ester droplets in the fatty streaks of human aorta. *Gerald M. Hillman and Donald M. Engelman*

1019 The paradox of *Hemophilus influenzae* type B bacteremia in the presence of serum bactericidal activity. *Stephen Shaw, Arnold L. Smith, Porter Anderson, and David H. Smith*

1030 Metalloproteases of human articular cartilage that digest cartilage proteoglycan at neutral and acid pH. *Asher I. Sapolsky, Harold Keiser, David S. Howell, and J. Frederick Woessner, Jr.*

1043 CORRECTION

1044 OCTOBER AUTHOR INDEX

NOVEMBER 1976 VOLUME 58 NUMBER 5

1045 Mannan antigenemia in the diagnosis of invasive *Candida* infections. *Marc H. Weiner and William J. Yount*

1054 Mechanism of sodium and chloride transport in the thin ascending limb of Henle. *Masashi Imai and Juha P. Kokko*

1061 Androgen binding proteins of testis, epididymis, and plasma in man and monkey. *Robert A. Vigersky, D. Lynn Loriaux, Stuart S. Howards, Gary B. Hodgen, Mortimer B. Lipsett, and Andreas Chrambach*

1069 Pulmonary abnormalities in intermediate alpha-l-antitrypsin deficiency. *William J. Hall, Richard W. Hyde, Robert H. Schwartz, Govind S. Mudholkar, D. Robert Webb, Y. P. Chaubey, and Phillip L. Townes*

1078 Decreased basal, noninsulin-stimulated glucose uptake and metabolism by skeletal soleus muscle isolated from obese-hyperglycemic (*ob/ob*) mice. *Guy S. Cuendet, Ernest G. Loten, Bernard Jeanrenaud, and Albert E. Renold*

1089 An inherited enzymatic defect in porphyria cutanea tarda. Decreased uroporphyrinogen decarboxylase activity. *J. P. Kushner, A. J. Barbuto, and G. R. Lee*

1098 Functional and physicochemical studies of hemoglobin St. Louis β28 (B10) Leu → Gln. A variant with ferric β heme iron. *Joelle Thillet, Michel Cohen-Solal, Maxime Seligmann, and Jean Rosa*

1107 Hemoglobin St. Louis (β28(B10) Leu → Gln). Crystal structure of the fully reduced (deoxy) form. *N. Leigh Anderson*

1110 Mechanism of NaCl and water reabsorption in the proximal convoluted tubule of rat kidney. Role of chloride concentration gradients. *Klaus H. Neumann and Floyd C. Rector, Jr.*

1119 Persistence of thromboxane A_2-like material and platelet release-inducing activity in plasma. *J. B. Smith, Carol Ingerman, and M. J. Silver*

1123 Fluctuations in the affinity and concentration of insulin receptors on circulating monocytes of obese patients. Effects of starvation, refeeding, and dieting. *Robert S. Bar, Phillip Gorden, Jesse Roth, C. Ronald Kahn, and Pierre De Meyts*

1136 The generation of fibrinopeptide A in clinical blood samples. Evidence for thrombin activity. *H. L. Nossel, M. Ti, K. L. Kaplan, K. Spanondis, T. Soland, and V. P. Butler, Jr.*

1145 Basophils in tuberculin and "Jones-Mote" delayed reactions of humans. *Philip W. Askenase and J. Edward Atwood*

1155 Paraproteinemia. Blood hyperviscosity and clinical manifestations. *Michael A. McGrath and Ronald Penny*

1163 Gonococci causing disseminated gonococcal infection are resistant to the bactericidal action of normal human sera. *G. K. Schoolnik, T. M. Buchanan, and K. K. Holmes*

1174 The alteration of superoxide dismutase, catalase, glutathione peroxidase, and NAD(P)H cytochrome *c* reductase in guinea pig polymorphonuclear leukocytes and alveolar macrophages during hyperoxia. *Manfred Rister and Robert L. Baehner*

1185 Alterations of myocardial amino acid metabolism in chronic ischemic heart disease. *Gilbert H. Mudge, Jr., Roger M. Mills, Jr., Heinrich Taegtmeyer, Richard Gorlin, and Michael Lesch*

1193 Glucose and ATP levels in pancreatic islet tissue of normal and diabetic rats. *Franz M. Matschinsky, Anthony S. Pagliara, Susan N. Stillings, and Barbara A. Hover*

1201 The critical role of the adrenal gland in the renal regulation of acid-base equilibrium during chronic hypotonic expansion. Evidence that chronic hyponatremia is a potent stimulus to aldosterone secretion. *Jordan J. Cohen, Henry N. Hulter, Neil Smithline, James C. Melby, and William B. Schwartz*

1209 Insulin release and cyclic AMP accumulation in response to glucose in pancreatic islets of fed and starved rats. *A. Rabinovitch, V. Grill, A. E. Renold, and E. Cerasi*

1217 Radioimmunoassay of the binding protein for vitamin D and its metabolites in human serum. Concentrations in normal subjects and patients with disorders of mineral homeostasis. *John G. Haddad, Jr., and Jean Walgate*

1223 Pathogenic mechanisms in pulmonary fibrosis. Collagen-induced migration inhibition factor production and cytotoxicity mediated by lymphocytes. *Thomas C. Kravis, Aftab Ahmed, Timothy E. Brown, Jack D. Fulmer, and Ronald G. Crystal*

1233 Electrophysiological study of isolated perfused human collecting ducts. Ion dependency of the transepithelial potential difference. *Harry R. Jacobson, James B. Gross, Satoshi Kawamura, J. D. Waters, and Juha P. Kokko*

1240 The chromosomal order of genes controlling the major histocompatibility complex, properdin factor B, and deficiency of the second component of complement. *Donald Raum, David Glass, C. B. Carpenter, Chester A. Alper, and Peter H. Schur*

1249 The measurement of thrombin in clotting blood by radioimmunoassay. *Marc A. Shuman and Philip W. Majerus*

1259 Human myeloma IgA half-molecules. *Hans L. Spiegelberg and Ben G. Fishkin*

1266 Pathogenesis and characterization of hyperglucagonemia in the uremic rat. *D. S. Emmanouel, J. B. Jaspan, S. F. Kuku, A. H. Rubenstein, and A. I. Katz*

1273 Inhibitory effects of hypermagnesemia on the renal action of parathyroid hormone. *E. Slatopolsky, A. Mercado, A. Morrison, J. Yates, and S. Klahr*

1280 The effects of colcemid on hematopoiesis in the mouse. *Paul A. Bunn, Jr., Stanley E. Shackney, and Sharon S. Ford*

1286 NOVEMBER AUTHOR INDEX

DECEMBER 1976 VOLUME 58 NUMBER 6

1287 Effect of nitroglycerin and dipyridamole on regional left ventricular blood flow during coronary artery occlusion. *Lewis C. Becker*

1297 The Sézary syndrome. A malignant proliferation of helper T cells. *Samuel Broder, Richard L. Edelson, Marvin A. Lutzner, David L. Nelson, Richard P. MacDermott, Mary E. Durm, Carolyn K. Goldman, Bruce D. Meade, and Thomas A. Waldmann*

1307 The lymphocyte β-adrenoceptor in normal subjects and patients with bronchial asthma. The effect of different forms of treatment on receptor function. *M. E. Conolly and J. K. Greenacre*

1317 Relationship between epicardial ST-segment elevation and myocardial ischemic damage after experimental coronary artery occlusion in dogs. *Ming K. Heng, Bramah N. Singh, Robin M. Norris, Murray B. John, and Richard Elliot*

1327 Bone resorption in organ culture. Inhibition by the divalent cation ionophores A23187 and X-537A. *Joel L. Ivey, Donald R. Wright, and Armen H. Tashjian, Jr.*

1339 Videometric analysis of regional left ventricular function before and after aortocoronary artery bypass surgery. Correlation of peak rate of myocardial wall thickening with late postoperative graft flows. *James H. Chesebro, Erik L. Ritman, Robert L. Frye, Hugh C. Smith, Daniel C. Connolly, Barry D. Rutherford, George D. Davis, Gordon K. Danielson, James R. Pluth, Donald A. Barnhorst, and Robert B. Wallace*

1348 A study of the intrarenal recycling of urea in the rat with chronic experimental pyelonephritis. *Richard M. Gilbert, Herbert Weber, Louise Turchin, Leon G. Fine, Jacques J. Bourgoignie, and Neal S. Bricker*

1358 Potassium transport in human blood lymphocytes treated with phytohemagglutinin. *George B. Segel and Marshall A. Lichtman*

1370 Modulation of the cyclic AMP content of rat renal inner medulla by oxygen. Possible role of local prostaglandins. *Frederick R. DeRubertis, Terry V. Zenser, Patricia A. Craven, and Bernard B. Davis*

1379 Assessment of Group B streptococcal opsonins in human and rabbit serum by neutrophil chemiluminescence. *Val G. Hemming, Robert T. Hall, Philip G. Rhodes, Ann O. Shigeoka, and Harry R. Hill*

1388 Cutaneous antigen-stimulating lymphokine production by lymphocytes of patients with progressive systemic sclerosis (scleroderma). *Hirobumi Kondo, Bruce S. Rabin, and Gerald P. Rodnan*

1395 Flaujeac factor deficiency. Reconstitution with highly purified bovine high molecular weight-kininogen and delineation of a new permeability-enhancing peptide released by plasma kallikrein from bovine high molecular weight-kininogen. *Robert T. Matheson, Donald R. Miller, Marie-José Lacombe, Yong N. Han, Sadaaki Iwanaga, Hisao Kato, and Kirk D. Wuepper*

1407 The role of insulin and glucagon in the regulation of basal glucose production in the postabsorptive dog. *A. D. Cherrington, J. L. Chiasson, J. E. Liljenquist, A. S. Jennings, U. Keller, and W. W. Lacy*

1419 Translation and stability of human globin mRNA in *Xenopus* oocytes. *George M. Maniatis, Francesco Ramirez, Almira Cann, Paul A. Marks, and Arthur Bank*

1428 Umbilical uptake of amino acids in the unstressed fetal lamb. *James A. Lemons, Eugene W. Adcock, III, M. Douglas Jones, Jr., Michael A. Naughton, Giacomo Meschia, and Frederick C. Battaglia*

1435 Correlation between insulin receptor binding in isolated fat cells and insulin sensitivity in obese human subjects. *Len C. Harrison, F. Ian R. Martin, and Roger A. Melick*

1442 Characterization of antibodies to the insulin receptor. A cause of insulin-resistant diabetes in man. *Jeffrey S. Flier, C. Ronald Kahn, David B. Jarrett, and Jesse Roth*

1450 Effects of fasting on insulin binding, glucose transport, and glucose oxidation in isolated rat adipocytes. Relationships between insulin receptors and insulin action. *Jerrold M. Olefsky*

1461 Renal resistance to parathyroid hormone during phosphorus deprivation. *T. H. Steele*

1465 Regulation of low density lipoprotein receptor activity in freshly isolated human lymphocytes. *Y. K. Ho, Michael S. Brown, David W. Bilheimer, and Joseph L. Goldstein*

1475 Quantitation of human gamma globin genes and gamma globin mRNA with purified gamma globin complementary DNA. *Francesco Ramirez, Joyce V. O'Donnell, Clayton Natta, and Arthur Bank*

1482 Action of cholecystokinin and cholinergic agents on membrane-bound calcium in dispersed pancreatic acinar cells. *Harold T. Shelby, Leroy P. Gross, Peter Lichty, and Jerry D. Gardner*

1494 DECEMBER AUTHOR INDEX

1495 INDEXES TO VOLUME 58
